Nicobobinus and his friend Rosie go in search of the Land of Dragons and find more adventure than they'd bargained for.

Now in PDF Get outside and get inspired in the garden Bursting with garden projects to make, cook and create, RHS Garden Projects is full of different projects for children to get excited about. From making their own garden buddy to baking a blueberry cheesecake; from lemonade lollies to Wild-West cacti, RHS Garden Projects is chock full of inspiring ideas. Each project and recipe is easy to make and has clear steps to follow. Beautiful photographs inspire children to make their own projects whilst bringing the garden to life - further proof that there's so much fun to be had in their own back yard. Also, there's a funky quiz section at the end of the book so kids can test their knowledge of plants and garden bugs. For those with green fingers and an active imagination, look no further than RHS Garden Projects. Easter Cracked is a vital resource for churches hoping to make the most of the opportunities they have to reach out during Easter. Contains services, craft, drama and more to use with all-ages.

From the bestselling 1001 series, comes a collection of 1001 quotations from numerous brilliant minds of the Ancient World through to the present day. With quotes from everyone including Marcus Aurelius, Sun Tzu, Shakespeare and

Nietzsche through to Ellen DeGeneres, Nelson Mandela, Mark Zuckerberg and Monty Python's Flying Circus, there is an immense range of ideas, witticisms and musings to ponder. The quotations cover a wide range of topics, including art and literature, culture, philosophy, politics, psychology and religion, made accessible and brought to life by being placed in their historical contexts and accompanied by a wealth of illustrations.

(Book). Of all American audio companies, JBL holds the record for overall longevity and product renown. To celebrate sixty years of success, this book offers details on the people and products that have made this company famous. From car stereos to concert hall installations, JBL is the most recognized audio brand in the world. Written by audio expert John Eargle, this book features full-color photos, historical advertisements, and hundreds of diagrams and images, many taken right from JBL's archives. Topics include stories behind the development of innovative applications for consumer products, as well as systems installations for stadiums, tour sound, movie theaters, recording studios, and places of worship. In addition to the technical info that will help explain the innovation, this book will cover the brilliant engineers, and colorful record producers, musicians and technicians who had the vision to pursue a "better way". This book is for anyone interested in the behind-the-scenes of a business success story, and who is fascinated on how amplified sound is applied in almost every aspect of our lives from the home to the concert hall.

This ground-breaking presentation of Neo-Hasidic philosophy gathers and analyzes the writings of its progenitors: five great twentieth-century European and American Jewish thinkers—Hillel Zeitlin, Martin Buber, Abraham Joshua Heschel, Shlomo Carlebach, and Zalman Schachter-Shalomi—along with a young Arthur Green.

This is a book about time--about one's own journey through it and, more important, about enlarging the pleasure one takes in that journey. It's about memory of the past, hope and fear for the future, and how they color, for better and for worse, one's experience of the present. Ultimately, it's a book about freedom--freedom from despair of the clock, of the aging body, of the seeming waste of one's daily routine, the freedom that comes with acceptance and appreciation of the human dimensions of time and of the place of each passing moment on life's bounteous continuum. For Robert Grudin, living is an art, and cultivating a creative partnership with time is one of the keys to mastering it. In a series of wise, witty, and playful meditations, he suggests that happiness lies not in the effort to conquer time but rather in learning "to bend to its curve," in hearing its music and learning to dance to it. Grudin offers practical advice and mental exercises designed to help the reader use time more effectively, but this is no ordinary self-help book. It is instead a kind of wisdom literature, a guide to life, a feast for the mind and for the spirit. *A New Hasidism: Branches* breaks new ground in treating Neo-Hasidism as a contemporary approach to Jewish living. Beginning with two defining credos, it goes to discuss such issues as halakhah, leadership, the role of women, ecology, and others from a Neo-Hasidic perspective.

For the Vampire community, the Solstice Choosing has been the holiest night of the year - for a hundred thousand years. But this year, something new is about to happen. The oldest prophecies are about to be fulfilled - and the Festival of Blessings is finally upon us.

