Headphones can be considered loudspeakers that were specifically created to be placed over the ears of user's. They are electrical devices that convert electrical signals into sounds to be heard by the user. The main function of a headphone is to provide users with the ability to use them to privately listen to audio recordings. This is in direct contrast to a speaker that allows everyone in close proximity to hear the sound. Sometimes headphones can be referred to as ear speakers. There are many different types of headphones that have different audio reproduction abilities. They range from lightweight ear buds to heavy bass-pumping full-sized headphones that produce amazing output. These can offer a range of sound that, to date has remained a phenomenon. It allows audiophiles to hear every sound note and accurately identify every pitch. The average user will unlikely be able to differentiate the various sounds and pitches. An experienced listener, however, is more likely to easily identify the difference.

Inspiration and practical tips for runners who prioritize enjoyment over pace and embrace their place as an "average" runner In her first book, popular runner blogger Amanda Brooks lays out the path to finding greater fulfillment in running for those who consider themselves "middle of the pack runners" -- they're not trying to win Boston (or even qualify for Boston); they just want to get strong and stay injury-free so they can continue to enjoy running. Run to the Finish is not your typical running book. While it is filled with useful strategic training advice throughout, at its core, it is about embracing your place in the middle of the pack with humor and learning to love the run you've got without comparing yourself to other runners. Mixing practical advice like understanding the discomfort vs. pain, the mental side of running, and movements to treat the most common injuries with more playful elements such as "Favorite hilarious marathon signs" and "Weird Thoughts We all Have at the Start Line," Brooks is the down-to-earth, inspiring guide for everyone who wants to be happier with their run.

Del Sol, New Mexico is known for three things: its fry-an-egg-on-the-cement summers, strong cups of coffee—and, now, a nationwide manhunt? Del Sol native Sunshine Vicram has returned to town as the elected sheriff—thanks to her adorably meddling parents who nominated her—and she expects her biggest crime wave to involve an elderly flasher named Doug. But a teenage girl is missing, a kidnapper is on the loose, and all of this is reminding Sunshine why she left Del Sol in the first place. Add to that the trouble at her daughter's new school, plus and a kidnapped prized rooster named Puff Daddy, and, well, the forecast looks anything but sunny. But even clouds have their silver linings. This one's got Levi, Sunshine's sexy, almost-old-flame, and a fiery-hot US Marshal. With temperatures rising everywhere she turns, Del Sol's normally cool-minded sheriff is finding herself knee-deep in drama and danger. Can Sunshine face the call of duty—and find the kidnapper who's terrorizing her beloved hometown—without falling head over high heels in love...or worse?

It's hard to break out of a rut. For years, Nathan submerged himself into his job at St. Genevieve's. He enjoys teaching, hates faculty meetings, loves his science and has committed himself to the cycle of college life. Along the way, he's become resigned to being a gay man in a straight culture, a Jew among Catholics, and single in a world of couples. Then the brilliant Isaac Wolf appears in his classroom. Isaac's a few years older than his fellow students, gorgeous, self-composed and Jewish. Isaac has his own secrets, which Nathan finds out at the racy new club downtown where the boys who dance out front can be bought in the back room. Nathan thinks he's about to get a lap dance, but behind the beaded curtain the man on his knees turns out to be Isaac. Nathan's mind isn't the only thing Isaac blows. Afterward, Nathan can't stop thinking about that night. The question is whether Nathan can let himself fall in love with a student, much less someone with Isaac's checkered past. Is it too late for a student to teach his professor the true nature of love and respect? This is a revised, author's edition of the first Tarnished Souls story, originally published in 2012 by Loose Id.

A comprehensive guide to the conceptual, mathematical, and implementational aspects of analyzing electrical brain signals, including data from MEG, EEG, and LFP recordings. This book offers a comprehensive guide to the theory and practice of analyzing electrical brain signals. It explains the conceptual, mathematical, and implementational (via Matlab programming) aspects of time-, time-frequency- and synchronization-based analyses of magnetoencephalography (MEG), electroencephalography (EEG), and local field potential (LFP) recordings from humans and nonhuman animals. It is the only book on the topic that covers both the theoretical background and the implementation in language that can be understood by readers without extensive formal training in mathematics, including cognitive scientists, neuroscientists, and psychologists. Readers who go through the book chapter by

chapter and implement the examples in Matlab will develop an understanding of why and how analyses are performed, how to interpret results, what the methodological issues are, and how to perform single-subject-level and group-level analyses.

Researchers who are familiar with using automated programs to perform advanced analyses will learn what happens when they click the “analyze now” button. The book provides sample data and downloadable Matlab code. Each of the 38 chapters covers one analysis topic, and these topics progress from simple to advanced. Most chapters conclude with exercises that further develop the material covered in the chapter. Many of the methods presented (including convolution, the Fourier transform, and Euler's formula) are fundamental and form the groundwork for other advanced data analysis methods. Readers who master the methods in the book will be well prepared to learn other approaches.

Curator Jason Connor has a passion for antiquities, so the proposed acquisition of a mysterious ancient statue of Athena raises disturbing questions. What is its origin? Was it really in the family of an English lord, or is there a more sinister history behind it? As a former CIA officer, Jason is no stranger to the craft of intelligence. The leads he develops take him from Los Angeles to Sicily, then into an Italian prison and the private quarters of a London dealer. Soon he uncovers a deep conspiracy that extends closer to home than he could have imagined. Armed with his new knowledge and with colleague Kate Emerson at his side, Jason returns to his own museum, unaware that a heart-pounding pursuit and a deadly trap await him. Arthur Houghton draws on his background as curator of antiquities at the J. Paul Getty Museum and his experience in the US foreign service to create an intricate, informed narrative. A thrilling novel with surprises at every turn, *Dark Athena* explores the meaning of authenticity, the similarities between art and human behavior, and the profound question of who should own mankind's cultural heritage.

