In this insightful book, you'll learn from the best data practitioners in the field just how wide-ranging -- and beautiful -- working with data can be. Join 39 contributors as they explain how they developed simple and elegant solutions on projects ranging from the Mars lander to a Radiohead video. With Beautiful Data, you will: Explore the opportunities and challenges involved in working with the vast number of datasets made available by the Web Learn how to visualize trends in urban crime, using maps and data mashups Discover the challenges of designing a data processing system that works within the constraints of space travel Learn how crowdsourcing and transparency have combined to advance the state of drug research Understand how new data can automatically trigger alerts when it matches or overlaps pre-existing data Learn about the massive infrastructure required to create, capture, and process DNA data That's only a small sample of what you'll find in Beautiful Data. For anyone who handles data, this is a truly fascinating book. Contributors include: Nathan Yau Jonathan Follett and Matt Holm J.M. This book provides the latest information about the research being conducted and established solutions available in the field of thermal spray coatings for various engineering applications. The readers of this book will be mainly the graduates, engineers and researchers who are pursuing their carrier in the field of thermal spraying. This book will cover the studies and research works of reputed scientists and engineers who have developed thermal spray coatings for thermal protection, bio-implants, renewal energy, wear and corrosion in hydraulic turbines and jet engines, hydrophobic surfaces etc. Hence, the book serves as a valuable resource of latest advancement in thermal spray technology and consolidated references for aspirants and professionals of surface engineering community. The book covers following topics for different industrial applications:

Introduction: Historical developments, Science and Engineering aspects of thermal spray coating technology and different thermal spray coatings techniques and its comparison with other fabrication processes. Recent advancements and

applications of thermal spray coatings Cold spray technology for additive manufacturing. High-temperature corrosion and erosion resistant coatings and thermal barrier coatings for power plants, automotive sector, and jet engines. Erosion and corrosion-resistant coatings for hydro-power plants, offshore, chemical and oil industries. Bio-coatings for human body implants. Thermal spray coating for super-hydrophobic surface. 3. Case study of boiler tubes failure and prevention by thermal spray coatings.

In this book, meshes and networks formed out of multiwalled carbon nanotubes are investigated and analyzed, including their use in niche applications such as electro-optic devices, advanced mechanical, thermal and electrical property enhancement, and gene editing. Different properties of multi-walled carbon nanotubes, including random network formation, ordering the meshes and networks by mechanical agitation and application of an external field, using crystallization and cross-linking induced phase separation in homopolymers-CNT composites are discussed with theoretical analysis. The book is aimed at researchers and graduate students in Electrical Engineering; Materials Science and Engineering; Chemical Engineering and Nanotechnology, Electronic circuit design, manufacturing, and characterization.

After falling out of Farmer's truck, Chicken must find his own way home in this

goofy, laugh-out-loud story about overcoming obstacles and believing in yourself. It has not been a good day for Chicken. He went to the fair with Farmer, but didn't win even one ribbon. And on the way home, the road is so bumpy that Farmer's truck knocks Chicken right out! He's been left behind! It's the end for Chicken. Surely, he can't walk all the way home. Or avoid the hungry fox along the way. Or maybe...he can? This rollicking picture book will have little ones in giggles over Chicken's misadventures and chiming in on the plucky fowl's mantra "I am a strong and powerful and nice-looking chicken!" as he achieves more than he thought possible.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public."

What is the relationship of gender to the micropolitics of school reform? This book explores this timely research question, revealing the everyday struggles that happen between different factions of teachers with different definitions of what school means for students. The focus of this struggle, however, may not be on education, but rather on such underlying issues as gender. Using case studies, the author shows how gender politics can be used by teachers to delay reform.

