Ladies who Lunge: Essays on Difficult Women dances through history with the unconventional woman. Witty and refreshing, the tone, texture and feeling of the words on the page are as unconventional as the plucky women who punctuate the prose. It is a tough, determined, moving, frank and funny review of difficult women: how they got there, how we can understand their actions, and how we can learn from them.

THE INSIDE STORY OF THE EPIC TURNAROUND OF FORD MOTOR COMPANY UNDER THE LEADERSHIP OF CEO ALAN MULALLY. At the end of 2008, Ford Motor Company was just months away from running out of cash. With the auto industry careening toward ruin, Congress offered all three Detroit automakers a bailout. General Motors and Chrysler grabbed the taxpayer lifeline, but Ford decided to save itself. Under the leadership of charismatic CEO Alan Mulally, Ford had already put together a bold plan to unify its divided global operations, transform its lackluster product lineup, and overcome a dysfunctional culture of infighting, backstabbing, and excuses. It was an extraordinary risk, but it was the only way the Ford family—America's last great industrial dynasty—could hold on to their company. Mulally and his team pulled off one of the greatest comebacks in business history. As the rest of Detroit collapsed, Ford went from the brink of bankruptcy to being the most profitable automaker in the world. American Icon is the compelling, behind-the-scenes account of that epic turnaround. On the verge of collapse, Ford went outside the auto industry and recruited Mulally—the man who had already saved Boeing from the deathblow of 9/11—to lead a sweeping restructuring of a company that had been unable to overcome decades of mismanagement and denial. Mulally applied the principles he developed at Boeing to streamline Ford's inefficient operations, force its fractious executives to work together as a team, and spark a product renaissance in Dearborn. He also convinced the United Auto Workers to join his fight for the soul of American manufacturing. Bryce Hoffman reveals the untold story of the covert meetings with UAW leaders that led to a game-changing contract, Bill Ford's battle to hold the Ford family together when many were ready to cash in their stock and write off the company, and the secret alliance with Toyota and Honda that helped prop up the American automotive supply base. In one of the great management narratives of our time, Hoffman puts the reader inside the boardroom as Mulally uses his celebrated Business Plan Review meetings to drive change and force Ford to deal with the painful realities of the American auto industry. Hoffman was granted unprecedented access to Ford's top executives and top-secret company documents. He spent countless hours with Alan Mulally, Bill Ford, the Ford family, former executives, labor leaders, and company directors. In the bestselling tradition of Too Big to Fail and The Big Short, American Icon is narrative nonfiction at its vivid and colorful best.

In a cynical age that constantly drowns us with information and conditions us to be mistrustful, the majority of us harbor a deep-seated yearning for more meaning and connection. Why is that? And how can we be truly fulfilled? If you feel dissatisfied with your life and helpless to make a change, you are not alone. Many people struggle to make sense of the world and find true purpose. Two decades ago, these same feelings drove Jonni Pollard to seek out a better way of being in the world. A master teacher in India introduced him to ancient Vedic practices that changed Jonni's life forever; the anxiety that had tormented him for so many years was finally replaced by a deep sense of purpose and fulfillment. Now an expert meditation teacher, Jonni's mission is to share the knowledge and techniques he has learned to help anyone reclaim their power to live a meaningful and fulfilling life. The most foundational of these lessons is what Jonni calls "the Golden Sequence." In The Golden Sequence, Jonni shares these eye-opening teachings with readers from all walks of life in the hopes that more people will be able to build happier, more authentic lives. A global leader in the field of meditation and mindfulness, Jonni's programs have already helped more than 250,000 people across the world. This book is a response to the greatest need of our time—reclaiming the power of our humanity. Through his genuine, essential lessons, Jonni presents a powerful case that the current global crisis we are experiencing is rooted in our disconnection from our true purpose and responsibility of belonging. Rediscover your authentic human nature, learn how to reclaim it as your greatest power, and find fulfillment through seeing the difference you can make in the world.

