An original workbook companion to the acclaimed business bestseller *The Back of the Napkin* Dan Roam's *The Back of the Napkin*, a *BusinessWeek* bestseller, taught readers the power of brainstorming and communicating with pictures. It presented a new and exciting way to solve all kinds of problems—from the boardroom to the sales floor to the cubicle jungle. The companion workbook, *Unfolding the Napkin*, helps readers put Roam's principles into practice with step-by-step guidelines. It's filled with detailed case studies, guided do-it-yourself exercises, and plenty of blank space for drawing. Roam structured the book as a complete four-day visual-thinking seminar, taking readers step-by-step from "I can't draw" to "Here is the picture I drew that I think will save the world." The workbook teaches readers how to:

- Improve their three "built-in" visual problem solving tools.
- Apply the four-step visual thinking process (look-see-imagine-show) in any business situation.
- Instantly improve their visual imaginations.
- Learn how to recognize the type of problem to choose the best visual solution.

If *The Back of the Napkin* was a guide to fine dining, *Unfolding the Napkin* is the cookbook that will soon be heavily marked up and dogeared.

Designed for the introductory, calculus-based physics course, *Physics for Engineers and Scientists* is distinguished by its lucid exposition and accessible coverage of fundamental physics concepts. The text presents a modern view of classical mechanics and electromagnetism for today's science and engineering students, including coverage of optics and quantum physics and emphasizing the relationship between macroscopic and microscopic phenomena. Organized to address specific concepts and then build on them, the text divides each chapter into short, focused sections followed by conceptual review questions. Using real-world examples throughout the text, the authors offer a glimpse of the practical applications of physics in science and engineering and develop a solid conceptual foundation that enables students to become better problem solvers. A well-integrated media package extends this emphasis on core concepts and problem-solving skills by offering students and instructors many diverse opportunities for active learning.

First published in 1951, *Cherokee Cooklore* introduces us to traditional Cherokee cooking. It starts with a photographic essay as Aggie Lossiah demonstrates how she makes bean bread. This is followed by recipes gathered from the North Carolina Cherokee community (including yellowjacket soup, blood pudding, hominy corn drink, baked squirrel, and hickory nut soup). A description of Cherokee food customs follows. This is a fascinating booklet that provides valuable food lore for the adventuresome gourmet or the student of Native American history.

This paper explores how prudential regulations can support monetary policy in reducing output fluctuations while maintaining financial stability. It uses a new framework that blends a standard model for monetary policy analysis with a contingent claims model of financial sector vulnerabilities. The results suggest that binding countercyclical prudential regulations can help reduce output fluctuations and lessen the risk of financial instability. More specifically, countercyclical rules such as countercyclical capital

adequacy rules, can allow monetary authorities to achieve the same output and inflation objectives but with smaller adjustments in interest rates. The countercyclical rules can help stem swings in asset prices, lean against a financial accelerator process, and thereby help to lower risks of macroeconomic and financial instability. In economies with fixed exchange rates, where countercyclical monetary policy is not possible, prudential regulations can provide a useful mechanism for mitigating a run-up in asset prices and for promoting output stability.

Who says time travelers have to be young and attractive? Heck, they don't even have to be nerdy and agile! Sharolett Koenig dispels all the Hollywood myths about time travel in her latest novel, *The New Domestic*. Sixty plus-year-old main character, Paulette, suddenly finds herself in the 1897 bedroom of a young couple after trying out her latest antique acquisition, a "New Domestic" sewing machine, leaving behind her husband, Carl, who is battling the early stages of Alzheimer's disease. And that's not all he has to battle when their daughter shows up at their home and tries to have Carl committed to a nursing home after learning that her mother is missing. Meantime, Paulette has her own battles to wage in a past world where women are supposed to be refined and dignified, not outspoken and belligerent as she can sometimes be. When she discovers where (when) she is, Paulette sets out to find a way back, not even sure how she got there in the first place. *The New Domestic* will have you in stitches and sitting on the edge of your seat. You'll never sit down at a sewing machine again without thinking that the simple straight seam you're sewing might lead you on an adventure of epic proportions. Or that the zigzag stitches could be your ticket to a new life full of twists and turns.

Masterful and macabre short fiction from the New York Times–bestselling author of Swan Song. Father John has lived his whole life without knowing a woman's touch. Hard at first, his self-denial grew easier over time, as he learned to master his urges with a regimen of prayer, cold showers, and jigsaw puzzles. That changed the day that Debra Rocks entered his confessional. A rough-talking adult film actress, she has come to ask him to pray for a murdered costar. Her cinnamon perfume infects Father John, and after she departs he becomes obsessed. Around the corner from his church is a neon-lit alley of sin. He goes there hoping to save her life before he damns himself. That is "Blue World," the novella that anchors this collection of chilling stories by Robert R. McCammon. Although monsters, demons, and murderers fill these pages, in McCammon's world the most terrifying landscape of all is the barren wasteland of a lost man's soul.

"In 1942, the federal government expelled more than 22,000 Japanese Canadians from their homes in British Columbia. From 1942 to 1949, they were dispossessed, sent to incarceration sites, and dispersed across Canada. Over 4,000 were deported to Japan. Cartographies of Violence analyses the effects of these processes for some Japanese Canadian women. Using critical race, feminist, anti-colonial, and cultural geographic theory, Mona Oikawa deconstructs prevalent images, stereotypes, and language used to describe the 'internment' in ways that masks its inherent violence. Through interviews with women survivors and their daughters, Oikawa analyses recurring themes of racism and resistance, as well as the struggle to communicate what happened. Disturbing and provocative, Cartographies of Violence explores women's memories in order to map the effects of forced displacements, incarcerations, and the separations of family, friends, and communities"--Publisher's website.
