The essays gathered in *Haiti's Literary Legacies* unpack the theoretical, historical, and political resonance of the Haitian revolution across a multiplicity of European and American Romanticisms, and include discussion of Haitian, British, French, German, and U.S. American traditions. Often referred to as the only successful slave revolt in history, the revolution that forged Haiti at once fulfilled, challenged, and ultimately surpassed Enlightenment conceptions of freedom and universality in ways that became crucial to transnational Romanticism, yet scholars and historians of Romanticism are only beginning to take the measure of its impact. This collection works at the intersection of Romantic and Caribbean studies to move that project forward, showing the myriad ways that literatures of the Romantic period respond to-and are transformed by-the Revolution in Haiti. Demonstrating the Revolution's centrality to romantic writing, *Haiti's Literary Legacies* urges an enlarged understanding of Romanticism and of its implications for the political, historical, and ecological genealogies of the present.

Our Social World: Introduction to Sociology, Condensed, inspires students to develop their sociological imaginations, to see the world and personal events from a new perspective, and to confront sociological issues on a day-to-day basis. The award-winning author team of Jeanne H. Ballantine, Keith A. Roberts, and Kathleen Odell Korgen organizes the text around the "Social World Model," a conceptual framework that demonstrates the relationships among individuals (the micro level); organizations, institutions, and subcultures (the meso level); and societies and global structures (the macro level). The application of this model across chapters helps students practice using the three levels of analysis and view sociology as an integrated whole rather than a set of discrete subjects. The Fifth Edition of the Condensed version is adapted from Our Social World: Introduction to Sociology and is one-third shorter by streamlining boxes and the main narrative, and combining four chapters into two (Family/Education, and Politics/Economics). New and Key Features A new full-length chapter on health, illness, and healthcare has been added. Several chapters have been reorganized with updated data, added studies, and newly emerging emphases in sociology. Six new "Sociologists in Action" features added. Four new "Engaging Sociology" features added with new opportunities for data analysis by students. 100 new or updated Tables and Figures, nearly 500 new references, and dozens

The African American Male School Adaptability Crisis (AMSAC) cannot be solved

by the school alone. It is a race problem which can only be solved if we black males provide the leadership in tackling our three major demons which now mainly account for the problem: IQ lag-fatherless families-crime. AMSAC had its origin about 100 years ago when, after the death of Washington, DuBois gained ascendancy in our African American Garden of Eden and replaced Washington's brains, property, and character gospel with a civil rights agenda. That agenda has led to a civil-rights fixation and our second bondage, Victimology, wherein being the victim has become part of our core identity and made us psychological slaves. Rather than being proud and self-reliant, disproportionately, we have come to see ourselves as victims who are entitled to system help and special treatment. This bondage – and it is a bondage -- vitiates our manhood and the energy and drive required to pursue the adaptation pathway paved by Washington, but demonized by DuBois. Return to that pathway and we can confront and conquer AMSAC and our three major demons. Guided by history and the research evidence, this book details how. Its 20 chapters make for long reading, but, just by reading the first and last chapters, you can get the message. The motto of the proposed evidence-based experimental program, the African American Male Career Pathway Program (AMCAP). proposed high school student clubs (Student AMCAPs) in its implementation. This innovative study uses rich new evidence from the UK to explore university life and examine how ideas about Islam and Muslim identities are produced on campus.

In *Sociology: Exploring the Architecture of Everyday Life*, Eleventh Edition, David M. Newman continues to show students how to see the “unfamiliar in the familiar”—to step back and see organization and predictability in their take-for-granted personal experiences. With his approachable writing style and lively personal anecdotes, the author’s goal since the first edition has been the same: to write a textbook that “reads like a real book.” Newman uses the metaphors of “architecture” and “construction,” to help students understand that society is not something that exists “out there,” independently of them; it is a human creation that is planned, formed, maintained, or altered by individuals. Using vivid prose, current examples, and fresh data, this text presents a unique and thought-provoking overview of how society is constructed and experienced. Instead of surveying every subfield in sociology, the more streamlined coverage focuses on the individual and society, the construction of self and society, and social inequality in the context of social structures.