THE NEW YORK TIMES BESTSELLER 'A glittering depiction of a woman ahead of her time who absolutely refused to be second best' Red Alva Smith, her Southern family destitute after the Civil War, marries into one of America's great Gilded Age dynasties: the newly wealthy but socially shunned Vanderbilts. Ignored by New York's old-money circles and determined to win respect, she designs and builds nine mansions, hosts grand balls, and arranges for her daughter to marry a duke. But Alva also defies convention for women of the time, asserting power within her marriage and becoming a leader in the women's suffrage movement. With a nod to Jane Austen and Edith Wharton, bestselling author Therese Anne Fowler paints a glittering world of enormous wealth contrasted with desperate poverty, of social ambition and social scorn, of friendship and betrayal, and an unforgettable story of a remarkable woman. In every challenging situation, personal or professional, individuals face the pressure to play it safe and conform to the accepted norms. But doing so comes with heavy costs: passions stifled, talents ignored, and opportunities squelched. The bolder choice is to embrace what Sarah calls Extreme You: to confidently bring all that is distinctive and relevant about yourself to everything you do. Market shaping is a powerful strategy that unleashes value gains from greater market size, efficiency and profitability. This book, written by experts in the field, presents a universal, teachable, and actionable framework for understanding and shaping markets. The problem is not with meditation, or you, though—the issue may be with your approach. When properly understood and practiced, meditation should feel easy, calming, and comfortable. In Bliss More, maverick instructor Light Watkins provides the tools for making it E.A.S.Y. (Embrace, Accept, Surrender, Yield), dispels the biggest myths and misunderstandings, and shares real-world tips and straight talk for hacking into this ancient practice. This engaging and inspirational book by Carl Lentz, the rock star pastor of Hillsong NYC, shows us the way toward a more connected, spiritually-grounded, and fulfilled life. When you think of a Christian pastor, you probably don't envision a tattooed thirty-something who wears a motorcycle jacket, listens to hip-hop music, references The Walking Dead and Black Lives Matter in his sermons, and every Sunday draws a standing-room only crowd to a venue normally used for rock concerts—in godless New York City, no less. But then you clearly have never met Carl Lentz. As lead pastor of the first United States branch of global

megachurch Hillsong, the former college basketball player is on a mission to make Christianity accessible in the 21st century. In *Own The Moment*, he shares the unlikely and inspiring story of how he went from being an average teenager who couldn't care less about church to leading one of the country's fastest-growing congregations—how one day he is trying to convince a Virginia Beach 7-Eleven clerk to attend his service, and just a few years later he is baptizing a global music icon in an NBA player's Manhattan bathtub. Amid such candid personal tales, Lentz also offers illuminating readings of Bible passages and practical tips on how to live as a person of faith in an increasingly materialistic world. How do you maintain your values—and pass them onto your children—in a society that worships money and sex and fame? How do you embrace your flaws in this Instagram era that exalts the appearance of perfection? How do you forget about “living the dream” and learn to embrace the beauty of your reality? These are just a few of the many important questions Lentz answers in *Own The Moment*—a powerful book that redefines not just Christianity but spirituality as a whole.

Using in-depth case studies to explore how we grapple with compulsion in ourselves and those we love, *Can't Just Stop* examines the science behind both mild and extreme compulsive behavior—“a fascinating read about human behavior and how it can go haywire” (The Charlotte Observer). Whether shopping with military precision or hanging the tea towels just so, compulsion is something most of us have witnessed in daily life. But compulsions exist along a broad continuum and, at the opposite end of these mild forms, exist life-altering disorders. Sharon Begley's meticulously researched book is the first to examine all of these behaviors together—from obsessive-compulsive disorder (OCD) to hoarding, to compulsive exercise, even compulsions to do good. They may look profoundly different, but these behaviors are all ways of coping with varying degrees of anxiety. Sharing personal stories from dozens of interviewees, “Begley combines a personal topic with thoughtfulness and sensitivity” (Library Journal) and gives meaningful context to their plight. Along the way she explores the role of compulsion in our fast-paced culture, the brain science behind it, and strange manifestations of the behavior throughout history. *Can't Just Stop* makes compulsion comprehensible and accessible, with “fresh insight that could fundamentally alter how we think of, and treat, mental illness going forward” (Publishers Weekly).

