Recent years have seen a globalization of property rights as the Western conception of property over land has extended across the world. As formerly community-owned land and natural resources are privatized and titling schemes proliferate, Property Rights from Below questions the trend toward treating land as a commodity and explores alternatives to the Western model. As we enter an era of resource scarcity and as competition for land and associated natural resources increases, purchasing power cannot become the sole criterion for land allocation; and the law of supply and demand in increasingly financialized markets cannot become the sole metric through which the value of land is determined. Using a range of examples from around the world, Property Rights from Below demonstrates that alternatives to this model often emerge from social innovations supported by local communities and that there is an urgent need for a broader political imagination when it comes to land governance. This innovative cross-disciplinary perspective on the pressing problems surrounding global property rights will be of interest to academics, students and professionals with an interest in property law, development economics and land governance.

A fascinating collaboration between a medieval historian and a professor of psychiatry, this enthralling book applies modern biological and psychological research findings to the lives of medieval mystics and ascetics. Drawing upon a database of over 1,400 medieval holy persons and in-depth studies of individual saints, this illuminating study examines the relationship between medieval mystical experiences, the religious practices of mortification; laceration of the flesh, sleep deprivation and extreme starvation, and how these actions produced altered states of consciousness and brain function in the heroic ascetics. Examining and disputing much contemporary writing about the political and gender motivations in the medieval quest for a closeness with God, this is essential reading for anyone with an interest in medieval religion or the effects of self-injurious behaviour on the mind.

The writings of Carl Schmitt form what is arguably the most disconcerting, original, and yet still unfamiliar body of twentieth-century political thought. In the English-speaking world, he is terra incognita, a name associated with Nazism, the author of a largely un-translated oeuvre forming no recognizable system, coming to us from a disturbing place and time in the form of fragments. The Enemy is a comprehensive reconstruction and analysis of all of Schmitt's major works - his books, articles and pamphlets from 1919 to 1950 - presented in an arresting narrative form. The revelation of his work is that, unlike mainstream Nazi ideology, Schmitt makes a strong philosophical claim for the necessity of confrontational politics within a democratic system; a claim that has resonance in today's hegemony of consensual politics.

The Routledge Handbook of the History of Global Economic Thought offers the first comprehensive overview of the long-run history of economic thought from a truly international perspective. Although globalization has facilitated the spread of ideas between nations, the history of economics has tended to be studied either thematically (by topic), in terms of different currents of thought, or individually (by economist). Work has been published in the past on the economic thought traditions of specific countries, but this pioneering volume is unique in offering a wide-ranging comparative account of the development of economic ideas and philosophies on the international stage. The volume brings together leading experts on the development of economic ideas from across the world in order to offer a truly international comparison of the economics within nation-states. Each author presents a long-term perspective on economics in their region, allowing global patterns in the progress of economic ideas over time to be identified. The specially commissioned chapters cover the vast sweep of the history of economics across five world regions, including Europe (England, Scotland, Ireland, Italy Greece, Spain, Portugal, Germany, Sweden, Russia and the Ukraine), the Americas (the USA, Canada, Mexico and Central America, Spanish-Speaking South America, Brazil and the Caribbean), the Middle East (Turkey, Israel, Arab-Islamic Economics, Persia/Iran, North Africa), Africa (West Africa, Southern Africa, Mozambique and Angola), and the Asia-Pacific Region (Australia and New Zealand, China, Southeast Asia, the Asian Tigers, India.) This rigorous, ambitious and highly scholarly volume will be of key interest to students, academics, policy professionals and to interested general readers across the globe.

Antagonistics addresses central political and theoretical questions: how should we conceive the relations between neo-imperial warfare and neoliberalism, or American hegemony and capitalist globalization? Reflections on the major issues of the new international order are set within a larger framework, tracing the intertwined evolution of the modern state system and the capitalist mode of production, from the Treaty of Westphalia to the Occupation of Iraq. Gopal Balakrishnan interrogates three key political perspectives-including Tocqueville's liberalism, Althusser's Marxism and Schmitt on the radical right-for their insights on state power and civil society, democracy, and class. Antagonistics combines

intellectual history, political philosophy, and historical sociology to produce a highly distinctive portrait of an age of capital and war.

Davey, a blind student, refuses all help from his new classmates, even while playing kickball at recess, until they find a way to help without doing everything for him.

