Has companion: BLS basic life support provider manual.

Product 15-1064

Pediatric Advanced Life Support (PALS) Provider Handbook, presented by National Health Care Provider Solutions (NHCPs), is a comprehensive resource intended for health care professionals currently enrolled in a Pediatric Advanced Life Support Certification or Recertification Course. It serves as the primary training material for PALS Certification and Recertification courses provided by National Health Care Provider Solutions. Although it is primarily intended for use during certification courses, the handbook was also created to serve as daily reference material for health care professionals. Information covered in the handbook includes EKG and electrical therapy review, pediatric respiratory failure and more. Specific PALS Algorithms and more are also included within the handbook. All material included in this handbook is delivered in a manner meant to enhance learning in the most comprehensive and convenient way possible. ACLS Certification Exam Q&A With Explanations will certainly help you pass any Advanced Cardiac Life Support Certification Course. As you look through the book, you will quickly see that this book's format is different from all other review and test preparation books. This book is specifically geared toward healthcare students and new healthcare professionals that are preparing to take the ACLS certification exam for the first time. This book will also give the seasoned healthcare professional lots of great review information as well as a way to update themselves on the latest research and guidelines. Whichever certifying agency's program you are taking, either in a classroom or on the internet, this book and its contents will help you succeed in this course. In this book we give you all the essential information that you will need to successfully pass the certification course and exam on your first attempt. ACLS Certification Exam Q&A With Explanations Media Kit For This Book The Q&A With Explanations Test-Prep And Review Guides Pass The ACLS Certification Exam On Your First Attempt! ACLS Certification Exam Q&A With Explanations Author: Michele G. Kunz Author: Joseph C. Kunz, Jr. Foreword: Dr. Peter Woods "Updated and expanded for 2017 using the latest guidelines and research." Amazon logo Look Inside This Book And Buy Now From Amazon Book Description From The Introduction ACLS Certification Exam Q&A With Explanations will certainly help you pass any Advanced Cardiac Life Support Certification Course. As you look through the book, you will quickly see that this book's format is different from all other review and test preparation books. It's like having a professor sitting right next to you as you study. This book is specifically geared toward healthcare students and new healthcare professionals that are preparing to take the ACLS certification exam for the first time. This book will also give the seasoned healthcare professional lots of great review information as well as a way to update themselves on the latest research and guidelines. Whichever certifying

agency's program you are taking, either in a classroom or on the internet, this book and its contents will help you succeed in this course. In this book we give you all the essential information that you will need to successfully pass the certification course and exam on your first attempt. Joe and I have been teaching this course to healthcare professionals and students since 1984. We know what works and what doesn't when it comes to helping our students be successful. We had to develop almost all of the study materials for our students by ourselves because very little existed at the time. The Zombie Notes Study Charts were some of the first study aids we developed to help our students learn a large amount of information very quickly. We know that this format works very well because hundreds of thousands of healthcare professionals and students, in hospitals and colleges all over the world, have used this handy, no-nonsense chart to help them successfully pass the ACLS certification exams. Therefore, in order for you to be successful on the certification exam, and on the job, we expect you to memorize every bit of information contained within the Zombie Notes Study Charts and within this book. It is essential that you know this information by heart and can recall it at a moment's notice. This information is not only essential for the exam, but for your career, and the survival of your patients, as well.

Product 15-2811

The student workbook for the credentialed Heartsaver Pediatric First Aid course. Provides information on how to manage illness and injuries in a child during the first few minutes of an emergency until professional help arrives. Includes four core modules: First Aid Basics, Injuries and Illnesses, Life-Threatening Emergencies and the Chain of Survival, and CPR and AED. Also includes optional modules, such as Use of a Nebulizer, to meet regulations for day-care centers in certain states. Workbook comes shrink-wrapped with the Heartsaver Pediatric First Aid Quick Reference Guide (#80-1002), the Adult CPR And AED Reminder Card, the Child And Infant CPR And AED Reminder Card, and a CD containing supplemental information and video clips on CPR and AED skills. An ideal resource for first responders, child-care workers, teachers, foster-care workers, camp counselors, youth organizations, coaches/Little League organizations, as well as parents, grandparents, and baby sitters.

Be prepared to handle life-threatening dental emergencies! Medical Emergencies in the Dental Office, 7th Edition helps you learn the skills needed to manage medical emergencies in the dental office or clinic. It describes how to recognize and manage medical emergencies promptly and proactively, and details the resources that must be on hand to deal effectively with these situations. This edition includes new guidelines for drug-related emergencies, cardiac arrest, and more. Written by respected educator Dr. Stanley Malamed, this expert resource provides dental professionals with the tools for implementing a basic action plan for managing medical emergencies. "It successfully fulfills its aim of stimulating all members of the dental team to improve and

maintain their skills in the effective prevention, recognition and management of medical emergencies." Reviewed by European Journal of Orthodontics, March 2015 "...very easy to read and provides a very comprehensive reference for a variety of medical emergencies." Reviewed by S.McKernon on behalf of British Dental Journal, July 2015 A logical format reflects the way emergencies are encountered in a dental practice, with chapters organized by commonly seen clinical signs and symptoms, such as unconsciousness or altered consciousness, respiratory distress, seizures, drug-related emergencies, chest pain, and cardiac arrest. Step-by-step procedures include detailed, numbered instructions for stabilizing and treating victims (PCABD) in common medical emergencies. Full-color illustrations demonstrate emergency techniques in realistic clarity. Summary tables and boxes make it easy to find essential concepts and information. Quick-reference algorithms in the appendix include step-by-step diagrams showing the decision-making process in common emergency situations. A differential diagnosis chapter ends each of the book's parts on common emergencies. UPDATED content includes the most current guidelines for drug-related emergencies, unconsciousness, altered consciousness, and cardiac arrest as well as protocols for obstructed airway management. UPDATED PCABD boxes reflect the American Heart Association's new sequence of steps for stabilizing and treating victims with an easy-to-remember acronym: Positioning, Circulation, Airway, Breathing, and Definitive Management. UPDATED! Emergency drug and equipment kit instructions help you assemble emergency kits and ensure that your dental office has safe, current materials on hand.