From its earliest days, America served as an arena for the revolutions in alternative spirituality that eventually swept the globe. Esoteric philosophies and personas—from Freemasonry to Spiritualism, from Madame H. P. Blavatsky to Edgar Cayce—dramatically altered the nation's culture, politics, and religion. Yet the mystical roots of our identity are often ignored or overlooked. Opening a new window on the past, *Occult America* presents a dramatic, pioneering study of the esoteric undercurrents of our history and their profound impact across modern life.

40 DAYS to FREEDOM leads the reader through an expertly guided transformational process to break the cycle of food craving, diet cycling & body shaming, once and for all. Using Neuro-Linguistic Programming (NLP), we will teach you how to overcome compulsions and bad habits, and to release limiting beliefs and emotional connections to food. By implementing the steps found in this book you will re-program the way you think and feel about your body and install positive and supportive habits that keep you accountable and progressing toward your goals. With your newfound knowledge and motivation you will become equipped and empowered to create lasting results. As a conscious health consumer, does the vast amount of information available online, in bookstores, from health professionals and peers only leave you feeling overwhelmed and unsure of whom to trust, and what to implement? Do you encounter conflicting and confusing information seemingly at every turn, leaving you with more questions than answers? Have you come to realize that having the best intentions or strong “willpower” to gain control over your eating habits isn't enough to thrust you out of an addictive cycle? Perhaps you've perceived to have some success with a particular diet, only to find yourself rebound back to the same or worse condition over time - now weighted with the compounded effects of exasperation, desperation and despair guiding your choices. You may be a new recipient of a concerning medical diagnosis, a parent seeking healthful alternatives to the standard school lunch fare or convenience dinner foods, or an athlete seeking a competitive advantage...and you are all left with the same question: How do I break free from the rut or routine where I seem to be trapped? As you sift through mountains of literature on the latest fad diet or scientific study, as you consider and sometimes succumb to gimmicky “shortcuts” and home machines that are “guaranteed” to deliver gleaming health - you grow sicker, fatter and more frustrated. There is no diet, no exclusive or restrictive pattern that ever works for humans long-term. It is hardwired into our being to break out of these patterns. That is why most attempts for us to simply “willpower our way there” end in misery, disappointment and even do damage to our metabolisms. There is not one definition of freedom that is the right answer for everyone. We are all unique biochemical beings, with distinct physical and emotional differences. We cannot expect to experience the same results of another's experimentation toward better health, nor can we rely on lab research that does not translate into the human experience, and its diverse population. Our unique expression of humanness and our perception of well-being is a complex and savory stew of our internal representations of what it means to be healthy as well as distinctly measurable external variables. We have different ancestries, different metabolic types, different health histories and different health goals. So what can be taught in one book that could serve the health of the masses? Keep reading, you'll soon know.

One of the most significant books to have been written by a New Zealand business leader. Phillip Mills, the Ernst and Young Entrepreneur of the Year and a global exporter of fitness programmes to 71 countries, has spent the last year forming his views on health and fitness and sustainability into an engaging and challenging book, *Fighting Globesity*. All New Zealanders should read it. As Phillip jokes, “What would a couple of gym bunnies know about climate change and sustainability?” As it turns out, rather a lot. Phillip has done wide reading and research in this area over the last few years. From that he has distilled a carefully argued message: we need to get fit and stay fit, we need to consume fewer resources, we need to urgently engage with health and climate change issues - and we can make a difference. In this he may well be a step ahead of many other business thinkers. Accompanied by exercise and training programmes, nutritional information, recipes and more, *FIGHTING GLOBESITY* is a perfect health, fitness and philosophy package. *FIGHTING GLOBESITY - A Practical Guide To*

Personal Health And Global Sustainability combines the Mills's experience to create a cutting-edge lifestyle prescription which will be sustainable for both the individual and the planet.