A collection of best practices and effective implementation recommendations that are proven to work, *Secure, Resilient, and Agile Software Development* leaves the boring details of software security theory out of the discussion as much as possible to concentrate on practical applied software security for practical people. Written to aid your career as well as your organization, the book shows how to gain skills in secure and resilient software development and related tasks. The book explains how to integrate these development skills into your daily duties, thereby increasing your professional value to your company, your management, your community, and your industry. *Secure, Resilient, and Agile Software Development* was written for the following professionals: AppSec architects and program managers in information security organizations Enterprise architecture

teams with application development focus Scrum teams DevOps teams Product owners and their managers Project managers Application security auditors With a detailed look at Agile and Scrum software development methodologies, this book explains how security controls need to change in light of an entirely new paradigm on how software is developed. It focuses on ways to educate everyone who has a hand in any software development project with appropriate and practical skills to Build Security In. After covering foundational and fundamental principles for secure application design, this book dives into concepts, techniques, and design goals to meet well-understood acceptance criteria on features an application must implement. It also explains how the design sprint is adapted for proper consideration of security as well as defensive programming techniques. The book concludes with a look at white box application analysis and sprint-based activities to improve the security and quality of software under development.

The cognitive science of religion is a relatively new academic field in the study of the origins and causes of religious belief and behaviour. The focal point of empirical research is the role of basic human cognitive functions in the formation and transmission of religious beliefs. However, many theologians and religious scholars are concerned that this perspective will reduce and replace explanations

based in religious traditions, beliefs, and values. This book attempts to bridge the reductionist divide between science and religion through examination and critique of different aspects of the cognitive science of religion and offers a conciliatory approach that investigates the multiple causal factors involved in the emergence of religion.

The Indian two-wheeler industry has undergone a long journey since its humble beginning in the late 1940s. During these eventful years, it has experienced great advancements in technology, tremendous increments in production volume and opening up of the market for global trade. India has now emerged as a global leader in two-wheeler production and trade. A key factor behind the creditable progress of this industry has been the operation of several international joint ventures (IJVs) such as Kawasaki Bajaj, TVS Suzuki, Kinetic Honda and Hero Honda. Of all IJVs, the partnership between Hero and Honda has been the longest and perhaps the most remarkable too. This article gives a brief overview of the Indian two-wheeler industry and presents a glimpse of the IJVs therein. It analyzes the impact of Hero Honda case, in detail, to showcase how a local manufacturer can team up with a global player and still achieve a synergy between their core competencies for enhancing efficiency, productivity and quality. The article narrates the transition from interfirm competition to

cooperation and aims at finding out how management innovations by both the partners can help reduce conflicts of interest, avoid cannibalization of the products of individual firms and derive mutual benefits by aligning their individual targets to a common goal of market success.

The eighth volume of the series features six reviews focusing on NMR spectroscopic techniques in food science, molecular biology and medical

diagnosis. The reviews in this volume are: - qNMR as a Tool for Determination of Six Common Sugars in Foods - Correlation of VIP Scores and ^1H NMR to Extract Information of Psychological Attention Tests Applied Before and After Coffee Intake - NMR Spectroscopy for Probing the Structural Determinants of Aptamer Optimization and Riboswitch Engineering - Applications of NMR Spectroscopy in Medical Diagnosis - Applications of NMR Spectroscopy in Cancer Diagnosis - NMR as a Tool for Exploring Protein Interactions and Dynamics

The Islamic State analyzes the transformation of ISIS (Daesh) from an underground insurgent organization to a quasi-state entity. It traces the genesis and evolution of what may be interpreted as a revolutionary war aimed at the creation and expansion of a new society and world order in the ruins of Syria and Iraq. This book: Analyzes the regime's totalitarian features including structure, ideology, propaganda, and violence; Examines its ideology with a focus on radical Islamism and Salafi-jihadism; Studies the economics behind its continued existence; and Explores the attitude of key state and non-state actors, especially Russia, USA, and the Global Coalition, towards Daesh. An indispensable guide to the study of modern terrorism, this book will be of great interest to students and researchers of Middle East studies, terrorism, with a focus on ISIS, military and strategic studies, politics and international relations, as well as general

readers.

This latest addition to the Dental Update books series provides a clear and thorough guide to contemporary orthodontic principles and practice. Written as a highly practical clinical manual, it covers patient assessment, diagnosis and treatment planning of both standard class malocclusions and specific entities such as impacted teeth, digit sucking habits and asymmetries, as well as appliance techniques, complex and multidisciplinary care, and retention.