While masculinities theory has had much to say on relationships of subordination,

few feminist legal scholars have examined the implications of masculinities theory for feminist legal theory. This volume investigates the ways in which emerging masculinities theory in law could inform feminist legal theory in particular and law in general. As many of the chapters in this collection illustrate, law is constantly in a dynamic interaction with masculinities: it has both influenced existing masculinities and has been influenced by those masculinities. The contributions focus feminist and critical theoretical attention on masculinities and consider the implications of masculinities theory for law and legal theory. The book sets out the theoretical trajectory of masculinities studies as a field and its application in law and uses insights from a masculinities approach to study socio-political construction of gender identities in specific settings. It also explores how understanding historical construction of gender identities can inform more effective public policy and activism. Written by leading experts in the area, the book poses important questions about the development of the relationship between feminisms and masculinities theory and will be essential reading for those working in law and gender and related areas.

his stride. This is a meditation, a sonnet, a legal brief, a poetry slam and a dissertation that represents the full bloom of his early thesis: The justice system does not work for blacks, particularly black men.” —The Washington Post “The most readable and provocative account of the consequences of the war on drugs since Michelle Alexander’s *The New Jim Crow* . . . .” —The New York Times Book Review “Powerful . . . deeply informed from a legal standpoint and yet in some ways still highly personal” —The Times Literary Supplement (London) With the eloquence of Ta-Nehisi Coates and the persuasive research of Michelle Alexander, a former federal prosecutor explains how the system really works, and how to disrupt it Cops, politicians, and ordinary people are afraid of black men. The result is the *Chokehold*: laws and practices that treat every African American man like a thug. In this explosive new book, an African American former federal prosecutor shows that the system is working exactly the way it’s supposed to. Black men are always under watch, and police violence is widespread—all with the support of judges and politicians. In his no-holds-barred style, Butler, whose scholarship has been featured on *60 Minutes*, uses new data to demonstrate that white men commit the majority of violent crime in the United States. For example, a white woman is ten times more likely to be raped by a white male acquaintance than be the victim of a violent crime perpetrated by a black man. Butler also frankly discusses the problem of black on black violence and how to keep communities safer—without relying as much on police. *Chokehold* powerfully demonstrates why current efforts to reform law enforcement will not create lasting change. Butler’s controversial recommendations about how to crash the system, and when it’s better for a black man to plead guilty—even if he’s innocent—are sure to be game-changers in the national debate about policing, criminal justice, and race relations.

Scholarly engagement with the magazine form has, in the last two decades, produced a substantial amount of valuable research. Authored by leading academic authorities in the study of magazines, the chapters in *The Routledge Handbook of Magazine Research* not only create an architecture to organize and archive the developing field of magazine research, but also suggest new avenues of future investigation. Each of 33 chapters surveys the last 20 years of scholarship in its subject area, identifying the major research themes, theoretical developments and interpretive breakthroughs. Exploration of the digital challenges and opportunities which currently face the magazine world are woven throughout, offering readers a deeper understanding of the magazine form, as well as of the sociocultural realities it both mirrors and influences. The book includes six sections: -Methodologies and structures presents theories and models for magazine research in an evolving, global context. -Magazine publishing: the people and the work introduces the roles and practices of those involved in the editorial and business sides of magazine publishing. -Magazines as textual communication surveys the field of contemporary magazines across a range of theoretical perspectives, subjects, genre and format questions. -Magazines as visual communication explores cover design, photography, illustrations and interactivity. -Pedagogical and curricular perspectives offers insights on undergraduate and graduate teaching topics in magazine research. -The future of the magazine form speculates on the changing nature of magazine research via its environmental effects, audience, and transforming platforms.

