Discusses how to plan a staff ride of a battlefield, such as a Civil War battlefield, as part of military training. This brochure demonstrates how a staff ride can be made available to military leaders throughout the Army, not just those in the formal education system.

John F. Kennedy once said, "ask not what country can do for you, ask what you can do for your country" and this quote directly and clearly reflects our Indian Army. Serving the nation is everybody's dream but having a brave heart is not one everyone's cup of tea only passionate people inculcate this. The Indian Army is an excellent source skilled manpower. Every year lakhs of young aspirants enroll to its different wings to its different examinations so, Indian army soldiers (Technical) MER Examination is one of them. This examination held four times a year. Indian Army Technical Written Examination consists of 2 papers – Paper I: that checks Intelligence Quotient (IQ), Numeral Ability and General Knowledge and Paper II: That checks technical portion of the candidates i.e. physics, chemistry and mathematics. This book is prepared according to the level of the examination so that candidates can assure after preparing from it. TABLE OF CONTENT Mathematics, Physics, Chemistry, General Knowledge, Current affairs, Practice Sets (1-3).

This book is a compilation of articles which suggest reforms in various fields. However, the main idea of the book is to highlight the importance of original and creative thinking. Normal training is important but no wars or even battles are won by just following the laid down procedures. Creative thinking is a must, for the Armed Forces. The other aspect, neglected in our Army, is 'logistics'. The Army Service Corps (ASC) in our Army provides all the transportation in 'forward' areas. It also provides all the 'combat supplies' in the field (i.e. rations, fuels, oils and lubricants, and ammunition). It, thus, deals with the entire range of 'Operational Logistics'. It is for this reason that a complete section of this book is focused on the ASC. Besides these, there are other cases which could have serious implications during war time. For example, in forming organisations, the principle of accountability to go with authority has been violated in the reorganised second-line ASC. The ASC is responsible for providing maximum vehicles on the road but have no control on second-line repairs. Similarly, peculiarities of petroleum products are not fully understood and so on. All these have serious implications and thus have been included in this book. "Report of the Dominion fishery commission on the fisheries of the province of Ontario, 1893", issued as vol. 26, no. 7, supplement.

Since the 1860s hundreds of thousands of school-aged Australians have undergone military and youth development training in various army cadet schemes. Given the proportion of eligible youth this represents, the movement has surely exerted a tangible and lasting influence upon Australian society, yet its record is small, scattered and insufficient. Specifically lacking is any attempt to tell the cadet story across both time and space in a single narrative. This book closes the gap by presenting a general history of the army cadet movement in Australia from 1866 to 2006.

Simplifying All The Steps: • Screening Test • Psychological Test • Group Testing • Interview • Conference Procedure With Dynamic Topics: • Service-related Information • Geopolitics •

National Issues In this new and updated edition the author takes the candidates through the various stages of the SSB test. He lists out the different phases of the tests that are conducted in exact sequential order with his vast experience in this field. The content in this new edition has been divided into two parts and nine sections. The first part addresses the screening tests, which includes verbal, non-verbal, picture perception and discussion tests followed by psychological tests, group testing, interview techniques and conference procedure. The second part covers service-related information, geopolitics and national issues. This book included Comprehensive Study Material with Solved Question-Answers and Model Test Paper (Solved). Detailed Answers have also been provided for the questions for Better Understanding of the Candidates

For 35,000 years ancient Afghanistan was called Aryana (the Light of God) has existed. Then in 747 AD what is today called Afghanistan became Khorasan (which means Sunrise in Dari) which was a much larger geographical area. In the middle of the nineteenth century the name Afghanistan, which means home of the united tribes, was applied originally by the Saxons (present day British) and the Russians. During the Great Games in the middle of nineteenth century, the Durand Line was created in 1893 and was in place until 1993. Saxons created the state of Afghanistan out of a geographical area roughly the size of Texas: in 1893 before which there were 10 million square kilometers, larger than the size of Canada, as means to act as a buffer zone between the Saxon-India & Tsarist-Russia and the Chinese.

To win on today's complex and competitive battlefield our military leaders have had to try to shed decades of organizational culture that emphasized control and stability as the solution to solving problem sets. Instead, today's leaders must be adaptive and agile in their analysis and development of innovative solutions to the complex challenges of the 21st century. Today's security environment requires men and women in uniform to think critically and be creative in developing new strategies and solutions. These skills will allow our military leaders to maintain the operational initiative against an enemy who is by nature adaptive and always evolving to overcome the tremendous advantage in technological and material overmatch of the United States and many of its allies. This paper argues that the U.S. Army should continue its bold initiatives in its current Campaign of Learning and go even further. It should develop creative leaders who can exercise adaptive leadership with the capacity to provide learning environments within their organizations. Included in the paper is an analysis of adaptive challenges facing the Army. Specifically, the Army espouses the need for decentralized operations and operational adaptability, but the author argues that the Army culture is driven by control, stability, and risk aversion. A case study provides a means for analyzing the complexity of organizational leadership in the contemporary security environment. The study presents a high-stakes problem set requiring an operational adaptation by a cavalry squadron in Baghdad, Iraq. This problematic reality triggers the struggle in finding a creative solution, as cultural norms serve as barriers against overturning accepted solutions that have proven successful in the past, even if they do not fit today's reality. The case highlights leaders who are constrained by assumptions and therefore suffer the consequences of failing to adapt quickly to a changed environment. Emphasizing the importance of reflection and a willingness to experiment and assume risk, the case study transitions to an example of a successful application of adaptive leadership and adaptive work performed by the organization. The case study serves as a microcosm of the challenges facing the U.S. Army. The corresponding leadership framework presented can be used as a model for the Army as it attempts to move forward in its efforts to make adaptation an institutional imperative (Chapters 1 and 2). The paper presents a holistic approach to leadership, whereby the leader transcends being simply an authority figure and becomes instead a real leader who provides a safe and creative learning environment for the organization to tackle and solve adaptive challenges (Chapter 3). The paper concludes with a recommendation that Army leaders apply Harvard Professor Dean Williams's theory of leadership to the challenges confronting the Army's leader development process so as to improve its efforts to grow adaptive leaders (Chapter 4).

Army Cadet College (ACC) is a wing of Indian Military Academy responsible for providing three years of an intense training to the Indian Soldiers to transform them into Officer for Indian Army. Conducting the Indian Army Entrance Exam twice in a year, it selects candidates from serving soldiers of Indian Army, Navy and Air Force through a selection process which undergoes three phases of tests namely Written Phase, SSB Interview and Medical Test. The first gate of entry i.e., Written Test consists of four papers revolving around the topics like General Mental Ability, Current General Awareness, Interactive Communicative English and Academic Contest Test respectively. The new edition of Indian Army ACC Entrance Exam is a Complete Study Package for aspirants preparing for the forthcoming exam. It covers the Chapterwise Theory of the entire subjects along with more than 3500 Multiple Choice Questions to give a focused conceptual understanding to the aspirants. Model Papers have also been given for the self- assessment. Structured as per latest syllabus and exam pattern, it will support aspirants greatly with its ample amount of study material. Table of Contents Model Papers Paper I General Mental Ability Test: Reasoning Ability, Numerical Ability. Paper II Current General Awareness: India and World. Paper III Interactive Communicative English: Objective English, Descriptive English Paper IV Academic Contest Test: Mathematics, General Science (Physics, Chemistry, Biology), Humanities

Given in memory of Gene Brossmann by George Richardson.
