Jump-start language and learning skills with this simple and elegant guide to using sign language to communicate with your preverbal baby. Imagine averting a tantrum because your baby was able to communicate her desire for a favorite toy without tears, or simply sharing in your baby's wonderment at the sight of a bird on a tree-before he has even uttered his first word! Generally, children do not develop the motor skills necessary to speak until they are two, and yet they are able to communicate using sign language as early as six months. Written by an experienced signer and a mother of three, this illustrated step-by-step guide will allow readers to join the ranks of parents around the world who experience the rich rewards of communicating with their preverbal babies by using sign language. Studies have shown that babies who are taught to use signs to express themselves before they can actually speak are more contented because they can communicate their basic needs (and ideas!) and also are more skilled at speaking once they begin to acquire language. Full of practical tips, real anecdotes, and straightforward diagrams of more than sixty basic American Sign Language signs, *Baby Talk* is the essential baby-signing handbook for parents, relatives, and caregivers-and their babies, who are just a little too young to express themselves verbally.

Regardless of whether you have never had an older dog before or you're a seasoned professional, this book will provide you with a helpful, go-to guide for all senior dog care information that your dog might need in their older years. With recent advances in veterinary medicine, dogs now live much longer lives, meaning that a larger proportion of your dog's life will be spent in its senior years. Older dogs need much different care to younger dogs, and are more prone to developing age-related health ailments. With this book, you will learn all about senior dog care, grooming, nutrition, exercise, health problems, the aging process, and when it's time to say goodbye, so you can give your old friend the best loving care in his twilight years. Old Dog Love has been compiled and written by veterinarian and author, Dr Jo de Klerk, who has a special interest in pain management. As a result, a large proportion of her clinical cases are aging dogs. She brings her experience into this book, giving plenty of tips and recommendations to improve your dog's quality of life and turn back the clock on your dog's age. You and your dog are a lot alike. By several behavioral measures, your dog's mental abilities are equivalent to those of a two to three and a half-year-old toddler. Dogs can learn up to 250 words, count from one to five and understand basic arithmetic. Your dog can imitate and understand your behavior and has a sense of fairness. Doesn't it make sense to treat these sensitive, intelligent creatures a bit more like children? Kids—and dogs—raised with kindness and respect grow up happy. And happy is good. Modern Dog Parenting will show readers that yes, you can love your dog and live with him, too. Dogs (and the people who love them) are tired of the school of dominant, top-dog training. They are looking for a new kind of pack leader: someone funny, enthusiastic, intuitive, approachable, and, above all, effective. And they've found her. Sarah Hodgson rejects dominance-based training and gets astonishing results with a blend of wit, compassion, energy, and proven skills. She communicates instructions clearly, directs behavior compassionately, and rewards success lavishly. Topics include:
