In April 2005, the Accounting Standards Board issued new accounting standards dealing with the recognition, measurement and disclosure of financial instruments, hedges and comprehensive income, together with many consequential amendments throughout the CICA Handbook - Accounting. These new standards are effective for interim and annual financial statements relating to fiscal years beginning on or after October 1, 2006. Earlier adoption is permitted only as of the beginning of a fiscal year ending on or after December 31, 2004.

This textbook, originally by D. Annand and H. Dauderis, was intended for a first course in introductory financial accounting. It focuses on core introductory financial accounting topics that match pre-requisite requirements for students advancing to Intermediate Financial Accounting. A corporate approach is utilized versus beginning with a sole proprietorship emphasis and then converting to a corporate approach; this consistency throughout the book reduces confusion for the introductory student. This most recent revision by D. Marchand converted the text from IFRS to reflect the Generally Accepted Accounting Principles of the United States (U.S. GAAP).

Differentiated instruction is a nice idea, but what happens when it comes to assessing and grading students? What's both fair and leads to real student learning? Fair Isn't Always Equal answers that question and much more. Rick Wormeli offers the latest research and common sense thinking that teachers and administrators seek when it comes to assessment and grading in differentiated classes. Filled with real examples and “gray” areas that middle and high school educators will easily recognize, Rick tackles important and sometimes controversial assessment and grading issues constructively. The book covers high-level concepts, ranging from “rationale for differentiating assessment and grading” to “understanding mastery” as well as the nitty-gritty details of grading and assessment, such as: whether to incorporate effort, attendance, and behavior into academic grades; whether to grade homework; setting up grade books and report cards to reflect differentiated practices; principles of successful assessment; how to create useful and fair test questions, including how to grade such prompts efficiently; whether to allow students to re-do assessments for full credit. This thorough and practical guide also includes a special section for teacher leaders that explores ways to support colleagues as they move toward successful assessment and grading practices for differentiated classrooms.

Principles of Accounting is designed to meet the scope and sequence requirements of a two-semester accounting course that covers the fundamentals of financial and managerial accounting. This book is specifically designed to appeal to both accounting and non-accounting majors, exposing students to the core concepts of accounting in familiar ways to build a strong foundation that can be applied across business fields. Each chapter opens with a relatable real-life scenario for today's college student.

Thoughtfully designed examples are presented throughout each chapter, allowing students to build on emerging accounting knowledge. Concepts are further reinforced through applicable connections to more detailed business processes. Students are immersed in the "why" as well as the "how" aspects of accounting in order to reinforce concepts and promote comprehension over rote memorization.
