For thousands of years people have traveled across Washington’s spectacular terrain, establishing footpaths and roads to reach hunting grounds and coal mines high in the mountains, fishing sites and trade emporiums on the rivers, forests of old growth, and homesteads and towns on prairies. These traditional routes have been preserved in national parks, restored by cities and towns, salvaged from old railroad tracks, and opened to hikers by Indigenous communities. In this new, full-color edition of the first-ever hiking guide to the state’s historic trails, historian and hiker Judy Bentley teams up with veteran guidebook author Craig Romano to lead adventurers of all abilities along trails on the coast, over mountains, through national forests, across plateaus, and on the banks of the Columbia River. Features include: • 44 hikes, including 12 new additions • Full-color trail maps • A trails timeline that connects hikes to key events • Updated trail descriptions • Accounts from diaries, journals, and archives • Historical overviews of 8 regions of the state • Contemporary and historical photographs Bentley and Romano offer an essential boots-on-the ground history of some of the state’s most fascinating places.

Addicted to Love is a roadmap to recovery and healthy relationships for female sex and love addicts. It’s hard to imagine love without the pain. Women who live with love addiction are a unique breed having learned to cope in a sex-driven world by finding their worth in sexuality and being wanted. The human need for lasting, meaningful relationships is constantly sabotaged by these women’s own behaviors on top of events outside their control. In Addicted to Love, Lacy A. Bentley—a woman who has been there—introduces her own recovery journey with courageous honesty to guide other women on their paths to recovery. Each chapter focuses on a different trait of emotional health and teaches women to integrate that trait in a workbook-style format. Lacy shows them how to secure their romantic heart, love like they were meant to, and break free from compulsive patterns, while presenting new ways of seeing day-to-day patterns. Every word guides brave women into the relationships they truly want and deserve—without excuses, compulsions, or addiction in the recovery roadmap of the future.

A Best Book of 2020 from Library Journal, CrimeReads, and BookPage “Marks the debut of an already accomplished novelist.” —John Banville The town of Bentley holds two things dear: its football, and its secrets. But when star quarterback Dylan Whitley goes missing, an unremitting fear grips this remote corner of Texas. Joel Whitley was shamed out of conservative Bentley ten years ago, and while he’s finally made a life for himself as a gay man in New York, his younger brother’s disappearance soon brings him back to a place he thought he’d escaped for good. Meanwhile, Sheriff’s Deputy Starsha Clark stayed in Bentley; Joel’s return brings back painful memories—not to mention questions—about her own missing brother. And in the high school hallways, Dylan’s friends begin to suspect that their classmates know far more than they’re telling the police. Together, these unlikely allies will stir up secrets their town has long tried to ignore, drawing the attention of dangerous men who will stop at nothing to see that their crimes stay buried. But no one is quite prepared to face the darkness that’s begun to haunt their nightmares, whispering about a place long thought to be nothing but an urban legend: an empty night, a flicker of light on the horizon—The Bright Lands. Shocking, twisty and relentlessly suspenseful, John Fram’s debut is a heart-pounding story about old secrets, modern anxieties and the price young men pay for glory.

In Theological Territories, David Bentley Hart, one of America's most eminent contemporary writers on religion, reflects on the state of theology "at the borders" of other fields of discourse, including metaphysics, philosophy of mind, science, the arts, ethics, and biblical hermeneutics. The book advances many of Hart's larger theological projects, developing and deepening numerous dimensions of his previous work. Theological Territories constitutes a manifesto regarding the manner in which theology should engage other fields of concern and scholarship. The essays within this volume are divided into five sections: the nature of theology, the relations between theology and science, the connections between gospel and culture, the literary representations of and engagements with transcendence, and the New Testament. Hart responds to influential books, theologians, philosophers, and poets, including Rowan Williams, Jean-Luc Marion, Tomáš Halík, Sergei Bulgakov, Jennifer Newsome Martin, and David Jones. Drawn from live lectures delivered in various settings, these essays show how Hart's mind works with the academic veneer of more formal pieces stripped away. Theological Territories contains new and expanded material previously unpublished by Hart and will appeal to both academic and non-academic readers interested in the place of theology in the modern world.

Public policy analysts and political pundits alike tend to describe the policymaking process as a reactive sequence in which government develops solutions for clearly evident and identifiable problems. While this depiction holds true in many cases, it fails to account for instances in which public policy is enacted in anticipation of a potential future problem. Whereas traditional policy concerns manifest themselves through ongoing harms, "anticipatory problems" are projected to occur sometime in the future, and it is the prospect of their potentially catastrophic impact that generates intense speculation and concern in the present. *Anticipatory Policymaking: When Government Acts to Prevent Problems and Why It Is So Difficult* provides an in depth examination of the complex process through which United States government institutions anticipate emerging threats. Using contemporary debates over the risks associated with nanotechnology, pandemic influenza, and global warming as case study material, Rob A. DeLeo highlights the distinctive features of proactive governance. By challenging the pervasive assumption of reactive policymaking, DeLeo provides a dynamic approach for conceptualizing the political dimensions of anticipatory policy change.

This book offers readers a broad view of research in some Western and Eastern European countries on pattern and signal analysis, and on coding, handling and measurement of images. It is a selection of refereed papers from two sources: first, a satellite conference within the biannual International Conference on Pattern Recognition held in Rome, November 14-17, 1988, and second, work done at the International Basic Laboratory on Image Processing and Computer Graphics, Berlin, GDR. The papers are grouped into three sections. The first section contains new proposals for the specific computation of particular features of digital images and the second section is devoted to the introduction and testing of general approaches to the solution of problems met in digital geometry, image coding, feature extraction and object classification. The third section illustrates some recent practical results obtained on real images specifically in character and speech recognition as well as in biomedicine. All the techniques illustrated in this book will find direct application in the near future. This book should interest and stimulate the reader, provoke new thoughts and encourage further research in this widely appealing field.

Bible Readers and Lay Writers in Early Modern England studies how immersion in the Bible among layfolk gave rise to a non-professional writing culture, one of the first instances of ordinary people taking up the pen as part of their daily lives. Kate Narveson examines the development of the culture, looking at the close connection between reading and writing practices, the influence of gender, and the habit of applying Scripture to personal experience. She explores too the tensions that arose between lay and clergy as layfolk embraced not just the chance to read Scripture but the opportunity to create a written record of their ideas and experiences, acquiring a new control over their spiritual self-definition and a new mode of gaining status in domestic and communal circles. Based on a study of print and manuscript sources from 1580 to 1660, this book begins by analyzing how lay people were taught to read Scripture both through explicit clerical instruction in techniques such as note-taking and collation, and through indirect means such as exposure to sermons, and then how they adapted those techniques to create their own devotional writing. The first part of the book concludes with case studies of three ordinary lay people, Anne Venn, Nehemiah Wallington, and Richard Willis. The second half of the study turns to the question of how gender registers in this lay scripturalist writing, offering extended attention to the little-studied meditations of Grace, Lady Mildmay. Narveson concludes by arguing that by mid-century, despite clerical anxiety, writing was central to lay engagement with Scripture and had moved the center of religious experience beyond the church walls.
