Parental alienation arising from disputed hearings in family-court is a devastating problem affecting millions of families around the world. Much as we addressed domestic violence several decades ago, we treat parental alienation as a domestic issue rather than what it is; a crisis affecting communities, school systems, police and court systems, mental-health and financial institutions, and crucially, legislative bodies. Our social, cultural and legal systems sanction and even promote parental alienation at the expense of our children's wellbeing by rewarding lawyers for increasing parental animosity. Malicious Mother syndrome is now a recognized condition, causing child abuse, often at a developmental stage that will leave a lifelong mark on the child of a disputed family-law judgment. This calamitous situation grows progressively worse while legislation exists to encourage and incentivize members of family-law to profit from the easy money family-court offers avaricious, amoral members of family-law to litigate. Undoubtedly financially motivated litigation is never in the child's best interests and always benefits the family-law members, yet no checks and boundaries exist to prevent the abuse of children by inappropriately qualified 'judges' being played by greed motivated lawyers, almost always reflecting gender prejudice in the process.

In this groundbreaking union of art and science, rocker-turned-neuroscientist Daniel J. Levitin explores the connection between music—its performance, its composition, how we listen to it, why we enjoy it—and the human brain. Taking on prominent thinkers who argue that music is nothing more than an evolutionary accident, Levitin poses that music is

fundamental to our species, perhaps even more so than language. Drawing on the latest research and on musical examples ranging from Mozart to Duke Ellington to Van Halen, he reveals: • How composers produce some of the most pleasurable effects of listening to music by exploiting the way our brains make sense of the world • Why we are so emotionally attached to the music we listened to as teenagers, whether it was Fleetwood Mac, U2, or Dr. Dre • That practice, rather than talent, is the driving force behind musical expertise • How those insidious little jingles (called earworms) get stuck in our head A Los Angeles Times Book Award finalist, *This Is Your Brain on Music* will attract readers of Oliver Sacks and David Byrne, as it is an unprecedented, eye-opening investigation into an obsession at the heart of human nature.

Soon, Creeper, Oya, and the crew of the *Midnight Robber* are pulled into a perilous mission aimed to stop the *Black God's Drums* from being unleashed and wiping out the entirety of New Orleans. THE GIRL IN THE BACK: A FEMALE DRUMMER'S LIFE WITH BOWIE BLONDIE AND THE '70S ROCK SC

Marshall McLuhan was dubbed a media guru when he came to prominence in the 1960s. The Woodstock generation found him cool; their

parents found him perplexing. By 1963, McLuhan was Director of the Centre for Culture and Technology at the University of Toronto and would be a public intellectual on the international stage for more than a decade, then linked forever to his two best known coinages: the global village and the medium is the message. Taken as a whole, McLuhan's writings reveal a profound coherence and illuminate his unifying vision for the study of language, literature, and culture, grounded in the broad understanding of any medium or technology as an extension of the human body. McLuhan: A Guide for the Perplexed is a close reading of all of his work with a focus on tracing the systematic development of his thought. The overriding objective is to clarify all of McLuhan's thinking, to consolidate it in a fashion which prevents misreading, and to open the way to advancing his own program: ensuring that the world does not sleepwalk into the twenty-first century with nineteenth-century perceptions.

This book was written with the novice percussionist in mind. No previous musical experience is required to constructively make your way through this self-instruction course. From the Fairlight CMI through MIDI to the digital audio workstations at the turn of the millennium, Modern Records, Maverick Methods examines a critical period in commercial popular music record production: the transformative digital age from the late 1970s until 2000. The book traces the development of significant music technologies through the 1980s and 1990s, revealing how changing attitudes and innovative techniques of recording personnel reimagined recording processes and, finally, exemplifies the impact of these technologies and techniques via six comprehensive tech-processual analyses. This meticulously researched and timely book reveals the complexity of recordists' responses to a technological landscape in flux.

