

Becoming A Language Teacher A Practical Guide To Second Language Learning And Teaching 2nd Edition

First released in the Spring of 1999, *How People Learn* has been expanded to show how the theories and insights from the original book can translate into actions and practice, now making a real connection between classroom activities and learning behavior. This edition includes far-reaching suggestions for research that could increase the impact that classroom teaching has on actual learning. Like the original edition, this book offers exciting new research about the mind and the brain that provides answers to a number of compelling questions. When do infants begin to learn? How do experts learn and how is this different from non-experts? What can teachers and schools do—with curricula, classroom settings, and teaching methods—to help children learn most effectively? New evidence from many branches of science has significantly added to our understanding of what it means to know, from the neural processes that occur during learning to the influence of culture on what people see and absorb. *How People Learn* examines these findings and their implications for what we teach, how we teach it, and how we assess what our children learn. The book uses exemplary teaching to illustrate how approaches based on what we now know result in in-depth learning. This new knowledge calls into question concepts and practices firmly entrenched in our current education system. Topics include: How learning actually changes the physical structure of the brain. How existing knowledge affects what people notice and how they learn. What the thought processes of experts tell us about how to teach. The amazing learning potential of infants. The relationship of classroom learning and everyday settings of community and workplace. Learning needs and opportunities for teachers. A realistic look at the role of technology in education.

Bringing together a comprehensive range of extended research-based chapters, *English Language Teacher Preparation in Asia* provides comprehensive insight into policy, research, and practical aspects of teacher preparation for English teachers at pre-service level across multiple contexts in Asia. Written by local and international scholars specialising in TESOL Teacher education, and acknowledging the increasingly complex demands made on teachers of English in view of globalisation, the book explores the multiple factors which are key to effective professional learning. Chapters consider how pre-service teachers are best prepared for the diverse contexts in which English is learnt and taught in settings throughout Asia and draw on in-depth research studies to provide rich, fully contextualised coverage of aspects of teacher preparation including curriculum design, programme development, policy, professional learning communities, assessment education, and teaching practicum. A timely contribution to the field of teacher preparation, this text will be an invaluable resource for teacher educators, pre-service teachers and academics involved in the preparation of English teachers in Asia.

This book proposes a new paradigm for English language teaching based on concepts from English for Specific Purposes (ESP) research and applications as well as from growing evidence relating pattern recognition to language learning ability. The contributors to the volume argue that learners should not try to become proficient all-around users of 'idealistic native-like' English, but instead should be realistic about what they need to acquire and how to go about achieving their specific goals. The book discusses the present situation by describing the status quo of English language education in Japan, taking into consideration recent trends of CLIL (content and language integrated learning), EMI (English medium instruction), and TBLT (task-based language teaching) as well as the work done on the Common European Framework of Reference for Languages (CEFR). It introduces new movements in ESP in Japan and in other Asian regions, covering topics ranging from genre analysis to corpus linguistics, and presents application examples of ESP practice in a range of educational situations in Japan from the graduate school level to elementary and middle school contexts. It also offers readers application examples of ESP practice in a range of business settings and expands the discussion to the global sphere where EAP and ESP are gaining importance as the number of ELF (English as a Lingua Franca) speakers continue to increase. The book will be of great interest to academics, researchers, and post-graduate students working in the fields of EFL and ESL.

This volume draws on empirical evidence to explore the interplay between language teacher identity (LTI) and professional learning and instruction in the field of TESOL. In doing so, it makes a unique contribution to the field of language teacher education. By reconceptualizing teacher education, teaching, and ongoing teacher learning as a continuous, context-bound process of identity work, *Language Teacher Identity in TESOL* discusses how teacher identity serves as a framework for classroom practice, professional, and personal growth. Divided into five sections, the text explores key themes including narratives and writing; multimodal spaces; race, ethnicity, and language; teacher emotions; and teacher educator-researcher practices. The 15 chapters offer insight into the experiences of preservice teachers, in-service teachers, and teacher educators in global TESOL contexts including Canada, Japan, Korea, Norway, Sri Lanka, Turkey, the United Kingdom, and the United States. This text will be an ideal resource for researchers, academics, and scholars interested in furthering their knowledge of concepts grounding LTI, as well as teachers and teacher educators seeking to implement identity-oriented approaches in their own pedagogical practices.

Becoming a Language Teacher, by respected author and experienced language teacher Elaine K. Horwitz, gives pre- and in-service teachers the skills they need to meet the needs of all language learners in today's diverse classrooms-while encouraging them to develop a personal approach to language teaching. Using a warm, supportive tone, the author clearly explains the fundamental concepts of second language acquisition and language teaching. A much-needed resource at a time when it is critical for all mainstream teachers to focus on language, this guide describes how to develop language for academic needs as well as for communication purpose and addresses the latest trends in language teaching.

'... A beautifully written, articulate and compelling argument for a sociocultural perspective on second language teacher education . . .

Essential reading for all who wish to understand this perspective.' – David Nunan, University of Hong Kong '...Significant and timely. Johnson is masterful at writing in an engaging, transparent prose about complex concepts. It's a rare scholar who can write prose like this.

Throughout my reading I wanted to engage in dialogue with her – this is a sure sign of a great book." – Diane Tedick, University of Minnesota, USA This book presents a comprehensive overview of the epistemological underpinnings of a sociocultural perspective on human learning and addresses in detail what this perspective has to offer the field of second language teacher education. Captured through five changing points of view, it argues that a sociocultural perspective on human learning changes the way we think about how teachers learn to teach, how teachers think about language, how teachers teach second languages, the broader social, cultural, and historical macro-structures that are ever present and ever changing in the second language teaching profession, and what constitutes second language teacher professional development. Overall, it clearly and accessibly makes the case that a sociocultural perspective on human learning reorients how the field understands and supports the professional development of second language teachers.

