The global community however lacks clear definitions and methods of stability, whether political, economic, or social. *Digital Bridges: Developing Countries in the Knowledge Economy* provides insight into the methods and theories behind the globalization of information technologies.

George Orwell's celebrated novella, *Animal Farm*, is a biting, allegorical, political satire on totalitarianism in general and Stalinism in particular. One of the most famous works in modern English literature, it is a telling comment on Soviet Russia under Stalin's brutal dictatorship based on a cult of personality which was enforced through a reign of terror. The book tells a seemingly simple story of farm animals who rebel against their master in the hope of stopping their exploitation at the hand of humans and creating a society where animals would be equal, free and happy. Ultimately, however, the rebellion is betrayed and the farm ends up in a state as bad as it was before. The novel thus demonstrates how easily good intentions can be subverted into tyranny. Orwell has himself said that it was the first book in which he had tried, with full consciousness of what he was doing, 'to fuse political purpose and artistic purpose into one whole.' The book was first published in England in 1945, and has since then remained a favourite with readers all over the world, and has consistently been included in all prestigious bestseller lists for the past many years.

In July 1923, less than three years after Westinghouse station KDKA signed on, company engineer Frank Conrad began regular simulcasting of its programs on a frequency in the newly-discovered shortwave range. It was an important event in a technological revolution that would make dependable worldwide radio communication possible for the first time. In subsequent years, countless stations in practically all countries followed suit, taking to shortwave to extend reception domestically or reach audiences thousands of miles away. Shortwave broadcasting would also have an important role in World War II and in the Cold War. In this, his fourth book on shortwave broadcast history, the author revisits the period of his earlier work, *On the Short Waves, 1923-1945*, and focuses on the stations that were on the air in those early days. The year-by-year account chronicles the birth and operation of the large international broadcasters, as well as the numerous smaller stations that were a great attraction to the DXers, or long-distance radio enthusiasts, of the time. With more than 100 illustrations and extensive notes, bibliography and index, the book is also a valuable starting point for further study and research.

Due to a constantly high population growth of India's sixth largest metropolis Hyderabad, a strongly growing middle-class and the subsequent rise of traffic and motorised vehicles in particular, sustainable solutions are needed to secure daily routines. For up to 50 % of the - predominantly poor - population, walking is crucial for everyday life. There is a tendency towards suburbanisation, still, for many people living in the city's central areas even low fares for busses or rickshaws are often not affordable. Additionally, the high level of air pollution poses a risk for people's health. This paper presents the action research conducted in 2009 (Citizens' Exhibition, expert workshop and online-dialogue). It analyses the degree of participation at different levels and evaluates the participative tools and methods used. It explains the most important problems in the field of traffic and transport from the citizens' point of view on the local level and gives an outlook on the problems and tasks at the city level. The analysis shows that the situation of pedestrians can be seen as one of the most important problems in the field of traffic and transport: a high rate of fatal accidents in which pedestrians lose their lives. Also missing or unattractive footpaths lead to a high probability of switching over to motorised transport modes by those pedestrians who can afford it and to the marginalisation of those who cannot afford it. At the same time the topic bears good opportunities to come up with low-tech, cost effective and at the same time highly efficient solutions in terms of CO2 reduction. Although or for the reason that the topic is not on the top list of the political agenda, there is a civil movement to push it forward and forcefully improve mobility and quality of life.

The *Diary of a Young Girl*, also known as *The Diary of Anne Frank*, is a book of the writings from the Dutch language diary kept by Anne Frank while in 1942, with her occupying Holland, a thirteen-year-old Jewish girl and her family fled their home in Amsterdam and went into hiding. The family was apprehended in 1944, and Anne Frank died of typhus in the Bergen-Belsen concentration camp in 1945. In her diary Anne Frank recorded vivid impressions of her experiences during this period. By turns thoughtful, moving, and amusing, her account offers a fascinating commentary on human courage and frailty and a compelling self-portrait of a sensitive and spirited young woman whose promise was tragically cut short. The diary was retrieved by Miep Gies, who gave it to Anne's father, Otto Frank, the family's only known survivor, just after the war was over. The diary has since been published in more than 60 languages.
