Children are the foundation of the United States, and supporting them is a key component of building a successful future. However, millions of children face health inequities that compromise their development, well-being, and long-term outcomes, despite substantial scientific evidence about how those adversities contribute to poor health. Advancements in neurobiological and socio-behavioral science show that critical biological systems develop in the prenatal through early childhood periods, and neurobiological development is extremely responsive to environmental influences during these stages. Consequently, social, economic, cultural, and environmental factors significantly affect a child's health ecosystem and ability to thrive throughout adulthood. Vibrant and Healthy Kids: Aligning Science, Practice, and Policy to Advance Health Equity builds upon and updates research from Communities in Action: Pathways to Health Equity (2017) and From Neurons to Neighborhoods: The Science of Early Childhood Development (2000). This report provides a brief overview of stressors that affect childhood development and health, a framework for applying current brain and development science to the real world, a roadmap for implementing tailored interventions, and recommendations about improving systems to better align with our understanding of the significant impact of health equity.

This stunning book introduces the world to some of the very special and gifted children who were described in Meg Blackburn Losey's The Children of Now. The Children of Now changed paradigms of how we raise, teach, and nurture our children, and created awareness that ADD, ADHD, and autism just might not be what we thought. The book touched parents, teachers, and caregivers all over the world. Now, in Conversations With the Children of Now, Dr. Meg goes even further to spotlight some of the Children of Now and others who have come forward since the first book was released. Intricately woven conversations with Indigo Children, Crystalline Children, Star Kids, and Transitional Kids reveal the hearts and souls of our future generation. These real children share their feelings and perceptions about themselves and our world. Hear, in their own words: Who they really are.

Where they come from. Why they are here, and what they have come to share with humanity. What they know about God, and about Living and Dying. What they know about the healing of hearts and souls, and of bodies and minds. What will happen in the 2012 shift. These children speak about past lives, other worlds, forgotten gifts, and unconditional love as a way of being. They show how we can change our world with grace. They also reveal how we can guide them, nurture them, and allow them to become the great human beings they were destined to become!

From two of the world's top scientists and one of the world's top science writers (all parents), *Dirt Is Good* is a q&a-based guide to everything you need to know about kids & germs. "Is it OK for my child to eat dirt?" That's just one of the many questions authors Jack Gilbert and Rob Knight are bombarded with every week from parents all over the world. They've heard everything from "My two-year-old gets constant ear infections. Should I give her antibiotics? Or probiotics?" to "I heard that my son's asthma was caused by a lack of microbial exposure. Is this true, and if so what can I do about it now?" Google these questions, and you'll be overwhelmed with answers. The internet is rife with speculation and misinformation about the risks and benefits of what most parents think of as simply germs, but which scientists now call the microbiome: the combined activity of all the tiny organisms inside our bodies and the surrounding environment that have an enormous impact on our health and well-being. Who better to turn to for answers than Drs. Gilbert and Knight, two of the top scientists leading the investigation into the microbiome—an investigation that is producing fascinating discoveries and bringing answers to parents who want to do the best for their young children. *Dirt Is Good* is a comprehensive, authoritative, accessible guide you've been searching for.

Drawing on interview data, the authors describe K-3 students' knowledge and thinking about basic aspects of the social world that are addressed in the elementary social studies curriculum. The interviews focused on human activities relating to nine cultural universals that are commonly addressed in the elementary social studies curriculum: food, clothing, shelter, communication, transportation, family living, childhood, money, and government. This volume synthesizes findings from the research and discusses their implications for curriculum and instruction in early social studies. *Children's Thinking About Cultural Universals* significantly expands the knowledge base on developments in children's social knowledge and thinking and, in addition, provides a wealth of information to inform social studies educators' and curriculum developers' efforts to match instruction to students' prior knowledge, both by building on already developed valid knowledge and by addressing common misconceptions. It represents a quantum leap in the availability of information on the trajectories of children's knowledge about common topics in primary elementary social studies education.

This book provides teacher-tested tips on organizing, teaching journalism skills, layout, and publication for school newspaper advisors for grades 5-8. The book contains a variety of reproducibles and a handy glossary to help motivate real-life writing experiences. It also has computer clip art on a disc. The book notes that publishing a newspaper fulfills many of the needs of a good writing program and offers other benefits, among those: student and faculty readership provides a real audience on an ongoing basis; deadlines hold students responsible and accountable; editing and rewriting (process-writing skills) are important parts of newspaper work; and in school newspapers, students have a voice--responsible articles and editorials can impact their lives in school. The book offers sections on organizing the classroom, the students, and the newspaper, as well as many useful blank forms. The book also gives suggestions for layout and design, photography, generating--and funding--the newspaper, and a budget worksheet. A resource section gives a list of five organizations, three books, six software programs, and three companies that produce specially designed paper. (CR)
