This book explores the interplay between regulation and emerging technologies in the context of synthetic biology, a developing field that promises great benefits, and has already yielded fuels and medicines made with designer micro-organisms. For all its promise, however, it also poses various risks. Investigating the distinctiveness of synthetic biology and the regulatory issues that arise, Alison McLennan questions whether synthetic biology can be regulated within existing structures or whether new mechanisms are needed.

MAHARASTRA HSC QB Malcolm Forbes said "Education's purpose is to replace an empty mind with an open one" and this is something which is always followed by Maharashtra State Board of Secondary & Higher Education (MSBSHSE). The aim of the Board is not just to let learners obtain basic knowledge but to make them life-long learners. The purpose of this book is to nurture individuality and thus enhance one's innate potentials which help in increasing the self-study mode for students. This book strengthens knowledge and attitude related to subject. This book is designed in such a way that students can set their own goals and can improve their problem solving and thinking skills. This book is strictly as per the latest Maharashtra Board Curriculum for HSC Exams. It contains variety of questions from latest textbooks. It contains all types of questions like VSA Questions (Very Short Answer), SA Questions (Short Answer), MCQs (Multiple Choice Questions) and LA Questions (Long Answer). A synopsis is given for every chapter which contains important points from that chapter. Each chapter has high quality figures wherever required for better, fast and clear understanding. OSWAAL HSC Question Bank is different and better in terms of High Quality Questions which are developed by 'OSWAAL Expert Panel'. The Question Bank is strictly based on the latest MSBSHSE Textbooks and is arranged 'TOPIC-WISE' where each Topic from every Chapter is explained in detail. Through OSWAAL Books students are taught how to think, not what to think. We at OSWAAL Books try to use quality content, standard language, creativity and high quality figures, which makes learning easy and fun. This is one of the reasons that the scope of this book extends from students to teachers. Teachers can use this book as a perfect teaching guide and students can use this book for good learning and practice.

This collection explores birthing in the Pacific against the background of debates about tradition and modernity. A wide-ranging introduction and conclusion, together with case studies from Papua New Guinea, New Caledonia, Vanuatu, Fiji, and Tonga, show how simple contrasts between traditional and modern practices, technocratic and organic models of childbirth, indigenous and foreign approaches, and notions of "before" and "after" can be potent but problematic. The difficulties entailed confront public health programs concerned with practical issues of infant and maternal survival in developing countries as well as scholarly analyses of birthing in cross-cultural contexts. The introduction analyzes central concepts and themes: questions of survival, safety, and well-being; the significance of postures, practices, and sites; the role of midwives, traditional birth attendants, and nurses; and the role of men in birthing and reproduction. Contributors--four anthropologists, a historian, and a community health worker--offer insights into the ways mothers, midwives, and nurses relate the traditional and the modern, and how ideas of tradition and modernity have shaped representations of Pacific childbirth. The conclusion provides researchers with a guide to relevant literature from several disciplines. As a whole the collection warns against either a celebration of emancipation through biomedicine or a recuperative romance about women's past powers in reproduction. Contributors: Ruta Fiti-Sinclair, Margaret Jolly, Vicki Lukere, Shelley Mallett, Helen Morton, Christine Salomon.

One of the leading textbooks in its field, Bringing Fossils to Life applies paleobiological principles to the fossil record while detailing the evolutionary history of major plant and animal phyla. It incorporates current research from biology, ecology, and population genetics, bridging the gap between purely theoretical paleobiological textbooks and those that describe only invertebrate paleobiology and that emphasize cataloguing live organisms instead of dead objects. For this third edition Donald R. Prothero has revised the art and research throughout, expanding the coverage of invertebrates and adding a discussion of new methodologies and a chapter on the origin and early evolution of life.
