How do you tailor education to the learning needs of adults? Do they learn differently from children? How does their life experience inform their learning processes? These were the questions at the heart of Malcolm Knowles' pioneering theory of andragogy which transformed education theory in the 1970s. The resulting principles of a self-directed, experiential, problem-centred approach to learning have been hugely influential and are still the basis of the learning practices we use today. Understanding these principles is the cornerstone of increasing motivation and enabling adult learners to achieve. The 9th edition of The Adult Learner has been revised to include: Updates to the book to reflect the very latest advancements in the field. This text provides a solid foundation in program evaluation, covering the main components of evaluating agencies and their programs, how best to address those components, and the procedures to follow when conducting evaluations. Different models and approaches are paired with practical techniques, such as how to plan an interview to collect qualitative data and how to use statistical analyses to report results. In every chapter, case studies provide real world examples of evaluations broken down into the main elements of program evaluation: the needs that led to the program, the implementation of program plans, the people connected to the program, unexpected side effects, the role of evaluators in improving programs, the results, and the factors behind the results. In addition, the story of one of the evaluators involved in each case study is presented to show the human side of evaluation. The Ninth Edition offers enhanced and expanded case studies, making them a central organizing theme, and adds more international examples. The new edition also features online resources with an instructor test bank, sample program evaluation reports, and additional annotated resources.

Provides guidelines and examples for handling research, outlining, spelling, punctuation, formatting, and documentation.

The most widely-used text on the topic of collaboration, *Interactions* is a guide for preprofessionals and professionals to help them understand and participate effectively in their interactions with other school professionals and parents, in an increasingly diverse world that is also now routinely electronically and globally connected. *Interactions* presents theory and conceptual principles heavily seasoned with examples, cases, and applied activities. Written specifically to enable readers to quickly use their skills in professional settings, the book will be a useful tool for pre-service educators and practitioners-whether they are engaged in formal instructional settings, a study group, or independent study. The book recognizes that knowledge about instructional practices that can improve student outcomes are more important than ever before, and educators are scrambling to respond to the federal legislative mandates that require

increasingly high standards and a clear trajectory of improving academic performance for all students, including those with disabilities and other special needs.

Educational Psychology: Windows on Classrooms, Ninth Edition, will help you increase student learning and development. It is the most applied book in the field. If you're looking for a book that gives you a sound theoretical and research-based foundation and then provides specific and concrete illustrations and guidelines for applying this theory and research with your students, this is the book for you. The book uses an integrated-case approach. Each chapter begins with a case study taken from actual classroom practice. But, instead of stopping there, Eggen and Kauchak then weave the case throughout each chapter--extracting specific illustrations from it, and in some instances even taking dialogue from the lesson--to illustrate classroom applications of sometimes abstract and hard to understand theory and research.

Teachers and the Law uses a unique question and answer format. With the use of engaging and accessible language, the text provides a comprehensive overview of the topics future educators need to know in order to be legally literate and to practice preventative law. The text focuses on legal issues such as sexual harassment, freedom of speech, in-school prayer, rights of homosexual students, child abuse and neglect, affirmative action, home schooling, defamation, and due process---all topics that reflect current trends essential to the success of educators in the 21st century. In addition to these issues, the text analyzes the major laws affecting education today such as the No Child Left Behind Act of 2001 (NCLB), Title IX, the Family Educational Rights and Privacy Act (FERPA), The Individuals with Disabilities Education Act (IDEA), and certain copyright laws that apply to classroom and distance learning.

"The ideas, concepts, and challenges presented in this text have developed out of many different experiences: teaching elementary and middle-level children; teaching a basic elementary/middle school health course to hundreds of pre-service elementary, early childhood, and special education majors; working with numerous student teachers; and serving on a variety of local, state, and national curriculum and standards committees. Authors and contributors are and have been engaged in teaching in K-8 settings, designing curriculum, developing instructional strategies, and collaborating with state and local educators to provide professional development. This has provided opportunities to use the content and strategies included in this tenth edition. This textbook has been written with several groups in mind: (1) the elementary and middle-level education major who has little background or experience in health education but will be required to teach health education to their students in the future, (2) the health education major who will be the health specialist or coordinator in an elementary or middle school, (3) the school nurse who works in the elementary/middle school setting, and (4) those community health educators and nurses who increasingly must interact with elementary and/or middle school personnel. Our goal is to help ensure that elementary and middle school teachers and health specialists obtain the information, skills, and support they need to provide quality health instruction to students. The new edition includes updated statistics throughout. Updates have been made to Strategies for Learning and Assessment, Children's Literature, and Internet resources. All references to YRBS and SHPPS data have been updated to include the most recently disseminated data. Additionally, Healthy People references have been updated to include Healthy People 2030 objectives. A new section, Considerations for Special Populations, has been added to Chapters 5-14 in an effort to acknowledge current issues influencing the teaching of the chapter content"--

The authors' emphasis on making the text readable and user-friendly features numerous examples describing students from preschool through young adulthood functioning at various levels of ability, and teachers ranging from excellent to poor, with many relatable examples of good teachers who learn from their inevitable mistakes.
