Just as Jesus shows us the character of God, diving deeper into the events surrounding his birth gives us a better understanding of that character. Christmas is so much more than the holiday we've turned it into. It's the birth of a promise-God's promise to redeem humankind to himself. Sending Jesus was always God's plan, and there is something for us to learn in every detail surrounding his birth. Christmas Speaks is a simple yet perceptive devotional that's broken down into easily understood segments that weave together scripture and insight, giving the reader a deeper understanding of the vast love God has for us and how we should respond to that love. Each chapter examines a different aspect of the Christmas narrative. As we come to better know the people central to this story, we can begin to apply aspects of their character to our own lives for a more meaningful relationship with God. By coming to a deeper understanding of scripture, we can see how God speaks to the world-if we have ears to listen. Reflect on the words within these pages, and receive what the Holy Spirit has for you.

This book, entitled "How to Fly like an Eagle," is a motivational book written by the author in French, Spanish, and English to help people learn the techniques and to get the skills to help them

to fly to the top like that bird of prey which is the eagle. In this book, the readers will learn how to overcome obstacles and to cultivate the fruit of persistence which is an essential factor in the process of transformation of desire into its monetary equivalent. The basis of persistence is the power of will. When this power and desire combine correctly, they form an irresistible combination, the perfect one to help you overcome your failures. There are four simple steps which lead to the habit of persistence. This does not require a large amount of intelligence or a special education, but time and minimal effort. The four steps are as follows: 1- A target set backed by a burning desire to achieve it. 2- A definite plan, expressed in continuous action. 3- A closed mind to any negative influence (including negative suggestions of relatives, friends and others). 4- A harmonious agreement with one or more persons, able to lead someone to go forward with the plan and with the goal. These four steps are essential for success in all areas of life. These are the steps with which you can control your economic destiny. These are the steps that lead to freedom and independence of thought, that convert dreams into reality. These are the steps that lead to the domination of fear, discouragement and indifference. I do not know the situation you are facing currently, maybe you are in a wheelchair, or in a hospital bed and without any hope of survival, maybe you're on the verge of divorce, or you are unable to complete your schooling or university, or find a job. You can now be crawling like a snake or you have broken wings preventing you from being able to fly like an eagle, but one thing is certain, regardless of your economic, family, health situation you can have a better life, develop your potential and fly as high as the eagle above any obstacles or constraints you are facing right now. Of course, this will be possible if you apply the principles to be taught in this book. I testify to you with all my heart that this book has the power to transform the lives of people from nothing to excellence, from the dust of the ground to the top of success. I promise you if you read it, and put the principles into practice, your life will be completely blessed!

A change his friends, Sam, William, Paul and Peter, all born slaves, hungered for. They had a dream - a dream to be liberated from all who chained them. In the future, Mothers have legally achieved the natural right to abort their offspring up until the moment of viability. An Unborn is not considered legally viable until the 18th anniversary of their Entrance, or the day they left their mother's body. Until the moment of being Born, the mother has complete and 100% Choice on whether or not to abort her child. These abortions are done by nursing teams who use cattle thuds to terminate the Unborn. Summer dreams and longs for the day when she will be legally viable so that she will no longer have to worry about being aborted. This dystopian future is shocking because it is so close to becoming a reality, that it makes "1984" seem like a bright utopian spring day. Profoundly disturbing! But the logical extension of the pro-abortion, euthanasia, medical ethicists. Undeniably shocking! But why should this work of fiction be anymore shocking than the slaughter of babies that happens every day in America? This book is intended to be read by everyone, pro-life or pro-abortion. Some people will be appalled at the future described, and others will welcome it as the natural logical extension of their beliefs. Whatever you believe, this book will force you to think about those beliefs. The novel 1984 cannot hold a candle to the terrifying, and even more realistic near future painted in Unborn. Abortion ethicists have advocated on a non-fictional basis everything portrayed in this book. It is only a matter of time before the Unborn future becomes a reality. For far too many children, it has already become a reality. A reality that ended for them with their deaths. The modern abolitionist seeks to abolish the slaughter of babies, just as the 19th century abolitionist sought to abolish the evil institution of slavery. However, born out of the eugenics movement that sought to exterminate the black man since he could no longer be enslaved, the modern abortion movement is an evil institution far surpassing the evils of slavery. In the 19th century, Uncle Tom's Cabin opened the eyes of America to the need for the abolition of slavery and in the 21st century, Unborn will open the eyes of America to the need for the abolition of abortion. This book is the modern abolitionist's Uncle Tom's Cabin. Warning! This book is not intended for younger children. The book portrays fictionally a graphic and disturbing utopian future where abortion rights are absolute. Intended for teenagers, who are forced to confront today these horrible issues by a world gone mad, the graphic and disturbing nature of the logic of modern man is taken to its inevitable conclusions. Parental Discretion Advised. Parents should read this book before allowing their children to read it.

Cancer sucks, death sucks even more. But we humans don't have the power to stop either of them from messing with our lives. They enter our lives whenever and wherever they choose to. Cancer is so common that each one of us have known someone who has dealt with the disease; some of us have lost a loved one to cancer. Common does not always mean simple, and it also does not mean we know everything about it. The diagnosis of cancer, regardless of the disease's curability, is almost always nerve-racking, even for healthcare providers like the main character of this book who is a veteran nurse. This book is written in first person; the subject is a middle aged woman who had been separated from her boyfriend some thirty years ago and then after three decades when she searches for an oncologist for treatment of an aggressive cancer that she was recently diagnosed, she finds her ex-boyfriend's name and decides to see him. That brings back the memory of their past together, and she starts going through her old diary she had written some thirty years in the past. Part of the story is set in Nepal (from the diary) and the other part is set in the USA (this takes place after her cancer diagnosis). The main character of the story was born with 'Manglik' cosmic influencer, meaning that the planet Mars "mangal Graha" was in such position in the solar system at the time of her birth that it would have strong negative effect on her husband if she married a man who was non-Manlik (a person born at the time when the planet Mars was not in such position.) What happens next changes the lives of the main characters.

Do you feel like you struggle to make time for everything? We are living in a time-poor society, working more than ever and with less time for ourselves and family. The pressures and stress of the obligations we feel we have, often leave us without time to do everything that we would like to. More critically, we lack the time to reflect, review our lives and consider our direction. Time to contemplate if the decisions we are making are going to lead us to a life of purpose or an old age filled with regret. Time for Anything is based on 5 years of research by Craig D Robinson. Using the techniques in this book, Craig went from working in an entry level position to, in just four years: start 2 companies, recharge with 12 weeks holiday a year, start a family, grow and sell his startups and retire at the age of 34. This book shows you how you too can have time for it all.