Basic Life Support (BLS) Provider Handbook

20-2804

Cardiac arrest can strike a seemingly healthy individual of any age, race, ethnicity, or gender at any time in any location, often without warning. Cardiac arrest is the third leading cause of death in the United States, following cancer and heart disease. Four out of five cardiac arrests occur in the home, and more than 90 percent of individuals with cardiac arrest die before reaching the hospital. First and foremost, cardiac arrest treatment is a community issue - local resources and personnel must provide appropriate, high-quality care to save the life of a community member. Time between onset of arrest and provision of care is fundamental, and shortening this time is one of the best ways to reduce the risk of death and disability from cardiac arrest. Specific actions can be implemented now to decrease this time, and recent advances in science could lead to new discoveries in the causes of, and treatments for, cardiac arrest. However, specific barriers must first be addressed. Strategies to Improve Cardiac Arrest Survival examines the complete system of response to cardiac arrest in the United States and identifies opportunities within existing and new treatments, strategies, and research that promise to improve the survival and recovery of patients. The recommendations of Strategies to Improve Cardiac Arrest Survival provide high-priority actions to advance the field as a whole. This report will help citizens, government agencies, and private industry to improve health outcomes from sudden cardiac arrest across the United States.

Basic Life Support Handbook

Basic Life Support (BLS) Provider Manual - The content in this handbook is in compliance with the 2020 guidelines for CPR and ECC (Emergency Cardiac Care), recently released by the American Heart Association - therefore, all the protocols illustrated in this book are based on up-to-date evidence. These guidelines are updated every 5 years. The BLS Provider Manual is a complete guide and reference tool that covers all the information students need to know in order to successfully complete the BLS course. For easier learning, multiple-choice questions can be found at the end of each chapter. The answers to these exercises are found at the very end of the book. Basic Life Support (BLS) refers to a set of procedures that can be learned to prolong survival in life-threatening situations until more professional help is available. Any individual can become certified in basic life support protocols. These protocols are frequently updated, based on the latest evidence available, and every individual who undergoes BLS certification may need to refresh their knowledge every two years. Medical professionals usually have a sound understanding of basic life support protocols. Even then, it is essential for them to frequently undergo certifications to update their knowledge regarding the latest evidence-based protocols. This handbook is designed for both medical professionals and non-healthcare individuals. It aims to establish a sound understanding of the mechanisms underlying basic life support. The intended audience is healthcare students and personnel who need to learn how to perform CPR and other basic cardiovascular life support skills in a wide variety of both clinical and prehospital settings. Go to the top-right of the page and click "Add to Cart" Instructor CD contents include: Precourse materials -- Course materials -- Evaluation materials -- Resources.

Here's all the information you need to respond to cardiac emergencies in one pocket-sized book! This quick-reference guide provides easy-to-access coverage of all three levels of care—infant, child, and adult—plus listings for all drugs required for ACLS and PALS in both adult and pediatric dosages.

The Save a Life Initiative has just released its newest course: Pediatric Advanced Life Support (PALS). This manual is based on the 2015-2020 Pediatric Advanced Life Support guidelines published by the American Heart Association. The Pediatric Advanced Life Support (PALS) Provider Handbook is a comprehensive resource intended for health care professionals currently enrolled in a Pediatric Advanced Life Support Certification or Recertification Course. It serves as the primary training material for PALS Certification and Recertification courses. Although it is primarily intended for use during certification courses, the handbook was also created to serve as daily reference material for health care professionals. Information covered in the handbook includes EKG and electrical therapy review, pediatric respiratory failure and more. Specific PALS Algorithms and more are also included within the handbook. All material included in this handbook is delivered in a manner meant to enhance learning in the

most comprehensive and convenient way possible.

This provider manual features case scenarios that help course participants apply new concepts to real-life situations. It includes material such as Effective Resuscitation Team Dynamics and the 10 ACLS Core Cases; a Student CD with video clips, optional material, anatomy/physiology, a quick reference guide, and reminder cards; two ACLS pocket reference cards; and the required ACLS Precourse Checklist. -- [from publisher's website]

This New American Red Cross CPR/AED for the Professional Rescuer Participant's Manual and course reflect changes based on the 2005 Consensus on Science for CPR and Emergency Cardiovascular Care (ECC) and the Guidelines 2005 for First Aid. Changes to this program and manual include simplifications to many of the CPR skill sequences, which helps improve retention. There have also been changes to help improve the quality of CPR. The integration of CPR skills into the operation of AEDs had changed to help improve survival from sudden cardiac arrest. Professional rescuers are now trained to use AEDs on adults and children. Information has been updated and added to this program to help professional rescuers administer epinephrine, aspirin and fixed-flow-rate oxygen. The skills learned in this course include adult, child and infant rescue breathing, conscious and unconscious choking, CPR, two-rescuer CPR and adult and child AED. Additional training can be added to this course including bloodborne pathogens training and emergency oxygen administration. While the skills and knowledge that professional rescuers use are increasing, this training will help you meet your most important responsibility as a professional rescuer- the responsibility to save lives.

Demonstrates CPR procedures for use in group training.