This book addresses two critical calls pertaining to language education. Firstly, for attention to be paid to the transdisciplinary nature and complexity of learner identity and interaction in the classroom and secondly, for the need to attend to conceptualizations of and approaches to manifestations of (in)equity in the sociohistorical contexts in which they occur. Collectively, the chapters envision classrooms and educational institutions as sites both shaping and shaped by larger (trans)communal negotiations of being and belonging, in which individuals affirm and/or problematize essentialized and idealized nativeness and community membership. The volume, comprised of chapters contributed by a diverse array of researcher-practitioners living, working and/or studying around the globe, is intended to inform, empower and inspire stakeholders in language education to explore, potentially reimagine, and ultimately critically and practically transform, the communities in which they live, work and/or study.

This includes a description of the different types of language teacher educators working in a range of professional and institutional contexts, an analysis of the reflections of a group of experienced English teacher educators working in Colombia and enrolled in a doctoral program to continue their professional development, and an exposition of the work that language teacher educators do, particularly in the domains of pedagogy, research, and service and leadership (institutional and community). All of this is done with the aim of understanding the identities that language teacher educators negotiate and are ascribed in their working contexts. The author emphasizes the need for research to pay attention to the lives and work of language teacher educators, and offers forty research questions as an indication of possible future research directions.

The main objective of this text is to assist language teachers in writing better tests. The author defines a good test as one that contains validity, reliability, practicality and a positive reaction. Hughes offers practical and realistic guidance on how to create a good test. The author pays special attention to the effect of testing on teaching - a test should not only be reliable and valid but should also have a positive effect on teaching. Chapters on the testing of writing, oral ability, reading, listening, grammar and vocabulary, and test administration are included. Also included are testing techniques that have been proven to be useful for teachers, and statistics that enable teachers to interpret test results. Dual immersion, a popular new way to cultivate bilingualism, is capturing the attention of parents and educators alike. By bringing together children from diverse backgrounds to learn each other's languages in a natural setting, it has proved far

more effective at cultivating fluency than traditional approaches. But how do these programs actually work? What goes on in dual immersion classrooms? And what is it that makes them so effective? *Diary of a Bilingual School* answers these questions with a unique mix of narratives and analysis. Depicting a year in the life of a second-grade classroom, it demonstrates what can happen when the instruction is bilingual and the curriculum is constructivist. The book focuses on Chicago's Inter-American Magnet School, one of the nation's most acclaimed dual immersion programs, where children thrive in an environment that unlocks their intellectual curiosity and enthusiasm for learning. Simultaneously, without conscious effort, they become proficient in two languages and at home in a culture that differs from their own. For those who want to discover the benefits of dual immersion for their children or for their students -- or who want to learn more about child-centered approaches to teaching -- *Diary of a Bilingual School* is a must.

Improving Foreign Language Teaching provides teachers and teacher trainers with a research-based structure for the effective teaching and assessment of second languages. As well as outlining a model for teacher development, the book identifies and exemplifies eight key principles for effective language learning, which can be used to guide curriculum design and decisions about classroom pedagogy. *Improving Foreign Language Teaching* also presents practical activities, related materials, and guidance on how student progress can be monitored and recorded. Based on the research of the authors and other international experts, together with the work of a consortium established by the authors and teachers in a range of secondary schools, the book focusses on the development of language skills and communicative competence. It also proposes an assessment system which better reflects how learners progress in language learning than current models. Taking as its starting point the challenge of a curriculum in flux and complex pedagogical approaches, this book offers clear research-informed guidance for effective planning, teaching and learning. It will be essential reading for all those concerned with the improvement of language learning and teaching in the secondary classroom.

Bringing together a range of perspectives from tertiary language and culture teachers and researchers, this volume highlights the need for greater critical engagement with the question of language teacher identity, agency and responsibility in light of an ever changing global socio-political and cultural landscape. The book examines the ways in which various moral, ethical, and ideological dimensions increasingly inform language teaching practice for tertiary modern/foreign language teachers, both collectively as a profession but also at the individual level in everyday classroom situations. Employing a narrative inquiry research approach which combines brief autobiographical reflections with semi-structured interview data, the volume provides a comprehensive portrait of the processes ten teacher-researchers in Australia working across five different languages engage in as they seek to position themselves more purposefully within a critical, political and ethical framework of teaching practice. The book will serve as a springboard from which to promote greater understanding and discussion of the impact of globalisation and social justice corollaries within the field, as well as to mediate the gap between language teaching theory and practice, making this key

reading for graduate students and researchers in intercultural communication, language teaching, and language teacher education.

This qualitative-interpretative study investigates a cohort of twelve English teachers enrolled in the M.A. programme 'E-LINGO – Teaching English to Young Learners'. The aim is to explore if, how and under what circumstances classroom action research, a core component of the programme, can foster teacher learning. Since the participants have different educational and cultural backgrounds and various levels of professional experience in the field of language teaching, they offer different perspectives on the object of research. Data from multiple sources are triangulated and interpreted to elicit indicators for learning and development in the form of critical learning incidents. The results suggest that not only cognitive, but also social and affective factors constitute the complex process of teacher learning.

Then imagine those same students feeling poorly about themselves - feeling they are dumb because they have not been told it takes time to learn a second language. Imagine adults passing through their lives and finally one sticks around to show them they are loved. They are safe. They are good. Just imagine.
