Aim for your best grade with this guide written specifically for the 2012 linear GCSE Geography for Edexcel A Specification. This guide will help you revise effectively in the way you want to, allowing you to plan and pace your revision according to your learning needs, and to adapt and personalise with your own notes. Written by an experienced author, teacher and examiner, you can be confident that this guide will cover the facts and ideas you will be expected to recall and be able to use in the exam. It accompanies the fourth edition of Tomorrow's Geography for Edexcel GCSE Specification A Student's Book. - Understand what is required in the exam with exam tips and guidance - Improve your examination skills with exam practice questions and model answers online - Check your understanding of the content and key terms with engaging activities and explanations of key concepts - Plan and pace your revision with My Revision Planner

Maximise every student's grade potential with a step-by-step approach to learning, improving and applying the geographical and fieldwork skills they need to achieve stand-out success under the reformed Edexcel A and B GCSE Geography specifications. - Provides a complete,

tailor-made solution to teaching the cartographic, graphical, numerical and statistical skills emphasised in the 2016 Edexcel A and B GCSE geography specifications - Helps you prepare students for the changed fieldwork assessments and new question formats with a dedicated section on geographical enquiries - Supports students of varying abilities by moving from clear explanations of each skill to easy-to-follow guidance on applying the skills in an examination context - Offers plenty of opportunities to put newly-acquired skills into practice through a range of activities for all learners, as well as extension tasks designed for students targeting the top grades - Boosts students' confidence tackling terminal assessment with skills-focused exam-style questions and insider tips on common question types and topics - Cuts down your marking time and enables students to monitor their own progress by including answers for every activity and exam-style question

Designed to help GCSE Students learn and apply the fieldwork skills they need to produce excellent fieldwork enquiry projects. All Geography GCSE students following AQA, Edexcel and OCR specifications are formally examined on their fieldwork enquiry activities. These awarding bodies' five specifications include fieldwork-based questions in one of their three examinations. There are some variations in the specifications' examination arrangements, but this book is generic in approach so as to cater for all Geography students - irrespective of which GCSE specification is selected by their particular schools. Geography fieldwork can - and should - be a positive and enjoyable experience! Most schools recognise this and include some form of practical outdoor work in the years prior to their examination course. Apart from the enjoyment aspect of this activity, setting aside time for enquiry research and follow-up work during Key Stage 3 is seen as crucial to making students feel secure and confident when undertaking this type of activity at GCSE level. The old adage "Practice makes perfect" most certainly applies in this instance! It is essential that sufficient time is provided to allow students to complete all the recommended stages of the enquiry write-up as fully as possible. This book covers every aspect of conducting and completing a GCSE Geography fieldwork enquiry. It assumes that every student will benefit from its two skills toolkits; these assume no prior knowledge of data presentation and evaluation methods which are most likely to feature in both human and physical Geography-based fieldwork enquiries. The methods selected for the Basic Skills Toolkit are considered so important that a set of practice exercises has been provided for them. An answers section later in the book gives users an opportunity for self-assessment and hence the means to assess whether further skills practice is required.

Cramming all new-case studies, new geographic data and reams of new questions, this new Pearson Edexcel A-level Geography student book will capture imaginations as it travels around the globe. This new book will help your students develop the geographical skills and knowledge they need to succeed. It has been written by our expert author team and structured to provide support for learners of all abilities. The book includes:

- Activities and regular review questions to reinforce geographical knowledge and build up core geographical skills
- Clear explanations to help students to grapple with tricky geographical concepts and grasp links between topics
- Case studies from around the world to vividly demonstrate geographical theory in action
- Exciting fieldwork projects that meet the fieldwork and investigation requirements

This student book is supported by digital resources on our new digital platform Boost, providing a seamless online and offline teaching experience.

Cambridge IGCSE and O Level Geography has been written specifically for Cambridge International syllabuses 0460 and 2217. Filled with sources, graphs and case studies, the coursebook requires students to examine a range of information, helping to build their analytical skills. Written by highly experienced authors and Cambridge trainers, this coursebook is updated to support both Cambridge IGCSE and O Level students. It includes clear and practical support, case studies from 25 different countries, fieldwork ideas and a range of interesting content. The accompanying CD-ROM contains support sheets for the topics covered, outline maps and sample exam-style questions. Answers to the

activities are in the teacher's resource.

