Cutting edge scientific research has shown that exposure to the right kind of environment during the first years of life actually affects the physical structure of a child's brain, vastly increasing the number of neuron branches—the "magic trees of the mind"—that help us to learn, think, and remember. At each stage of development, the brain's ability to gain new skills and process information is refined. As a leading researcher at the University of California at Berkeley, Marion Diamond has been a pioneer in this field of research. Now, Diamond and award-winning science writer Janet Hopson present a comprehensive enrichment program designed to help parents prepare their children for a lifetime of learning.

Could everything we know about fossil fuels be wrong? For decades, environmentalists have told us that using fossil fuels is a self-destructive addiction that will destroy our planet. Yet at the same time, by every measure of human well-being, from life expectancy to clean water to climate safety, life has been getting better and better. How can this be? The explanation, energy expert Alex Epstein argues in *The Moral Case for Fossil Fuels*, is that we usually hear only one side of the story. We're taught to think only of the negatives of fossil fuels, their risks and side effects, but not their positives—their unique ability to provide cheap, reliable energy for a world of seven billion people. And the moral significance of cheap, reliable energy, Epstein argues, is woefully underrated. Energy is our ability to improve every single aspect of life, whether economic or environmental. If we look at the big picture of fossil fuels compared with the alternatives, the overall impact of using fossil fuels is to make the world a far better place. We are morally obligated to use more fossil fuels for the sake of our economy and our environment. Drawing on original insights and cutting-edge research, Epstein argues that most of what we hear about fossil fuels is a myth. For instance . . . Myth:

Fossil fuels are dirty. Truth: The environmental benefits of using fossil fuels far outweigh the risks. Fossil fuels don't take a naturally clean environment and make it dirty; they take a naturally dirty environment and make it clean. They don't take a naturally safe climate and make it dangerous; they take a naturally dangerous climate and make it ever safer. Myth: Fossil fuels are unsustainable, so we should strive to use "renewable" solar and wind. Truth: The sun and wind are intermittent, unreliable fuels that always need backup from a reliable source of energy—usually fossil fuels. There are huge amounts of fossil fuels left, and we have plenty of time to find something cheaper. Myth: Fossil fuels are hurting the developing world. Truth: Fossil fuels are the key to improving the quality of life for billions of people in the developing world. If we withhold them, access to clean water plummets, critical medical machines like incubators become impossible to operate, and life expectancy drops significantly. Calls to "get off fossil fuels" are calls to degrade the lives of innocent people who merely want the same opportunities we enjoy in the West. Taking everything into account, including the facts about climate change, Epstein argues that "fossil fuels are easy to misunderstand and demonize, but they are absolutely good to use. And they absolutely need to be championed. . . . Mankind's use of fossil fuels is supremely virtuous—because human life is the standard of value and because using fossil fuels transforms our environment to make it wonderful for human life."

Montgomery Sole is a square peg in a small town, forced to go to a school full of jocks and girls who don't even know what irony is. The three are also the only members of Jefferson High's Mystery Club, dedicated to exploring the weird and unexplained, from ESP and astrology to super powers and mysterious objects. Then there's the Eye of Know, the possibly powerful crystal amulet Monty bought online. Will it help her predict the future or fight back against the ignorant jerks who make fun of Thomas for being gay or Monty for having lesbian moms? From the author of *The Class of 1846*: "A swift-paced narrative of Lincoln's pre-presidential life." —The Washington Post Book World How did Abraham Lincoln, long held as a paragon of presidential bravery and principled politics, find his way to the White House? How did he become the one man great enough to risk the fate of the nation on the well-worn but cast-off notion that all men are created equal? Here, award-winning historian John C. Waugh takes readers on Lincoln's road to the Civil War. From his first public rejection of slavery to his secret arrival in the capital, from his stunning debates with Stephen Douglas to his contemplative moments considering the state of the country he loved, Waugh shows us America as Lincoln saw and described it. Much of this wonderful story is told by Lincoln himself, detailing through his own writing his emergence onto the political scene and the evolution of his beliefs about the Union, the Constitution, democracy, slavery, and civil war. Waugh sets Lincoln's path in new relief by letting the great man tell his own story, at a depth that brings us ever closer to understanding this mysterious, complicated, and truly great man. "Lively prose backed with solid research." —Publishers Weekly "[Waugh's] judicious use of the historical record and his dramatic prose make for an enjoyable read." —Kirkus Reviews Basing their approach on a historical and explanatory survey, the authors deal in detail with astronomy, astrology, alchemy and cosmology in tantrism. They also discuss the viewpoints of left-hand and right-hand tantrikas and respective attitudes towards human sexuality and its place in ritual.

How is it possible that the conservative elite, Washington insiders, and mainstream media were so completely out of touch with reality during the 2016 US presidential election cycle? American Greatness is an analysis and indictment of the mainstream media, liberal commentariat, and conservative establishment that implicitly undermined, if not insulted, some 60 million fellow Americans when they treated Donald Trump's candidacy as a sideshow. With so little humility or self-reflection--and no apology!--how can these so-called experts continue reporting on and analyzing a country and polity they have essentially admitted they do not understand? After all, what they got wrong in 2016 was not just an election. What they got wrong was America.
