This monographic book designed by Anne Lacaton and Jean-Philippe Vassal, is published in conjunction with their exhibition at the Cité de l'architecture et du patrimoine. It gathers all the projects designed by their firm into thematic groups (beginnings, landscape, dreams, freedom, Inhabiting, transformation, enchanting and city) and weaves them into a story that challenges their proposals. Their approach, involving an in-depth reflection on the ethical dimension of architecture, is founded upon both the generosity of the dwelling and the pleasure of the dweller. In denying the obvious, they seek in its place what is essential and specific to each situation and context. Lacaton and Vassal propose architecture that allows us greater freedom.

Whether trophy or status symbol, comfort or escape books can have profound meaning in our lives. As a result, how we store them can take on significant importance. Book shelf Design examines the most creative storage solutions of recent years by an international cast of industrial and furniture designers. In some, the books are hidden or not immediately recognizable, in others they take center stage and even interact with the design to create the finished composition. The definition of bookshelf is greatly expanded to include, chairs, tables and even lamps that function as storage. There are myriads of ways to shelve a book, but chances are, you've never thought of these

For dreamers of escaping to a cozy cabin in the great outdoors, Your Cabin in the Woods is a classic work that not only makes this a reality, but also imparts a deeper appreciation of nature and homebuilding. Author Conrad E. Meinecke has been writing about living the simply life in the wilderness for over 70 years with Your Cabin in the Woods and Cabin Craft and Outdoor Living. For the first time, these books are combined into a deluxe two-color vintage package. In prose both practical and inspirational, Meinecke details how to turn your cabin dream into a reality, such as choosing land, using tools, and the basics of construction. He provides hand-drawn floor plans for a variety of cabins, from a simple two-room to a more complex long house; the best way to build fireplaces, both indoors and out; and instructions for basic furniture, lighting, and other touches that make a cabin feel like home. Throughout are Meinecke's thoughts on ways to enjoy your new-found space, from hearty fireplace recipes to the types of wood for a perfect fire and the beauty found in birdsong. Instructional as it may be, the book's enduring appeal owes in large part to its warmly engaging tone and firm belief in the restorative power of nature and the satisfaction of hard work. He writes, "Take full enjoyment in the building. Take time out to rest. Most city folks seem always to rush things through. Why? Lay off until tomorrow. Take an afternoon nap. Stop the clock for the weekend. Get off to an early start in the cool of tomorrow morning. You may be crowded in your work in town, but this should be your rest cure, your recreating."

Élf my present reader happens to be a Boy Scout or a scout-master who wants the scouts to build a tower for exhibition purposes, he can do so by following the directions here given, but if there is real necessity for haste in the erection of this tower, of course we cannot build one as tall as we might where we have more time. With a small tower all the joints may be quickly lashed together with strong, heavy twine, rope, or even wire; and in the wilderness it will probably be necessary to bind the joints with pliable roots, or cordage made of bark or withes; but as this is not a book on woodcraft we will suppose that the reader has secured the proper material for fastening the joints of the frame of this signal-tower and he must now shoulder his axe and go to the woods in order to secure the necessary timber. First let him cut eight straight poles—that is, as straight as he can find them. These poles should be about four and one half inches in diameter at their base and sixteen and one half feet long. After all the branches are trimmed off the poles, cut four more sticks each nine feet long and two and a half or three inches in diameter at the base; when these are trimmed into shape one will need twenty six or seven more stout sticks each four and one half feet long for braces and for flooring for the platform.

The Oxford Handbook of Maritime Archaeology is a comprehensive survey of the field at a time when maritime archaeology has established itself as a mature branch of archaeology. This volume draws on the expertise of nearly fifty international scholars who examine the many distinct and universal aspects of the discipline.

A superb visual reference to the principles of architecture Now including interactive CD-ROM! For more than thirty years, the beautifully illustrated Architecture: Form, Space, and Order has been the classic introduction to the basic vocabulary of architectural design. The updated Third Edition features expanded sections on circulation, light, views, and site context, along with new considerations of environmental factors, building codes, and contemporary examples of form, space, and order. This classic visual reference helps both students and practicing architects understand the basic vocabulary of architectural design by examining how form and space are ordered in the built environment. Using his trademark meticulous drawing, Professor Ching shows the relationship between fundamental elements of architecture through the ages and across cultural boundaries. By looking at these seminal ideas, Architecture: Form, Space, and Order encourages the reader to look critically at the built environment and promotes a more evocative understanding of architecture. In addition to updates to content and many of the illustrations, this new edition includes a companion CD-ROM that brings the book's architectural concepts to life through three-dimensional models and animations created by Professor Ching.

It is the best known book about American slavery, and was so incendiary upon its first publication in 1852 that it actually ignited the social flames that led to Civil War less than a decade later. What began as a series of sketches for the Cincinnati abolitionist newspaper *The National Era* scandalized the North, was banned in the South, and ultimately became the bestselling novel of the 19th century. Today, controversy over this melodramatic tale of the dignified slave Tom, the brutal plantation owner Simon Legree, and Stowe's other vividly drawn characters continues, as modern scholars debate the work's newly appreciated feminist undertones and others decry it as the source of enduring stereotypes about African Americans. As one of the most influential books in U.S. history, it deserves to be read by all students of literature and of the American story. American abolitionist and author HARRIET BEECHER STOWE (1811-1896) was born in Connecticut, daughter of a Congregationalist minister and sister to abolitionist theologian Henry Ward Beecher. She wrote more than two dozen books, both fiction and nonfiction.