Join the conversation with one of sociology's best-known thinkers. *Essentials of Sociology, Second Edition* adapted from George Ritzer's *Introduction to Sociology, Third Edition*, provides the same rock-solid foundation in a shorter and more streamlined format. Like the

original Ritzer text, *Essentials of Sociology* illuminates traditional sociological concepts and theories, and focuses on some of the most compelling contemporary social phenomena: globalization, consumer culture, the Internet, and the “McDonaldization” of society. As technology flattens the globe, students are challenged to apply a sociological perspective to their world, and to see how “public” sociologists are engaging with the critical issues of today. This book shows how the dynamic interplay of a powerful "golden triangle" of sports, media, and business interests with social, cultural, economic, and political forces shapes sport in a changing world. This edition is a condensed and updated version of the first edition, with an emphasis on current social issues in sport. It also has more global content. The golden triangle concept is more developed and applied more extensively. Other key themes of the first edition—power, status, and inequality—are also more developed. New "Stop and Think Questions" have been added to challenge students to think about the meaning of what they have read. The book is now divided into five sections. The new sections highlight sociology and the sociology of sport; inequality and diversity; globalization and social deviance; major social contexts of sport, including the high school, college, and professional levels; and power, political economy, and global sports.

One teenager in a skirt. One teenager with a lighter. One moment that changes both of their lives forever. If it weren't for the 57 bus, Sasha and Richard never would have met. Both were high school students from Oakland, California, one of the most diverse cities in the country, but they inhabited different worlds. Sasha, a white teen, lived in the middle-class foothills and attended a small private school. Richard, a black teen, lived in the crime-plagued flatlands and attended a large public one. Each day, their paths overlapped for a mere eight minutes. But

one afternoon on the bus ride home from school, a single reckless act left Sasha severely burned, and Richard charged with two hate crimes and facing life imprisonment. The 57 Bus is Dashka Slater's true account of the case that garnered international attention and thrust both teenagers into the spotlight.

From *The Real Housewives of Atlanta* to *Flavor of Love*, reality shows with predominantly black casts have often been criticized for their negative representation of African American women as loud, angry, and violent. Yet even as these programs appear to be rehashing old stereotypes of black women, the critiques of them are arguably problematic in their own way, as the notion of “respectability” has historically been used to police black women’s behaviors. The first book of scholarship devoted to the issue of how black women are depicted on reality television, *Real Sister* offers an even-handed consideration of the genre. The book’s ten contributors—black female scholars from a variety of disciplines—provide a wide range of perspectives, while considering everything from *Basketball Wives* to *Say Yes to the Dress*. As regular viewers of reality television, these scholars are able to note ways in which the genre presents positive images of black womanhood, even as they catalog a litany of stereotypes about race, class, and gender that it tends to reinforce. Rather than simply dismissing reality television as “trash,” this collection takes the genre seriously, as an important touchstone in ongoing cultural debates about what constitutes “trashiness” and “respectability.” Written in an accessible style that will appeal to reality TV fans both inside and outside of academia, *Real Sister* thus seeks to inspire a more nuanced, thoughtful conversation about the genre’s representations and their effects on the black community.

Frederick Douglass called the martyred president "emphatically the black man's president" as

well as “the first who rose above the prejudice of his times and country.” This narrative history of Lincoln’s personal interchange with Black people over the course his career reveals a side of the sixteenth president that, until now, has not been fully explored or understood. In a little-noted eulogy delivered shortly after Lincoln's assassination, Frederick Douglass called the martyred president “emphatically the black man's president,” the “first to show any respect for their rights as men.” To justify that description, Douglass pointed not just to Lincoln's official acts and utterances, like the Emancipation Proclamation or the Second Inaugural Address, but also to the president’s own personal experiences with Black people. Referring to one of his White House visits, Douglass said: “In daring to invite a Negro to an audience at the White House, Mr. Lincoln was saying to the country: I am President of the black people as well as the white, and I mean to respect their rights and feelings as men and as citizens.” But Lincoln’s description as “emphatically the black man’s president” rests on more than his relationship with Douglass or on his official words and deeds. Lincoln interacted with many other African Americans during his presidency His unflinching cordiality to them, his willingness to meet with them in the White House, to honor their requests, to invite them to consult on public policy, to treat them with respect whether they were kitchen servants or leaders of the Black community, to invite them to attend receptions, to sing and pray with them in their neighborhoods—all those manifestations of an egalitarian spirit fully justified the tributes paid to him by Frederick Douglass and other African Americans like Sojourner Truth, who said: “I never was treated by any one with more kindness and cordiality than were shown to me by that great and good man, Abraham Lincoln.” Historian David S. Reynolds observed recently that only by examining Lincoln’s “personal interchange with Black people do we see the complete falsity of the