Guide C: Reference Data contains the basic physical data and calculations which form the crucial part of

building services engineer background reference material. Expanded and updated throughout, the book contains sections on the properties of humid air, water and steam, on heat transfer, the flow of fluids in pipes and ducts, and fuels and combustion, ending with a comprehensive section on units, mathematical and miscellaneous data. There are extensive and easy-to-follow tables and graphs. -Essential reference tool for all professional building services engineers -Easy to follow tables and graphs make the data accessible for all professionals -Provides you with all the necessary data to make informed decisions

Journey through a small suburban town and view a special friendship through the eyes of a marble. If you've ever played with marbles, you know how beautiful they can be. There are several different types of marbles, big and small, different colors, alternate designs. And then, there is Aggie, a very special marble. This tale is told from an unusual perspective. Follow a story of adventure, friendship, caring, giving and sacrifice. But most of all, the book details a colorful journey that will enhance the imagination of young readers. This booklet also includes a brief description of the game of marbles. It details what materials are needed and how to set the game up for initial play. The rules of marbles are listed in an easy to understand format. So, why not play one of the oldest and most treasured games right now? This short picture book is targeted at younger children, but the game itself applies to all ages that are able to use marbles, although this may depend upon your own child's progress. The story was developed to learn about

friendship, giving, sharing, and acceptance by traveling through the virtual eyes of a marble. The sentences in this book are relatively easy to read, with photographs to help understand the story.

This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in

the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

IEC 61850-Based Smart Substations: Principles, Testing, Operation and Maintenance systematically presents principles, testing approaches, and the operation and maintenance technologies of such substations from the perspective of real-world application. The book consists of chapters that cover a review of IEC 61850 based smart substations, substation configuration technology, principles and testing technologies for the smart substation, process bus, substation level, time setting and synchronization, and cybersecurity. It gives detailed information on testing processes and approaches, operation and maintenance technologies, and insights gained through practical experience. As IEC 61850 based smart substations have played a significant role in smart grids, realizing information sharing and device interoperation, this book provides a timely resource on the topics at hand. Contributes to the overall understanding of standard IEC 61850, analyzing principles and features Introduces best practices derived from hundreds of smart substation engineering applications Summarizes current

research and insights gained from practical experience in the testing, operation and maintenance of smart substation projects in China Gives systematic and detailed information on testing technology Introduces novel technologies for next-generation substations

A history of the Korean War with soldier's-eye views from both sides, by the Pulitzer Prize-winning author of *The Rising Sun and Infamy*. Pulitzer

Prize-winning author John Toland reports on the Korean War in a revolutionary way in this thoroughly researched and riveting book. Toland pored over military archives and was the first person to gain access to previously undisclosed Chinese records, which allowed him to investigate Chairman Mao's direct involvement in the conflict. Toland

supplements his captivating history with in-depth interviews with more than two hundred American soldiers, as well as North Korean, South Korean, and Chinese combatants, plus dozens of poignant photographs, bringing those who fought to vivid life and honoring the memory of those lost. In *Mortal Combat* is comprehensive in its discussion of events deemed controversial, such as American brutality against Korean civilians and allegations of American use of biological warfare. Toland tells the dramatic account of the Korean War from start to finish, from the appalling experience of its POWs to Mao's prediction of MacArthur's Inchon invasion. Toland's

account of the “forgotten war” is a must-read for any history aficionado.

Ex-spy 'Belle Boyd' is retired - more or less. Retired from spying on the Confederacy anyway. Her short-lived marriage to a Union navy boy cast suspicion on those Southern loyalties, so her mid-forties found her unemployed, widowed and disgraced. Until her life-changing job offer from the staunchly Union Pinkerton Detective Agency. When she's required to assist Abraham Lincoln himself, she has to put any old loyalties firmly aside - for a man she spied against twenty years ago. Lincoln's friend Gideon Bardsley, colleague and ex-slave, is targeted for assassination after the young inventor made a breakthrough. Fiddlehead, Bardsley's calculating engine, has proved the world is facing an extraordinary threat. Meaning it's not the time for civil war. Now Bardsley and Fiddlehead are in great danger as forces conspire to keep this potentially unifying secret, the war moving and the money flowing. With spies from both camps gunning for her, can even the notorious Belle Boyd hold the war-hawks at bay?