The man whom Indian nationalists perceived as the “George Washington of India” and who was President of the Indian National Congress in 1938–1939 is a legendary figure. Called Netaji (“leader”) by his countrymen, Subhas Chandra Bose struggled all his life to liberate his people from British rule and, in pursuit of that goal, raised and led the Indian National Army against Allied Forces during World War II. His patriotism, as Gandhi asserted, was second to none, but his actions aroused controversy in India and condemnation in the West. Now, in a definitive biography of the revered Indian nationalist, Sugata Bose deftly explores a charismatic personality whose public and private life encapsulated the contradictions of world history in the first half of the twentieth century. He brilliantly evokes Netaji’s formation in the intellectual milieu of Calcutta and Cambridge, probes his thoughts and relations during years of exile, and analyzes his ascent to the peak of nationalist politics. Amidst riveting accounts of imprisonment and travels, we glimpse the profundity of his struggle: to unite Hindu and Muslim, men and women, and diverse linguistic groups within a single independent Indian nation. Finally, an authoritative account of his untimely death in a plane crash will put to rest rumors about the fate of this “deathless hero.” This epic of a life larger than its legend is both intimate, based on family archives, and global in significance. His Majesty’s Opponent establishes Bose among the giants of Indian and world history.

The girl who loved cycling along the tree-lined avenues of a brand new Lutyens' Delhi could never have dreamt that five decades later she would govern, and transform, Delhi as its chief minister – not once, but thrice consecutively. When a politician like Sheila Dikshit, with a career spanning over three decades, chooses to let the reader get a glimpse of her life's journey, the opportunity brings along an element of surprise. In a fascinating account of her life, contoured along the life of the nation and her political party at critical junctures, she creates a richly patterned universe with deft touches, seamlessly moving between the home and the world, the past and the present. Be it encounters with politics, which she terms 'life at its barest' or the ups and downs of a household, what shines through is the portrait of a modern woman determined to face any eventuality with fortitude, and a deep sense of duty. Interestingly, she never wanted to be in politics, but destiny willed otherwise – a destiny shaped by her liberal upbringing in a Punjabi household. Brought up to be independent, she chose her life partner from another part of India. And that started it all. As the wife of an IAS officer and

daughter-in-law of well-known freedom fighter and politician, Uma Shankar Dikshit, with his long association with the Nehru–Gandhi family, she saw governance from both ends. When she began assisting her father-in-law from 1969, her up-close view of politics eventually became a springboard for her own entry into the arena in December 1984, inaugurating a 30-year-long career in politics. The narrative foregrounds a question that the author considers crucial for democracy – how does one deal with the constant tussle between the dictates of governance and the here-and-now preoccupations of party politics?

Few political phenomena have proved as confusing or as difficult to comprehend as nationalism. There is no established consensus on its identity, genesis or future. Are we, for example, in the process of being thrust back into a nineteenth-century world of competitive and aggressive great powers and petty nationalisms? Or, rather, are we being flung headlong into a new, globalized and supra-national millennium? Has the nation-state outlived its usefulness and exhausted its progressive and emancipatory role, or has nationalism always been implicated in an exclusivist ethnic and militaristic logic? Mapping the Nation seeks to address these and other questions about the nature and destiny of the "national question" in the present epoch. A comprehensive and definitive reader

on the subject, with contributions from some of the most significant and stimulating theorists of the nation-state, it presents a wide range of divergent ideas and controversies. Leading off with powerful statements of the classic liberal and socialist positions, by Lord Acton and Otto Bauer, there then follows an historical-sociological debate between the late Ernest Gellner and the Czech historian Miroslav Hroch, the one stressing the connections between nationalism and the transition away from agrarian society, the other emphasizing its variability and real anthropological basis. John Breuilly and Anthony D. Smith, two of the leading British specialists, provide a counterpoint to each other with considerations on the respective importance of political leadership and continuing ethnic communities in the construction of nationalist movements. Gopal Balakrishnan, in a carefully honed critique of Benedict Anderson's seminal *Imagined Communities*, and Partha Chatterjee, from the Subaltern Studies circle, offer crucial insights on the limitations of the Enlightenment approach to nationhood, as do Sylvia Walby and Katherine Verdery with their reflections on the entanglements of nation, gender and identity politics. Sociologist Michael Mann delivers an authoritative refutation of the chatter about the "death of the nation-state." Finally, relating the theoretical questions directly to the politics of our time, renowned historian Eric Hobsbawm, provocative theorist Tom Nairn, and the outstanding political philosopher Jürgen Habermas discuss, with varying degrees of optimism and pessimism, the future of the national project.