NOTE FROM THE AUTHOR I have a head full of information, not all of which is useful. It bothers me that the lyrics for Yummy, Yummy, Yummy, I've Got Love in My Tummy are taking up room that could be occupied by something more life-relevant. Still, I've often found myself the person people come to when they want to know something, but aren't sure where to find it, and I enjoy providing that service. Quora is a great outlet for people like me. I stumbled on the site a little more than a year ago, and almost 600 answered questions later, there's enough material for a book. Law enforcement is a passion for me, not for the power trip or the adrenaline rush, but because it can be a truly noble vocation when done right. People depend on law enforcement officers to protect them from predators, see that the bad guys are held to account for their acts, and establish order out of chaos. The authority that cops have is a sacred public trust. Most officers carry out their duties proudly and honorably, but there will always be a few who abuse that trust. The short essays here are about both sides of that issue. These answers are also about separating some of the myths of police work from the reality. There have been so many dramatic depictions of law enforcement, some of them very realistic and others that seem realistic, that people tend to believe they know how cops work and why they do what they do. Here, I've tried to give you the straight scoop, knowledge accumulated from my own experience and from knowing cops from all over the country and the world. Some of it isn't flattering, but otherwise it wouldn't be honest. I hope you enjoy and benefit from these insights into police work. Tim Dees EXCERPT FROM THE BOOK Is It TRUE That Parking Patrol Officers Can NOT Stop Writing A Ticket Once They Have Started? Some agencies do in fact have a policy that an officer, police, parking or otherwise, can't discard a citation once they have started writing it. Virtually all of them have some process for voiding a citation issued in error once the citation has been issued, but this process is carefully monitored to prevent abuse. Absent a monitored process, the system is easily manipulated. Someone makes a call to a person in the police department who has influence, and that person contacts the officer who issued the ticket. They persuade the officer to void the ticket. If the voided ticket appears to be correct in format, e.g. license plate matches the vehicle description, violation is appropriate for that location, etc. then whoever is in charge of reviewing the voided citations is supposed to follow up and find out if the citation was voided for a legitimate reason or as a favor to someone. Most of the time, when the issuing officer has started the citation form (and many of them are generated via handheld computer these days) and the violator runs up and asks them to stop, the violation is legitimate, and the officer has already looked around for the driver of the vehicle. The typical complaint is "but I was just gone for a minute" (which may or may not be true). In any event, there is seldom a provision in the law for parking there for a minute-you aren't supposed to park there at all. So, in short, it's usually true that the officer is not supposed to stop once they have begun issuing the citation. Buy the book to read more!

Childhood hearing loss is more common than most people assume, and yet this invisible condition can rob a child of the ability to develop close emotional relationships with family and friends. This book demystifies this condition and offers emotionally-supportive approaches to caring for the child and the whole family. It is written from the perspective of a pediatric audiologist who has diagnosed hearing loss in hundreds of newborns and young children, and who has shaped clinical best-practices during his career. Hearing loss is not an "all or nothing" condition, but a range from very subtle, slight challenges, to very little ability to hear. The impact that hearing loss can have on a child's language, intellectual, social and emotional development is enormous. But when the team of healthcare providers, developmental specialists, and parents are all working together, the hearing loss can become just another trait of this wonderful, unique child, rather than the single condition that defines the child and the family's experience raising that child. This book offers an explanation of "what is hearing loss" for parents, describes who is on the team working with the child (and team members' roles), and practical guidance for navigating what can be an uncertain path for families. Any family living with a child with hearing loss will benefit from the gentle guidance and hopeful stories found in this work.

From award-winning author G. Willow Wilson, *The Bird King* is an epic journey set during the reign of the last sultan in the Iberian peninsula at the height of the Spanish Inquisition. G. Willow Wilson's debut novel *Alif the Unseen* was an NPR and Washington Post Best Book of the Year, and it established her as a vital American Muslim literary voice. Now she delivers *The Bird King*, a stunning new novel that tells the story of Fatima, a concubine in the royal court of Granada, the last emirate of Muslim Spain, and her dearest friend Hassan, the palace mapmaker. Hassan has a secret—he can draw maps of places he's never seen and bend the shape of reality. When representatives of the newly formed Spanish monarchy arrive to negotiate the sultan's surrender, Fatima befriends one of the women, not realizing that she will see Hassan's gift as sorcery and a threat to Christian Spanish rule. With their freedoms at stake, what will Fatima risk to save Hassan and escape the palace walls? As Fatima and Hassan traverse Spain with the help of a clever jinn to find safety, *The Bird King* asks us to consider what love is and the price of freedom at a time when the West and the Muslim world were not yet separate.

Rust is a new systems programming language that combines the performance and low-level control of C and C++ with memory safety and thread safety. Rust's modern, flexible types ensure your program is free of null pointer dereferences, double frees, dangling pointers, and similar bugs, all at compile time, without runtime overhead. In multi-threaded code, Rust catches data races at compile time, making concurrency much easier to use. Topics include: How Rust represents values in memory (with diagrams) Complete explanations of ownership, moves, borrows, and lifetimes Cargo, rustdoc, unit tests, and how to publish your code on crates.io, Rust's public package repository High-level features like generic code, closures, collections, and iterators that make Rust productive and flexible Concurrency in Rust: threads, mutexes, channels, and atomics, all much safer to use than in C or C++ Unsafe code, and how to preserve the integrity of ordinary code that uses it Extended examples illustrating how pieces of the language fit together