Orthodontics: Principles and Practice is written by a range of international specialists in the field. It is an essential guide to the subject for dentists seeking to improve their knowledge of orthodontics, as well as dentistry students and trainee orthodontists. Key features

- Covers the full process of orthodontic treatment from initial patient assessment to post-treatment stability
- Provides up to date, evidence based and clinically relevant information
- Presented in a clear practical format for use as a clinical manual
- Written by international orthodontic specialists
- Highly illustrated in full colour throughout

Engine production for the typical car manufactured today is a study in mass production. Benefits in the manufacturing process for the manufacturer often run counter to the interests of the end user. What speeds up production and saves manufacturing costs results in an engine that is made to fall within a wide set of

standards and specifications, often not optimized to meet the original design. In short, cheap and fast engine production results in a sloppy final product. Of course, this is not what enthusiasts want out of their engines. To maximize the performance of any engine, it must be balanced and blueprinted to the exact tolerances that the factory should have adhered to in the first place. Four cylinder, V-8, American or import, the performance of all engines is greatly improved by balancing and blueprinting. Dedicated enthusiasts and professional racers balance and blueprint their engines because the engines will produce more horsepower and torque, more efficiently use fuel, run cooler and last longer. In this book, expert engine builder and veteran author Mike Mavrigian explains and illustrates the most discriminating engine building techniques and perform detailed procedures, so the engine is perfectly balanced, matched, and optimized. Balancing and blueprinting is a time consuming and exacting process, but the investment in time pays off with superior performance. Through the process, you carefully measure, adjust, machine and fit each part together with precision tolerances, optimizing the design and maximizing performance. The book covers the block, crankshaft, connecting rods, pistons, cylinder heads, intake manifolds, camshaft, measuring tools and final assembly techniques. For more than 50 years, balancing and blueprinting has been an accepted and

Hotel Gwales is the eagerly anticipated new collection from award winning poet Nigel Jenkins. It is as diverse as it is rousing, featuring some eighty poems varying in length from a three-line Haiku to an extended meditation of nearly 400 lines. Welsh themes and references, ancient and modern, are interspersed with works of an undeniably international flavour to bring together this exceptional collection. From a poem commemorating the execution of a man known as the Welsh 'Braveheart' to an elegy for a Welsh bus driver, Hotel Gwales truly has something for everyone. Hotel Gwales offers Nigel Jenkins's distinctive voice at its best in his first collection of poetry in almost four years. Nigel is well known both in Wales and internationally and is a frequent performer of his work. He has previously undertaken reading tours of countries including the USA and Switzerland. His trademark experimentation with form and ability to engage with his subject is at its finest.

This book focuses on value addition to various waste streams, which include industrial waste, agricultural waste, and municipal solid and liquid waste. It addresses the utilization of waste to generate valuable products such as electricity, fuel, fertilizers, and chemicals, while placing special emphasis on environmental concerns and presenting a multidisciplinary approach for handling

waste. Including chapters authored by prominent national and international experts, the book will be of interest to researchers, professionals and policymakers alike.

The workshop of new-product managers, market-research practitioners, and academics, which was the genesis of this work, was held in Feb. 1986, U. of Cal., Riverside. This volume examines the design and impact of courts in African federal systems from a comparative perspective. Recent developments indicate that the previously stymied idea of federalism is now being revived in the constitutional arrangements of several African countries. A number of them jumped on the bandwagon of federalism in the early 1990s because it came to be seen as a means to facilitate development, to counter the concentration of power in a single governmental actor and to manage communal tensions. An important part of the move towards federalism is the establishment of courts that are empowered to umpire intergovernmental disputes. This edited volume brings together contributions that first discuss questions of design by focusing, in particular, on the organization of the judiciary and the appointment of judges in African federal systems. They then examine whether courts have had a rather centralizing or decentralizing impact on the operation of African federal systems. The book will be of interest to researchers and policy-makers in the areas of comparative constitutional law and comparative politics.