charges of innate racism that some have leveled against him over the years.”

In 2009, Chicago spent millions of dollars to create programs to prevent gang violence in some of its most disadvantaged neighborhoods. Yet in spite of the programs, violence has grown worse in some of the very neighborhoods that the violence prevention programs were intended to help. While public officials and social scientists often attribute the violence - and the failure of the programs - to a lack of community in poor neighborhoods, closer study reveals another source of community division: local politics. Through an ethnographic case study of Chicago's Little Village neighborhood, *Wounded City* dispels the popular belief that a lack of community is the primary source of violence, arguing that competition for political power and state resources often undermine efforts to reduce gang violence. Robert Vargas argues that the state, through the way it governs, can contribute to distrust and division among community members, thereby undermining social cohesion. The strategic actions taken by police officers, politicians, nonprofit organizations, and gangs to collaborate or compete for power and resources can vary block by block, triggering violence on some blocks while successfully preventing it on others. A rich blend of urban politics, sociology, and criminology, *Wounded City* offers a cautionary tale for elected officials, state agencies, and community based organizations involved with poor neighborhoods.

A bold, incisive look at race and reparative writing in American fiction, by the author of *Your Face in Mine* *White Flights* is a meditation on whiteness in American fiction and culture from the end of the civil rights movement to the present. At the heart of the book, Jess Row ties “white flight”—the movement of white Americans into segregated communities, whether in suburbs or newly gentrified downtowns—to white writers setting their stories in isolated or emotionally insulated landscapes, from the mountains of Idaho in Marilynne Robinson’s *Housekeeping* to the claustrophobic households in Jonathan

Franzen's *The Corrections*. Row uses brilliant close readings of work from well-known writers such as Don DeLillo, Annie Dillard, Richard Ford, and David Foster Wallace to examine the ways these and other writers have sought imaginative space for themselves at the expense of engaging with race. *White Flights* aims to move fiction to a more inclusive place, and Row looks beyond criticism to consider writing as a reparative act. What would it mean, he asks, if writers used fiction "to approach each other again"? Row turns to the work of James Baldwin, Dorothy Allison, and James Alan McPherson to discuss interracial love in fiction, while also examining his own family heritage as a way to interrogate his position. A moving and provocative book that includes music, film, and literature in its arguments, *White Flights* is an essential work of cultural and literary criticism. Inspire your students to develop their sociological imaginations in *Our Social World*. Focused on deep learning rather than memorization, this book encourages readers to analyze, evaluate, and apply information about the social world; to see the connection between the world and personal events from a new perspective; and to confront sociological issues on a day-to-day basis. Organized around the "Social World Model", a conceptual framework used across chapters to see the complex links between various micro- to macro-levels of the social system, students will develop the practice of using three levels of analysis, and to

view sociology as an integrated whole, rather than a set of discrete subjects. This book provides critical insights into the many, often overlooked, challenges and societal issues that face contemporary black men, focusing in particular on the ways in which governing societal expectations result in internal and external constraints on black male identity formation, sexuality and black 'masculine' expression. Presenting new interview and auto-ethnographic data, and drawing on an array of theoretical approaches methodologies, *Hyper Sexual, Hyper Masculine?* explores the formation of gendered and sexual identity in the lives of black men, shedding light on the manner in which these are affected by class and social structure. It examines the intersecting oppressions of race, gender and class, while acknowledging and discussing the extent to which black men's social lives differ as a result of their varying degrees of cumulative disadvantage. A wide-ranging and empirically grounded exploration of the intersecting roles of race, masculinity, and sexuality on the lives of black men, this volume will appeal to scholars across the social sciences with interests in race and ethnicity, gender and sexuality, social stratification and intersectionality.