This *Old House meets Wayne's World* in this zany guide to designing and building tiny homes Derek Diedricksen has always had a love for small, modest houses ever since his father gave him the book *Tiny Tiny Houses* by Lester Walker for his tenth birthday. Combining his artistic abilities, wild imagination, and his passion for small houses, he self-published *Humble Homes, Simple Shacks, Cozy Cottages, Ramshackle Retreats, Funky Forts, and Whatever the Heck Else we could Squeeze in Here* in 2009. This book is a collection of Diedricksen's creative/imaginative sketches for building small houses, shacks, cottages, and forts. The sketches are accompanied with hand-written commentary, both instructive and comical. Derek's main purpose is to get your creative juices flowing and encourage you to get off the couch and use your hands. Believing that specific building plans squash creativity, he avoids too many detailed instructions, giving you the chance to put your own creative spin on your very own small abode (even if it is just in your imagination).

Reprinted from rare 1912 catalog, this book presents 100 winning entries from a nationwide competition for brick bungalow designs. Superb renderings show houses in perspective, floor plans, some landscape planning — even a budget.

Part how-to, part personal memoir, *The Big Tiny* is an utterly seductive meditation on the benefits of slowing down, scaling back, and appreciating the truly important things in life. More than ten years ago, a near-death experience abruptly reminded sustainability advocate and pioneer Dee Williams that life is short. So, she sold her sprawling home and built an eighty-four-square-foot house—on her own, from the ground up. Today, Williams can list everything she owns on one sheet of paper, her monthly housekeeping bills amount to about eight dollars, and it takes her about ten minutes to clean the entire house. Adapting a new lifestyle left her with the ultimate luxury—more time to spend with friends and family—and gave her the freedom to head out for adventure at a moment's notice, or watch the clouds and sunset while drinking a beer on her (yes, tiny) front porch.

Prepared by Structures Publishing Company in cooperation with Home Planners, inc. Includes index.

Modern Cabin turns a true icon on its head-radically redefining what a cabin can be. For those who've always wanted a woodsy retreat but want to create a softer environment footprint, Michelle Kodis has gathered twenty-two examples of mountain retreats that push the envelope of cabin architecture and lead the way for the cabin of the future. Architects are creating structures that showcase inspiring and innovative construction methods and materials-including prefab components, environmentally responsible and energy-efficient building techniques, and even "smart" house technology. For almost ten thousand years, unbaked earth has been used to build remarkable structures, from simple dwellings to palaces, temples, and fortresses both grand and durable. Jean Dethier spent fifty years researching this landmark global survey, which spans five continents and 250 sites. *The Art of Earth Architecture* demonstrates the wide-ranging applications and sustainability of this building material, while presenting a manifesto for its ecological significance.

Featuring raw-earth masterpieces, monumental structures, and little known works, the book includes the temples and palaces of Mesopotamia, the Great Wall of China, large-scale urban developments in Tenochtitlan in Mexico, the medinas of Morocco, and housing in Marrakech and Bogota. This definitive reference features many UNESCO World Heritage sites and contains essays on the historical, technical, and cultural aspects of raw-earth construction from twenty experts in the field, as well as hundreds of photographs, illustrations, and architectural drawings.

Prefab home construction has arrived. The benefits of buildings a prefab home (they are better built, use resources more efficiently, and are healthier to live in) apply just as well to vacation homes as they do to primary residences. Prefabulous Small Houses explores the beauty, variety, design, and environmentally positive benefits of prefab construction through the wide variety of prefabrication methods in use today and with prefabulous examples from across the country. The houses range in size from 400 sq. ft. to 2,000 sq. ft. and are built with modular, SIPs, panelized, log home packages, kit packages, and hybrid systems. Building with prefab usually means spending less for a better quality home. And it also means building greener; all the houses featured are highly energy efficient and sustainable.

Rural escapes for those yearning for a simpler existence, by the creators of the wildly popular Instagram account Cabin Porn. Created by a group of friends who preserve 55 acres of hidden forest in Upstate New York, Cabin Porn began as a scrapbook to collect inspiration for their building projects. As the collection grew, the site attracted a following, which is now a huge and obsessive audience. The site features photos of the most remarkable handmade homes in the backcountry of America and all over the world. It has had over 10 million unique visitors, with 450,000 followers on Instagram. Now Zach Klein, the creator of the site (and a co-founder of Vimeo) goes further into the most alluring images from the site and new getaways, including more interior photography and how-to advice for setting up a quiet place somewhere. With their idyllic settings, unique architecture, and cozy interiors, the Cabin Porn photographs are an invitation to slow down, take a deep breath, and feel the beauty and serenity that nature and simple construction can create.

Provides guidance to historic building owners and building managers, preservation consultants, architects, contractors, and project reviewers prior to treatment of historic buildings.
