An unprecedented exploration of Gauguin's works in various media, from works on paper to clay and furniture Paul Gauguin (1848-1903) was a creative force above and beyond his legendary work as a painter. Beautifully designed and illustrated, this book includes essays by an international team of scholars who offer a rich analysis of Gauguin's oeuvre beyond painting. Beginning in the 1950s, Pablo Picasso concerned himself intensely with the linocut, creating a veritable cosmos of bullfighting scenes, mythological images, and abstract

portraits. Neglected for many years, this traditional printmaking technique--which effectively combined his talent as a draftsman with his expressive use of color--was consequently to experience a renaissance. On par with his paintings in their coloristic effects, Picasso's linocuts convey both the mature tone of the late Picasso and the almost youthful buoyancy of an artist of over seventy years who once more found himself the eager apprentice of a new technique. And with his experimental approach to the new medium--as shown by countless artist's and trial proofs, many of which are included here--Picasso helped to establish the linocut in the modern-day art world as a professional printmaking technique. In addition to exploring Picasso's unconventional handling of the linocut, this volume--created to accompany an exhibition this year at the Kunstmuseum Pablo Picasso in Münster--also recounts the history of the linocut and the biographical circumstances under which Picasso created his works. Included in this lavish volume are more than one hundred illustrations of the vibrant prints Picasso created between 1954 and 1968. Many are among the artist's most defining work and demonstrate his lifelong ability to engage with virtually any medium and to make it his own.

Your shirt will be stained anyways. At some point, you will harness the power of the sun. Go ahead, look inside. You will see that you do not need a fancy studio to print a T-shirt or a picnic blanket. There is no specialized machine required to print anything you want in any room you want. A mural, a dartboard, a deck of cards, these are all possible. In a week or a month, you will wake up to find you know words like acetate and substrate. You will be comfortable talking about ink and shopping at military supply stores. Perhaps most important of all, you will be printing images of things onto other things.
