From the foreword: "One of the High Line's powers is its ability to evoke time, to remind us of the changes we've experienced during our own lives, to bring forth echoes of the past, and to make us guess what life might be like years from now. I love the photos on these pages, because they have that power, too." --Joshua David, Co-Founder of the Friends of the High Line. Ten Avenues Press, in association with Friends of the High Line, announce the publication of *High Line Nudes*. In 2006, photographer Kevin McDermott took three of his friends up on the abandoned railroad tracks that would become New York City's High Line park to shoot a series of nudes. As McDermott states in his introduction, "at the time I took these photos, what I sought from its beauty was its sense of isolation, being alone, surrounded by

nature in the middle of this metropolis." A decade later, this location is now one of the most visited tourist destinations in NYC and one of the largest real estate developments in the world. High Line Nudes captures a seemingly impossible, but beautiful moment in the history of the West Side Rail Yards, Chelsea and an ever changing New York City. The cloth hardcover book is beautifully printed in color and rich black and white duotone images.

Cosmology is in crisis. The more we discover, the more puzzling the universe appears to be. How and why are the laws of nature what they are? A philosopher and a physicist, world-renowned for their radical ideas in their fields, argue for a revolution. To keep cosmology scientific, we must replace the old view in which the universe is governed by immutable laws by a new one in which laws evolve. Then we can hope to explain them. The revolution that Roberto Mangabeira Unger and Lee Smolin propose relies on three central ideas. There is only one universe at a time. Time is real: everything in the structure and regularities of nature changes sooner or later. Mathematics, which has trouble with time, is not the oracle of nature and the prophet of science; it is simply a tool with great power and immense limitations. The argument is readily accessible to non-scientists as well as to the physicists and cosmologists whom it challenges.

A life hangs in the balance of memory in this poignant, witty

and “effective feminine counterpoint to . . . Philip Roth’s 2006 novel, ‘Everyman’” by the award-winning author (The Washington Post). Born on the same day as Queen Elizabeth II, Canadian Georgina Danforth Witley is one of ninety-nine lucky Commonwealth residents invited to Her Majesty’s eightieth birthday lunch at Buckingham Palace. But en route to the airport to board the plane for London, Georgina’s car slips off the road and plunges into a thickly wooded ravine. Thrown from the car, injured, and unable to move, she must rely on her full store of family memories, her no-nonsense wit, and a recitation of the names of the bones in her body—an exercise from childhood—to remind her that she is still very much alive. But what has the entirety of her life meant? As Georgina lies stranded and helpless, she reflects on her eighty years as a daughter, mother, sister, wife, and widow, on lost loves and secrets, and on painful moments of the past she struggles not to recall. With this exquisite, suspenseful, and surprising tale of the staying power of family through time and memory, “Itani exposes the richness and depth beneath the surface of one ordinary life” (The New Yorker).

As a practical reference for anyone entrusted with the lives and property of others, Emergency Planning helps its readers prepare for a variety of situations--from bomb threats to fires to nuclear disasters. The authors of this book recognize the need for updated emergency planning. The "blueprints" in the appendices are useful plans for dealing with such specific emergencies as labor strikes, hurricanes, and terrorist actions. While most large governmental entities are prepared to deal with nearly all types of contingencies and emergencies, many communities and companies have few plans detailing how to respond to and recover from such events. Scores of pastors and leaders testify: “THIS CHANGED MY LIFE AND MINISTRY.” The author considers these critical questions: In the beginning, before God created

Adam (mankind), what was His original purpose and plan for him? What could have happened in the Garden of Eden if Adam had not sinned and God's redemptive plan had not become necessary? We know that when God created Adam he received natural life, but how did God plan for Adam to receive Divine (uncreated life)? What is the difference between God's creating and begetting work? It is evident that God has given the Cross a central place in His redemptive working; what is the difference between the work of the Cross and the way of the Cross? Since God, in the fullness of time, will put on display His Divine masterpiece before all the universe, how can we fully cooperate with him if we do not understand His Ultimate Intention?