White Read Aloud honor artist Matthew Forsythe comes a picture book about a magical drum, an emerald forest, and the little frog who dares to make her own music. The biggest mistake Pokko's parents ever made was giving her the drum. When Pokko takes the drum deep into the forest it is so quiet, so very quiet that Pokko decides to play. And before she knows it she is joined by a band of animals —first the raccoon, then the rabbit, then the wolf—and soon the entire forest is following her. Will Pokko hear her father's voice when he calls her home? Pokko and the Drum is a story about art, persistence, and a family of frogs living in a mushroom. A fun method that teaches how to play rhythms and songs on a variety of drums and sound sources, including many simple, inexpensive objects found around the home. "We were living through the realities of war and bringing the war onto the stage... Everybody hated us, man" Alan Vega Born out of the city's vibrant artistic underground as a counter-cultural performance art statement, opposing the war by mirroring its turmoil, Suicide became the most terrifyingly iconoclastic band in history, and also one of the most influential. By the time the punk scene they're usually associated with came out of CBGBs in the mid-seventies, Suicide had already been causing havoc in New York's clubs for several years. Working closely with the author, Rev and Vega explain the influences and events which led to the birth of Suicide and their early struggles. They invoke another world and era, peppered with smoky jazz clubs, Iggy Pop in his new-born Stooge persona and even suffer an attack from beat guru Allen Ginsberg. Along with interviewing major figures in the Suicide story, the author reaches back into 40 years chronicling and interviewing major players in New York's musical history, including

Blondie, Jayne County, James Chance and the New York Dolls. While the city changes around them, it all adds up to the definitive account of the lives and times of this unique duo.

(Book). Foreword by Neil Peart. Talent, energy, dedication, discipline, passion, innovation, education, drive, mind, body, spirit, vision, honor, truth, and drums make the man: Kenny Aronoff. Voted by Rolling Stone magazine as one of the greatest drummers of all time, Aronoff is arguably the most sought-after recording and touring beat master ever. Ignited by the Beatles' appearance on The Ed Sullivan Show in 1964, Aronoff's passion for drumming fervently grew and carried him from the kit in his childhood living room in the Berkshires to Bernstein at Tanglewood to Mellencamp, Etheridge, Fogerty, Smashing Pumpkins, the Rolling Stones, the Beatles his heroes and beyond. But none of this would have been possible without his fierce work ethic and unique approach to drumming an integration of all parts of his being, along with meticulous attention to note-for-note detail, feel, and what the song needs. Both a leader and a team player in the mission to realize a greater good an unforgettable recording, a riveting show Aronoff brings it every time. Through any setbacks heartaches, failures, injuries, or plain fatigue from the rigors of the biz Aronoff has stayed the arduous and wild rock 'n' roll course. His tale of what is possible with unrelenting dedication to one's bliss is an inspiration to all. Sex, Drums, Rock 'n' Roll! details Aronoff's youth in the Berkshires and the Midwest, from his early inspirations to his serious classical and jazz study, which gave him the foundation to be able to play anything. The failure of a first rock band in his early twenties had a silver lining: it freed him up for an audition that would change his life John Mellencamp. His work with Mellencamp catapulted Aronoff to the top of the charts with such hits as "Hurt So Good," "Little Pink Houses," and "Jack and Diane" and paved the way for session and recording work with droves of remarkable artists: Melissa Etheridge, John Fogerty, Bon Jovi, Stevie Nicks, Smashing Pumpkins, the BoDeans, Paul Westerberg, Celine Dion, Iggy Pop, Elton John, Bob Dylan, Alice Cooper, Brian Wilson, Meat Loaf, Joe Cocker, and countless others. In addition to his work as a world-famous recording and touring drummer, Aronoff finds time to be a dedicated teacher and has shared his expertise with students all over the world, teaching clinics for Tama and Zildjian. Heading into his fourth decade of rocking hard, Aronoff shows no signs of slowing down. Featuring rare photos, testimonials from major artists and from those who know him best, a chronology of live performances, a discography, and a foreword by Neil Peart, this book is the story of one of the greatest musicians of all time.