A new series of full-coverage resources developed for the AQA 2016 A/AS Level Geography specification. This full-colour Student Book covers all core and optional units for the AQA AS and A Level Geography specification for first teaching from September 2016. Students are encouraged to develop links between physical and human topics, understand systems, processes, and acquire geographical skills. Helping to bridge the gap from GCSE to A Level, it also provides support for fieldwork skills and for the geographical investigation at A Level. A 'Maths for geographers' feature helps students develop and apply their mathematical and statistical skills, and a range of assessment-style questions support students in developing their exam skills.

This textbook has been written to meet the needs of AS students following the Edexcel specification. It provides coverage of both units, including all options, matching the structure of the course. All the compulsory case studies in Unit 1 are covered and guidance is offered on fieldwork and research for Unit 2.

Learning to Teach Geography in the Secondary School provides intending and practising teachers of geography with the practical skills to design, teach and evaluate varied and exciting lessons. It also helps them to acquire a deeper understanding of geography's role, purpose and potential in secondary education. The book explores how teachers may use geography as a vehicle for preparing pupils for uncertain environmental, cultural, social and economic futures.

Exam Board: Edexcel Level: AS/A-level Subject: Geography First Teaching: September 2016 First Exam: June 2017 Endorsed for Edexcel Trust the leading A level Geography publisher to boost your students' geographical knowledge and skills with a fully updated edition of our bestselling Student's Book; designed to provide the in-depth subject coverage, developmental activities and exam support you need at a time of curriculum change. - Helps students acquire, apply and revise core knowledge using clear explanations of key geographical content and concepts - Progressively builds the geographical and data skills emphasised in the 2016 specification by offering plenty of opportunities to learn and practise relevant skills for each topic - Brings geographical theory to life with a bank of engaging, up-to-date case studies, examples and place contexts - Consolidates topic knowledge and enables students to track their learning with review questions at the end of each chapter - Prepares students for the demands of AS and A level examinations by including numerous exam-style questions, ideal for skills development and rolling revision throughout the course - Makes it easier for you to meet the increased fieldwork requirements, suggesting topic-focused enquiries for both physical and human geography

A student-friendly and engaging resource for the 2016 Edexcel GCSE Geography B specification, this brand new course is written to match the demands of the specification. As well as providing thorough and rigorous coverage of the spec, this book is designed to engage students in their learning and to motivate them to progress.

Debates in Geography Education encourages early career teachers, experienced teachers and teacher educators to engage with and reflect on key issues, concepts and debates. It aims to enable readers to reach their own informed judgements with deeper theoretical knowledge and understanding. The second edition is fully updated in light of the latest research, policy and practice in

the field, as well as key changes to the curriculum and examination specifications. Expert contributors provide a range of perspectives on international, historical and policy contexts in order to deepen our understanding of significant debates in geography education. Key debates include: geography's identity as an academic discipline; what constitutes knowledge in geography; places and regional geography; what it means to think geographically; constructing the curriculum; how we link assessment to making progress in geography; the contribution of fieldwork and outdoor experiences; technology and the use of Geographical Information; school geography and employability; understanding the gap between school and university geography; evidence-based practice and research in geography education. The comprehensive, rigorous coverage of these key issues, together with carefully annotated selected further reading, will help support and shape further research and writing. Debates in Geography Education is a key resource that is essential reading for all teachers and researchers who wish to extend their grasp of the place of geography in education. Mark Jones is Senior Lecturer in Education at the University of the West of England, Bristol, UK David Lambert is Professor of Geography Education at UCL Institute of Education, London, UK

Additional written evidence is contained in Volume 3, available on the Committee website at www.parliament.uk/science

Geographers regard fieldwork as a vital instrument for understanding our world through direct experience, for gathering basic data about this world, and as a fundamental method for enacting geographical education. The range of international geography and educational experts who contributed to this volume has demonstrated that the concept of fieldwork has a considerable history in the field of geography. They have demonstrated that the theoretical aspects of fieldwork have been interpreted differently in regions around the world, but the importance of fieldwork remains strong globally. A fresh look at the pedagogic implications for fieldwork in formal education offers ideas both for promoting it in geographical education and for maintaining its place in the geography curriculum. Audience: Forward-looking geographers and educators now recognise that alternative strategies, especially those involving the use of information technology, should be developed to reaffirm the centrality of fieldwork in geographical and wider education.

A key resource for the IGCSE Geography specification, written by leading and experienced Geography teachers and authors. This book has been carefully prepared to cover the full curriculum for the University of Cambridge International Examinations IGCSE course in Geography. It is accompanied by a CD-ROM offering invaluable study and revision support.