Race and separate races of human beings do not exist. They are a myth. Yet, racism is very real. Because racism is the namesake of something that does not exist, there is general confusion about what it actually is. This confusion has served to protect racism, and even reinforce it. By reviewing the entire history of racism, this book shows exactly what racism is: a subjective system of ranking groups of people and the belief that there is a natural social order of those groups. The lie of inferior and superior groups of people originated as a justification for slavery. Plantation owners, lawmakers, and scientists carefully nurtured the myth until long after slavery had ended. It has survived for centuries and continues to be used to separate people. Every white person needs to be aware of that history in order to understand how the myth of race and a hierarchy of humanity lingers in each of us and in all of our institutions.

Youth unemployment in the UK remains around the one million mark, with many young people from impoverished backgrounds becoming and remaining NEET

## Online Library Black Men Magazine January 2013 Karlie Red From Love And Hip Hop On Cover Vol 15 6 Charm Killings

(Not in Education, Employment, or Training). However, the NEET categorisation covertly disguises and obscures the significance of the diverse range of activities, achievements and accomplishments of those who operate in the informal creative economy. With grime music and its related enterprise a key component of the urban music economy, this book employs the inherent contradictions and questions that emerge from an exploration of the grime music scene to build a complex reading of the socio-economic significance of urban music.

Incorporating insightful dialogue with the participants in this economy, White challenges the prevailing wisdom on marginalised young people, whilst also confronting the assumption that the inertia and localisation of the grime culture results from its close links to NEET "members" and the informal sector. Offering an ethnographic and timely critique of the NEET classification, this compelling book would be suitable for undergraduate and post-graduate students interested in urban studies, business, work and labour, education and employment, ethnography, music, and cultural studies.

In the country's changing threat environment, homegrown violent extremism (HVE) represents the next challenge in counterterrorism. risk of homegrown terrorism. Drawing on scholarly insight and more than three decades on the front lines of America's security efforts, Southers challenges the misplaced counterterrorism focus on foreign individuals and communities. As Southers shows, there is no true profile of a terrorist. The book challenges how Americans think about terrorism, recruitment, and the homegrown threat. It contains essential information for communities, security practitioners, and policymakers on how violent extremists exploit vulnerabilities in their communities and offers approaches to put security theory into practice.

Threshold Concepts in Women's and Gender Studies: Ways of Seeing, Thinking, and Knowing is a textbook designed primarily for introduction to Women's and Gender Studies courses with the intent of providing both skills- and concept-based foundation in the field. The text is driven by a single key question: "What are the ways of thinking, seeing, and knowing that characterize Women's and Gender Studies and are valued by its practitioners?" Rather than taking a topical approach, Threshold Concepts develops the key concepts and ways of thinking that students need in order to develop a deep understanding and to approach material like feminist scholars do, across disciplines. This book illustrates four of the most critical concepts in Women's and Gender Studies—the social construction of gender, privilege and oppression, intersectionality, and feminist praxis—and grounds these concepts in multiple illustrations. The second edition includes a significant number of updates, revisions, and expansions: the case studies in all five chapters have been revised and expanded, as have the

end of chapter elements, statistics have been updated, and numerous references to significant news stories and cultural developments of the past three years have been added. Finally, many more "callbacks" to previous chapters have been incorporated throughout the textbook in order to remind students to carry forward and build upon what they have learned about each threshold concept even as they move on to a new one.