THE BRAND GAP is the first book to present a unified theory of brand-building. Whereas most books on branding are weighted toward either a strategic or creative approach, this book shows how both ways of thinking can unite to produce a "charismatic brand"—a brand that customers feel is essential to their lives. In an entertaining two-hour read you'll learn: • the new definition of brand • the five essential disciplines of brand-building • how branding is changing the dynamics of competition • the three most powerful questions to ask about any brand • why collaboration is the key to brand-building • how design determines a customer's experience • how to test brand concepts quickly and cheaply • the importance of managing brands from the inside • 220-word brand glossary From the back cover: Not since McLuhan's *THE MEDIUM IS THE MESSAGE* has a book compressed so many ideas into so few pages. Using the visual language of the boardroom, Neumeier presents the first unified theory of branding—a set of five disciplines to help companies bridge the gap between brand strategy and customer experience. Those with a grasp of branding will be inspired by the new perspectives they find here, and those who would like to understand it better will suddenly "get it." This deceptively simple book offers everyone in the company access to "the most powerful business tool since the spreadsheet."

Early in the twenty-first century, a quiet revolution occurred. For the first time, the major developed economies began to invest more in intangible assets, like design, branding, and software, than in tangible assets, like machinery, buildings, and computers. For all sorts of businesses, the ability to deploy assets that one can neither see nor touch is increasingly the main source of long-term success. But this is not just a familiar story of the so-called new economy. *Capitalism without Capital* shows that the growing importance of intangible assets has also played a role in some of the larger economic changes of the past decade, including the growth in economic inequality and the stagnation of productivity. Jonathan Haskel and Stian Westlake explore the unusual economic characteristics of intangible investment and discuss how an economy rich in intangibles is fundamentally different from one based on tangibles. *Capitalism without Capital* concludes by outlining how managers, investors, and policymakers can exploit the characteristics of an intangible age to grow their businesses, portfolios, and economies.

Heather Crosby, *Yum Universe: "Eat Your Feelings"* is a joyful, judgement-free zone and an opportunity to answer your body's call in an informed and delicious way." Lindsey Smith, *The Food Mood Girl*, shows how you can transform your lifestyle by learning from your cravings and using mood-boosting ingredients every day Blending together Lindsey Smith's passion for health and wellness, food and humor, *Eat Your Feelings* is a humorous, lighthearted take on your typical diet book. Busy young professionals wrestle with long hours, an exhausting dating culture, and the stress of the modern world. As days whiz by, it's normal to gravitate toward food—a quick slice of pizza, a chocolate bar, or a bag of chips—that fulfills a craving of the moment or gives a quick energy boost. And this impulse makes sense. Food gives us a sense of pleasure and joy. It can provide us with satisfaction and comfort. Food can awaken each of our senses to something new each time we eat. It gives us energy, and quite literally sustains life as we know it. It should be emotional. If you are feeling sad, stressed, exhausted, hangry, or bored, it's comforting to eat dishes you love and crave. But Lindsey Smith shows how simple it is to make those same meals and snacks with mood-boosting ingredients that will physically nourish instead of processed foods. In *Eat Your Feelings*, Lindsey Smith, the Food Mood Girl, will look at ways to eat healthy food based on what people tend to crave the most during heightened emotional states, introducing recipes with crunchy, cheesy, creamy, sweet, and salty themes and drink alternatives for those who tend to chug soda or coffee when all worked up. It's crucial to listen to your cravings: they are the gatekeepers that unlock the secrets to our unique bodies. But a major element of the Food Mood lifestyle is love, and revolutionizing the way you treat your body and your cravings will not only rid yourself of hunger pains but will also teach you how to listen and respond to your body with healthy ingredients and recipes.

