What's your favorite cookie (or biscuit, for any British baking show buffs)? Chocolate chip, ginger spice, or Oreo? Oatmeal-and-raisin, black-and-white, digestive, or florentine? Or do you just prefer the dough? Our choice biscuits and cookies are as diverse as the myriad forms and flavors these chewy treats take, and well they should be. These baked delights have a history as rich as their taste: evidence of biscuit-making dates back to around 4000 BC. In Biscuits and Cookies, Anastasia Edwards explores the delectable past of these versatile snacks, from their earliest beginnings through Middle Eastern baking techniques, to cookies of Northern Europe in the Middle Ages, and on into the New World. From German lebkuchen to the animal cracker (more than half a billion of which are produced each year in the United States alone), from brownies and sugar cookies in the United States to shortbread and buttery tea biscuits in the United Kingdom, to Anzac and Girl-Guide biscuits in New Zealand and Australia, this book is crammed with biscuit and cookie facts, stories, images, and recipes from around the world and across time. And there's no need to steal from the cookie jar.

The first edition of Duncan Manley's reference book Technology of biscuits, crackers and cookies quickly established itself as the essential reference for anyone involved in the manufacture of biscuits, cookies and crackers. The publication of a fully revised and updated new edition will be warmly welcomed by this important industry. It is almost ten years since the publication of the second edition of this book. The pace of change witnessed by the food industry over the last decade more than justifies the publication of a fully revised and updated third edition. The increasing importance of safety and quality issues has led to a new chapter on TQM and HACCP. Another significant development in the past ten years has been the demand from consumers for increasingly innovative and nutritionally valuable foods. Manley has extensively revised and expanded the sections on product development and included new material on nutritional issues to enable manufacturers to meet these