Television scholarship has substantially ignored programming aimed at Black audiences despite a few sweeping histories and critiques. In this volume, the first of its kind, contributors examine the televisual diversity, complexity, and cultural imperatives manifest in programming directed at a Black and marginalized audience. *Watching While Black* considers its subject from an entirely new angle in an attempt to understand the lives, motivations, distinctions, kindred lines, and individuality of various Black groups and suggest what television might be like if such diversity permeated beyond specialized enclaves. It looks at the macro structures of ownership, producing, casting, and advertising that all inform production, and then delves into television programming crafted to appeal to black audiences—historic and contemporary, domestic and worldwide. Chapters rethink such historically significant programs as *Roots* and *Black Journal*, such seemingly innocuous programs as *Fat Albert* and *bro'Town*, and such contemporary and culturally complicated programs as *Noah's Arc*, *Treme*, and *The Boondocks*. The book makes a case for the centrality of these programs while always recognizing the racial dynamics that continue to shape Black representation on the small screen. Painting a decidedly introspective portrait across forty years of Black television, *Watching While Black* sheds much-needed light on under-examined demographics, broadens common audience considerations, and gives deference to the the preferences of audiences

and producers of Black-targeted programming.

"America the Great" is the result of five years' research and writing that began in late 2009 in response to the contemporary American "tea party" movement and criticisms that the movement's participants did not know the history and theory of the original 1773 Boston Tea Party from which the modern movement takes its name. The extensive library of original books, newspapers, magazines, etc., now available (primarily via "google books") to anyone over the Internet, means that researchers have available to them the university libraries of the world. The availability of accurate original documents made it possible to expand the original scope of research into other historical events, and into other countries (primarily Great Britain), and enabled the work to develop into a more general examination of theories of human dignity, and of the differing conception of government that arises depending on the conception of human dignity that is characteristic of the people that is creating that government.

An estimated four hundred gold records have been recorded in the Muscle Shoals area. Many of those are thanks to Muscle Shoals Sound Studio and the Muscle Shoals Rhythm Section, dubbed "the Swampers." Some of the greatest names in rock, R&B and blues laid tracks in the original, iconic concrete-block building--the likes of Cher, Lynyrd Skynyrd, the Rolling Stones and the Black Keys. The National Register of Historic Places now recognizes that building, where Lynyrd Skynyrd recorded the original version of "Free Bird" and the Rolling Stones wrote "Brown Sugar" and "Wild Horses." By combing through decades of articles and music reviews related to Muscle Shoals Sound, music writer Carla Jean Whitley reconstructs the fascinating history of how the Alabama studio created a sound that reverberates across generations.

The Intersection of Star Culture in America and International Medical Tourism: Celebrity Treatment argues that celebrity cases and media content drive awareness of medical tourism among Americans at a time when the medical system is under intense scrutiny. By popularizing international sites for treatment, procedures not available in the US, and different approaches to patient care, media narratives present options for health care, triggering dialogue on one of America's most important human welfare issues.

A large body of research has established a causal relationship between experiences of racial discrimination and adverse effects on mental and physical health. In *Measuring the Effects of Racism*, Robert T. Carter and Alex L. Pieterse offer a manual for mental health professionals on how to understand, assess, and treat the effects of racism as a psychological injury. Carter and Pieterse provide guidance on how to recognize the psychological effects of racism and racial discrimination. They propose an approach to understanding racism that connects particular experiences and incidents with a person's individual psychological and emotional response. They detail how to evaluate the specific effects of race-based encounters that produce psychological distress and possibly impairment or trauma. Carter and Pieterse outline therapeutic interventions for use with individuals and groups who have experienced racial trauma, and they draw attention to the importance of racial awareness for practitioners. The book features a racial-trauma assessment toolkit, including a race-based traumatic-stress symptoms scale and interview schedule. Useful for both scholars and practitioners, including

social workers, educators, and counselors, *Measuring the Effects of Racism* offers a new framework of race-based traumatic stress that helps legitimize psychological reactions to experiences of racism.