What happens to "orphan" diseases that aren't big enough profit centers for the pharmaceutical industry or get caught in the web of government funding and academic research? Augie Nieto found out in the spring of 2005: At forty-seven years old he was diagnosed with ALS. Devastated, Augie struggled with depression and attempted suicide. When he awoke from a coma, with friends and family surrounding him, his sense of faith and mission were renewed. Fast-forward one year: Augie and his wife, Lynne, were profiled as "Real Heroes" on the Today show. Their determination to beat the disease had already led to major overhauls in the way ALS research was conducted. In partnership with the Muscular Dystrophy Association, Augie had set up a foundation and lab to coordinate and oversee ALS research and testing

across the globe. By centralizing operations and championing an entrepreneurial approach to medical research, Augie and his team accomplished remarkable results in less than two years. Part inspiration, part business innovation, Augie's Quest illustrates how one person can make a meaningful difference. Praise for Augie Nieto: George H. W. Bush, former U.S. president: "Your contributions to the fitness industry are well known, and your dedication an inspiration." Lance Armstrong, seven-time "Le Tour de France" champion: "I think it says a lot about Augie, the fact that everybody came together regardless of whether or not it's for competing gyms or competing companies that make equipment. They all say, this is one of our own; this is a guy who's committed his life to our industry and has been dealt a serious blow. We're going to be there for him, we're going to say, we're here for you and we're part of the Quest." Arnold Schwarzenegger, governor of California: "Your success has been incredible. But you are so much more than just a successful businessman. You are the greatest husband, a great father, and a terrific friend. So, Mama of ten Abbie Halberstadt helps women humbly and gracefully rise to the high calling of motherhood without settling for mediocrity or losing their minds in the process. Motherhood is a challenge. Unfortunately, our worldly culture offers moms little in the way of real help. Moms only connect to celebrate surviving another day and to share in their misery rather than rejoice in what God has done and to build each other up in hard times. There has to be a better way, a biblical way, for moms to grow and thrive. As a daughter of Christ, you have been called to be more than an average mom. Attaining excellence doesn't have to be unsettling but it will take committed focus and a desire to parent well according to God's grace and for His glory. M is for Mama offers advice, encouragement, and scripturally sound strategies seasoned with a little bit of humor to help you embrace the challenge of biblical motherhood and raise your children with love and wisdom. Mama, you are worthy of the awesome responsibility God has given you. Now it's time to start believing you can live up to it.

'A work of remarkable scope' - Guardian FT Best science books of 2018 *Primate Change* has been adapted into a radio series for the BBC WORLD SERVICE. * This is the road from climate change to primate change. *PRIMATE CHANGE* is a wide-ranging, polemical look at how and why the human body has changed since humankind first got up on two feet. Spanning the entirety of human history - from primate to transhuman - Vybarr Cregan-Reid's book investigates where we came from, who we are today and how modern technology will change us beyond recognition. In the last two hundred years, humans have made such a tremendous impact on the world that our geological epoch is about to be declared the 'Anthropocene', or the Age of Man. But while we have been busy changing the shape of the world we inhabit, the ways of living that we have been building have, as if under the cover of darkness, been transforming our bodies and altering the expression of our DNA, too. *Primate Change* beautifully unscrambles the complex architecture of our modern human bodies, built over millions of years and only starting to give up on us now. 'Our bodies are in a shock. Modern living is as bracing to the human body as jumping through a hole in the ice. Our bodies do not know what century they were born into and they are defending and deforming themselves in response.'

