The last Asian financial crisis, coupled with the western series of corporate scandals, has caused investors and citizens to doubt managers' ability to guarantee credible financial information about organizations. Consequently, legislators all over the world have come to realise the necessity of legislating in the area of corporate governance. This book explores several national corporate governance reform experiences from around the world (including Canada, China, the United States, and the European Union) and offers an explanatory theory with regard to national systems of corporate governance. It also underlines corporate governance as a management tool and principle. The author argues that each country should be encouraged to build its own system of corporate governance which should be harmonized with its history, culture and the level of its economic development.

This essential companion to the text provides detailed, accuracy-verified, class-tested solutions to every chapter problem. All the solutions, like the problems themselves, were written by the textbook authors. Scrutiny by Timothy Sullivan, Bentley University, and Mark Simonson, Arizona State University, guarantees unparalleled quality. Spreadsheet solutions to select chapter problems and Data Cases are available on the Instructor's Resource CD-ROM.

Financial Management in the Sport Industry provides readers with an understanding of sport finance and the importance of sound financial management in the sport industry. It begins by covering finance basics and the tools and techniques of financial quantification, using current industry examples to apply the principles of financial management to sport. It then goes beyond the basics to show how financial management works specifically in sport - how decisions are made to ensure wealth maximization. Discussions include debt and equity financing, capital budgeting, facility financing, economic impact, risk and return, time value of money, and more. The final section focuses on sport finance in three sectors of the industry - public sector sports, collegiate athletics, and professional sport-providing in-depth analysis of financial management in each sector. Sidebars, case studies, concept checks, and practice problems throughout provide practical applications of the material and enable thorough study and practice. The business of sport has changed dynamically since the publication of the first edition, and this second edition reflects the impact of these changes on financial management in the sport industry. New to this edition are changes to reflect the global nature of sport (with, for example, discussions of income tax rates in the Premiere League), expanded material on the use of spreadsheets for financial

calculations, a primer on accounting principles to help students interpret financial statements, a valuation case study assignment that takes students step by step through a valuation, a new stadium feasibility analysis using the efforts of the Oakland Raiders to obtain a new stadium, a new economic impact example focusing on the NBA All Star game, and much more.

Berk and DeMarzo's Corporate Finance uses a unifying valuation framework, the Law Of One Price, to present the core content instructors expect, the new ideas they want, and the pedagogy their students need to succeed. Corporate Finance: The Core fits programs and individual instructors who desire a streamlined book that is specifically tailored to the topics covered in the first one-semester course. For instructors who would like to use a text in a two semester, or more, sequence, please see Corporate Finance, the 31 chapter book also by Jonathan Berk and Peter DeMarzo.

FULLY UPDATED FOR 2020 TAX LAW The bold and innovative McGraw-Hill Taxation series is now the most widely adopted code-based Tax title across the country instructors. It's apparent why the clear, organized, and engaging delivery of content, paired with the most current and robust tax code updates, is used by more than 600 schools. The breadth of the topical coverage, the story line approach to presenting the material, the emphasis on the tax and non-tax consequences of multiple parties involved in transactions, and the integration of financial and tax accounting topics make this book ideal for the modern tax curriculum.

Story line Approach: Each chapter begins with a story line that introduces a set of characters or a business entity facing specific tax-related situations. Examples related to the story line allow students to learn the code in context.

Integrated Examples: In addition to providing examples in-context, we provide "What if" scenarios within many examples to illustrate how variations in the facts might or might not change the answers.

More than 100 Videos: Guided Example hint videos provide students with on-demand walk-throughs of key Tax topics, offering narrated, animated, step-by-step solutions to algorithmic variants for select exercises similar to those assigned.

Two experienced and visionary authors show how institutions and individuals can go beyond conventional and sustainable investing to address complex problems such as income inequality and climate change on a deep, systemic level. It's time for a new way to think about investing, one that can contend with the complex challenges we face in the 21st century. Investment today has evolved from the basic, conventional approach of the 1950s. Investors have since recognized the importance of sustainable investment and have begun considering environmental and social factors. Yet the complexity of the times forces us to recognize and transition to a third stage of investment practice: system-level investing. In this paradigm-shifting book, William Burckart and Steve Lydenberg show how system-level investors support and enhance the health and stability of the social, financial, and environmental systems on which they depend for long-term returns. They preserve and strengthen these fundamental systems while still generating competitive or otherwise acceptable performance. This book is for those investors who believe in that transition. They may be institutions, large or small, concerned about the long-term stability of the environment and society. They may be individual investors who want their children and grandchildren to inherit a just and sustainable world. Whoever they may be, Burckart and Lydenberg show them the what,

why, and how of system-level investment in this book: what it means to manage system-level risks and rewards, why it is imperative to do so now, and how to integrate this new way of thinking into their current practice.