Written by leading experts in the area, this volume investigates the ways in which emerging masculinities theory in law could inform feminist legal theory in particular and law in general. As many of the chapters in this collection illustrate, law is constantly in a dynamic interaction with masculinities: it has both influenced existing masculinities and has been influenced by those masculinities. The contributions focus feminist and critical theoretical attention on masculinities and consider the implications of masculinities theory for law and legal theory. The authors bring you in this edited volume a collection of essays that address the relationship between racial violence, media, the criminal justice system, and education. This book is unique in that it brings together the perspectives of university professors, artists, poets, community activists, classroom teachers, and legal experts. With the Trayvon Martin murder and legal proceedings at the center of reflection and analysis, authors poignantly provide insight into how racial violence is institutionalized and consumed by the mass public. Authors borrow from educational theory, history, gender studies, sociology, cultural studies, the arts, legal scholarship, and personal reflection to begin the dialogue on how to move toward education for racial and social justice. The book is recommended for secondary educators, community organizers, undergraduate and graduate social science and education courses.

An essential guide for Black Americans to understanding the criminal justice system, and why it continues to see Black men as targets and as dollar signs. *Justice While Black* is a must-read for every young Black male in America—and for everyone else who cares about their

survival and well-being. The book provides practical, straightforward advice on how to deal with specific legal situations: the threat of arrest, being arrested, being in custody, preparing for and undergoing a trial, and navigating the appeals and parole process. The primary goal of this book is to become a primer for African Americans on how to avoid becoming ensnared in the criminal justice system. While the precarious safety of Black males has received renewed interest in the past year because of the deaths of young men like Daunte Wright and Ryan LeRoux, the fact is that this group has always been under threat from the armed guardians of the White social order. The tactics have been modernized, but the impact is still devastating—we are witnessing an epic criminalization of the African-American community at levels never before seen since the end of slavery.

This book examines the varied ways in which Minister Farrakhan's Resurrected Nation of Islam appeals to men from different backgrounds. Dawn-Marie Gibson investigates a number of themes including faith, family, and community, making use of archival research and engaging in-depth interviews. The book considers the multifaceted ways in which men encounter the Nation of Islam (NOI) and navigate its ethics and gender norms. Gibson describes and dissects the factors that attract men to the NOI, while also considering the challenges that these men confront as new converts. She discusses the various inter-faith and community outreach efforts that men engage in and assesses their work with both their Christian and Muslim counterparts. To conclude its discussion, the book takes a look at the NOI's 2015 Justice or Else March to commemorate the twentieth anniversary of the Million Man March in Washington, DC.

protections, from gay marriage to hate crimes, is increasingly put in question. It assembles writings that explore the new queer vitalities within their wider context of structural violence and neglect. Moving between diverse geopolitical contexts – the US and the UK, Guatemala and Palestine, the Philippines, Iran and Israel – the chapters in this volume interrogate claims to queerness in the face(s) of death, both spectacular and everyday. *Queer Necropolitics* mobilises the concept of ‘necropolitics’ in order to illuminate everyday death worlds, from more expected sites such as war, torture or imperial invasion to the mundane and normalised violence of racism and gender normativity, the market, and the prison-industrial complex. Contributors here interrogate the distinction between valuable and pathological lives by attending to the symbiotic co-constitution of queer subjects folded into life, and queerly abjected racialised populations marked for death. Drawing on diverse yet complementary methodologies, including textual and visual analysis, ethnography and historiography, the authors argue that the distinction between ‘war’ and ‘peace’ dissolves in the face of the banality of death in the zones of abandonment that regularly accompany contemporary democratic regimes. The book will appeal to activist scholars and students from various social sciences and humanities, particularly those across the fields of law, cultural and media studies, gender, sexuality and intersectionality studies, race, and conflict studies, as well as those studying nationalism, colonialism, prisons and war. It should be read by all those trying to make sense of the contradictions inherent in regimes of rights, citizenship and diversity.

she touches the third rail in American politics, attacking the immigration issue head-on and flying in the face of La Raza, the Democrats, a media determined to cover up immigrants' crimes, churches that get paid by the government for their "charity," and greedy Republican businessmen and campaign consultants—all of whom are profiting handsomely from mass immigration that's tearing the country apart. Applying her trademark biting humor to the disaster that is U.S. immigration policy, Coulter proves that immigration is the most important issue facing America today.