White women are one of the most influential demographics in America—we are the largest voting bloc, with purchasing power that exceeds anybody else's, and when we unify to demand change, we are a force to be reckoned with. Yet, so many of us sit idly on the sidelines, opting out of raising our hands to do, learn, and engage in ways that could make a difference. Why? White American women are no monolith. Yet, as Women's March national organizer Jenna Arnold has learned over the past few years criss-crossing the US in conversations with white women about their identity and role in the country, we do possess common

characteristics—ones that get in the way of us becoming more engaged as citizens. We're so focused on checking off our to-do lists, or so afraid of getting it wrong, or so busy trying to avoid conflict, that we are actively avoiding the urgent conversations we need to have. We are confused about how we got here and unsure how to do better. Raising Our Hands is the reckoning cry for white women. It asks us to step up and join the new frontlines of the fight against complacency—in our homes, in our behaviors, and in our own minds. Consider Raising Our Hands your starting place, your "Intro to Being a White Woman in Today's World" freshman-year class. In these pages, Jenna peels back the history that's been kept out of textbooks and the cultural norms that are holding us back, so we can finally start really listening to marginalized voices and doing our part to promote progress. The American white woman is a powerful force—an essential participant—to mobilize alongside the rest of humanity on behalf of the world, and we can no longer make excuses for why we don't have time or don't know enough.

In April 1811, while staying with her brother in London to await the publication of her first novel, Jane Austen finds herself deep in the heart of a conspiracy when she investigates the murder of a disgraced woman rumored to be the mistress of Lord Castl Running is not just a sport. It reconnects us to our bodies and the places in which we live, breaking down our increasingly structured and demanding lives. It allows us to feel the world beneath our feet, lifts the spirit, lets our minds out to play, and helps us to slip away from the demands of the modern world. When Vybarr Cregan-Reid set out to discover why running means so much to so many, he began a journey which would take him out to tread London's cobbled streets, the boulevards of Paris, and down the crumbling alleyways of Ruskin's Venice. Footnotes transports you to the deserted shorelines of Seattle, the giant redwood forests of California, and to the world's most advanced running laboratories and research centers. Using debates in literature, philosophy, neuroscience, and biology, this book explores that simple human desire to run. Liberating and inspiring, Footnotes reminds us why feeling the earth beneath our feet is a necessary and healing part of our lives.

LOSING WEIGHT IS NOW AS SIMPLE AS 1-2-3 . . . AND 3-15-18-20 TOO! Rule #3: Eat protein at every meal, making some kind of fish your go-to protein as often as you can. Take your weight and divide it by two—that's more or less how much protein you should be eating in grams every day. Rule #15: Eat at least ten meals a week at home (and cook them yourself). Restaurant portions are usually 40 to 50 percent bigger than what you'd serve at home—the more you eat out, the more you overeat. Set yourself up for success by preparing my turkey meatballs, hummus, and roasted vegetables on the weekend so that you will have go-to staples and no excuses! Rule #18: Go to bed slightly hungry. Denied fuel for more than five hours, your body will start burning its own fat and sugar. Make a point not to eat after dinner and you'll be burning fat while you're sleeping. Rule #20: Enjoy a splurge meal once a week. Unlike episodic bingeing, splurge meals are an ingredient in your diet. When you plan something, you are in control.

The riveting novel of iron-willed Alva Vanderbilt and her illustrious family as they rule Gilded-Age New York, written by Therese Anne Fowler, a New York Times bestselling author of Z: A Novel of Zelda Fitzgerald. Alva Smith, her southern family destitute after the Civil War, married into one of America's great Gilded Age dynasties: the newly wealthy but socially shunned Vanderbilts. Ignored by New York's old-money circles and determined to win respect, she designed and built nine mansions, hosted grand balls, and arranged for her daughter to marry a duke. But Alva also defied convention for women of her time, asserting power within her marriage and becoming a leader in the women's suffrage movement. With a nod to Jane Austen and Edith Wharton, in A Well-Behaved Woman Therese Anne Fowler paints a glittering world of enormous wealth contrasted against desperate poverty, of social ambition and social scorn, of friendship and betrayal, and an unforgettable story of a remarkable woman. Meet Alva Smith Vanderbilt Belmont, living proof that history is made by those who know the rules—and how to break them.
