Chicago has been called by many names. Nelson Algren declared it a "City on the Make." Carl Sandburg dubbed it the "City of Big Shoulders." Upton Sinclair christened it "The Jungle," while New Yorkers, naturally, pronounced it "the Second City." At last there is a book for all of us, whatever we choose to call Chicago. In this magisterial biography, historian Dominic Pacygatraces the storied past of his hometown, from the explorations of Joliet and Marquette in 1673 to the new wave of urban pioneers today. The city's great industrialists, reformers, and politicians—and, indeed, the many not-so-great and downright notorious—animate this book, from Al Capone and Jane Addams to Mayor Richard J. Daley and President Barack Obama. But what distinguishes this book from the many others on the subject is its author's uncommon ability to illuminate the lives of Chicago's ordinary people. Raised on the city's South Side and employed for a time in the stockyards, Pacyga gives voice to the city's steelyard workers and kill floor operators, and maps the neighborhoods distinguished not by Louis Sullivan masterworks, but by bungalows and corner taverns. Filled with the city's one-of-a-kind characters and all of its defining moments, Chicago: A Biography is as big and boisterous as its namesake—and as ambitious as the men and women who built it.

This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been cus tomarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the in terest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

In the midst of Trump's attacks on the media, comes this look at the rigorous, independent reporting of the year's most underreported news stories. While the country's president displays a brazen disregard for the First Amendment and routinely demonizes the press as "the enemy of the people," Censored 2020 looks beyond Donald Trump's dizzying contempt for the truth to clarify the corporate media's complicity in misinforming the American public--while also providing a clear vision of a better future, based on rigorous, trustworthy independent reporting that presents a fuller picture of truth. With a discerning eye, Censored 2020 focuses the public's attention on the most important but underreported news stories of 2018-2019. These stories expose the corporate news media's systemic blind spots while highlighting the crucial role played by independent journalists in providing the kind of news necessary for informed, engaged citizens. The book also examines this year's lowlights in "junk food news" and "news abuse"--further revealing how corporate news often functions as propaganda--as well as highlights of exemplary organizations that champion "Media Democracy in Action." Additional chapters address the importance of constructive journalism, the untold story of Kashmir, news coverage of LGBTQ issues in the Trump era, "fake news" as a Trojan horse for censorship, and online memes as a form of political communication.

This reader fills a gap in classroom offerings by exploring historians' ongoing attempt to understand the social and cultural aspects of medieval Christianity. James L. Halverson organizes his selections around two central questions: what do we mean when we say that medieval Europe was a Christian culture, and what did it mean to be a Christian in the Middle Ages? He argues that the diversity of medieval society over time and space defies the simple answers given in textbooks and that students of medieval religion must have more exposure to issues such as class, gender, and literacy. This carefully selected and provocative collection of key works in the field will provide an invaluable introduction to the medieval world.

How-and why- were UFOs so prevalent in both conspiracy theories and the New Age milieu in the post-Cold War period? In this ground-breaking book, David G. Robertson argues that UFOs symbolized an uncertainty about the boundaries between scientific knowledge and other ways of validating knowledge, and thus became part of a shared vocabulary. Through historical and ethnographic case studies of three prominent figures-novelist and abductee Whitley Strieber; environmentalist and reptilian proponent David Icke; and David Wilcock, alleged reincarnation of Edgar Cayce-the investigation reveals that millennial conspiracism offers an explanation as to why the prophesied New Age failed to arrive-it was prevented from arriving by malevolent, hidden others. Yet millennial conspiracism constructs a counter-elite, a gnostic third party defined by their special knowledge. An overview of the development of UFO subcultures from the perspective of religious studies, UFOs, Conspiracy Theories and the New Age is an innovative application of discourse analysis to the study of present day alternative religion.
