

Bora Kochfeld Preis

This much-needed book on the design of algorithms and data structures for text processing emphasizes both theoretical foundations and practical applications. It is intended to serve both as a textbook for courses on algorithm design, especially those related to text processing, and as a reference for computer science professionals. The work takes a unique approach, one that goes more deeply into its topic than other more general books. It contains both classical algorithms and recent results of research on the subject. The book is the first text to contain a collection of a wide range of text algorithms, many of them quite new and appearing here for the first time. Other algorithms, while known by reputation, have never been published in the journal literature. Two such important algorithms are those of Karp, Miller and Rosenberg, and that of Weiner. Here they are presented together for the first time. The core of the book is the material on suffix trees and subword graphs, applications of these data structures, new approaches to time-space optimal string-matching, and text compression. Also covered are basic parallel algorithms for text problems. Applications of all these algorithms are given for problems involving data retrieval systems, treatment of natural languages, investigation of genomes, data compression software, and text processing tools. From the theoretical point of view, the book is a goldmine of paradigms for the development of efficient algorithms, providing the necessary foundation to creating practical software dealing with sequences. A crucial point in the authors' approach is the development of a methodology for presenting text algorithms so they can be fully understood. Throughout, the book emphasizes the efficiency of algorithms, holding that the essence of their usefulness depends on it. This is especially important since the algorithms described here will find application in "Big Science" areas like molecular sequence analysis where the explosive growth of data has caused problems for the current generation of software. Finally, with its development of theoretical background, the book can be considered as a mathematical foundation for the analysis and production of text processing algorithms.

This title provides a theoretically and methodologically new and distinct approach to gender through the frameworks of biopolitics and genealogy, theorising it as a historically specific apparatus of biopower. Through the use of a diverse mix of historical and contemporary documents, the book explores how the problematisation of intersex infant genitalia in 1950s psychiatry propelled the emergence of the gender apparatus in order to socialise sexed individuals into the ideal productive and reproductive subjects of White, middle-class postwar America.

'Inside Out' is a classroom-tested English course designed to develop real life communicative skills and powers of self-expression. Written by teachers for teachers, 'Inside Out' provides a course for adults and young adults built around

structured work on grammar and lexis, planned speaking tasks and engaging writing and listening texts. The main grammar and language functions are presented clearly and practised through anecdote activities and personalization. It contains approximately 90 hours of teaching material at every level and includes review units with activities to consolidate target language.

Like sudoku, O'Ekaki (Paint by Numbers) provides an entertaining test of one's logic, using a grid as its playing field. But rather than leaving the player with boxes of numbers, O'Ekaki ends with a flourish: a fun piece of art that seems to magically appear when you've correctly darkened the final square grid. And each puzzle's title is an amusing clue to the picture that will ultimately emerge. The puzzle challenge on several levels, from beginning to expert, all resulting in a sometimes elaborate picture. And every one is designed by the inventor of O'Ekaki himself!

Moderne Küchen begeistern mit viel Technik und anspruchsvollem Design. Sie sind mit High-Tech-Ausstattung zum Statussymbol geworden, aber was ist wirklich sinnvoll? Die Hersteller preisen selbst fragwürdige Innovationen mit den blumigsten Werbeversprechen an. Dieser Ratgeber ist das perfekte Planungs- und Handbuch und führt Sie durch die verwirrende Technik- und Ausstattungsvielfalt moderner Küchengeräte. Es stellt die aktuellen Trends wie Kücheninseln, Downdraft-Systeme und Smart Kitchen vor und gibt Empfehlungen zur optimalen Raumnutzung sowie der perfekten Arbeitsergonomie. Ein extra Kapitel berät zu den Verbraucherrechten beim Kauf. Stiftung Warentest erklärt, was technisch sinnvoll ist, bietet Ihnen jede Menge Hintergrundwissen und begleitet Sie mit praxisnahen Checklisten auf dem Weg zu Ihrer neuen Einbauküche.

This book introduces the importance of echoism as a clinical entity and a theoretical concept. In Ovid's version of the myth of Echo and Narcissus, the character Echo receives equal attention to her counterpart, Narcissus, yet she has been completely marginalised in the pervasive literatures on narcissism. The author draws upon her work with patients who have experienced relationships with narcissistic partners or parents, and have developed a particular configuration of object relations and ways of relating for which she uses the term echoism. She uses psychoanalytic theory and existential philosophical ideas to underpin her formulations and inform her clinical thinking. Donna Savery explores the question 'Am I an Echoist?' and introduces the concept of Echoism in the following YouTube video:

This book is an indispensable reference work for designers, illustrators, artists, students at design schools and people who are engaged at fashion design. The book includes templates for fashion drawings about 120 women figurines templates In this book you will also find inspiring templates for hairstyle and representation of face, hands and feet. This book will help you to learn to create qualitative, casual and trendy fashion drawings independently. About the author:

Dimitri Jelezky is designer, illustrator, artist and author. He works for various considerable companies. He teaches at the AMD college for fashion and design in Hamburg and also holds seminars, workshops in the areas fashion design, fashion illustration, hand drawing and computer illustration.

Maya Brixton was an ordinary girl with a tragic past, losing her mother to the cruel circumstances of life... Or so she thought. When Maya meets a mysterious Beau Gabriel, she comes to realize that her mother's death may not have been a coincidence after all. She quickly learns that the life she had been living was not the life intended for her - but a life of power, secrets, and faith. Though nothing in life is free, and power always demands a price.

The son of the Olympic swimmer who became a Hollywood star reveals the real story of his famous father's life. Johnny Weissmuller's name has become synonymous with Tarzan—the role he played in the 1930s and '40s to the delight of millions. Many don't know that he also earned five Olympic gold medals for swimming before his renowned acting career—or that he had five marriages. This authoritative biography of the first Tarzan, written by his only son, offers an intimate look at Weissmuller's early life, middle years, and later decline, covering his experiences from swimming training and Olympic triumphs to failed marriages, phenomenal stardom, and a subsequent career as Jungle Jim. A sensitive yet unsentimental portrayal of the man who was Tarzan to movie fans around the world, *Tarzan, My Father* includes interviews with his father's celebrity friends and former wives, recollections of conversations with his father over the years, and family stories involving Hollywood stars such as Humphrey Bogart.

In the wake of a man's graphic murder in front of hundreds of party-goers, the victim's best friend, investment expert Grove O'Rourke, is entreated by the man's widow for help, a situation that is further complicated by a dark secret and an expensive cover-up.

Statistics for the Health Sciences is a highly readable and accessible textbook on understanding statistics for the health sciences, both conceptually and via the SPSS programme. The authors give clear explanations of the concepts underlying statistical analyses and descriptions of how these analyses are applied in health science research without complex maths formulae. The textbook takes students from the basics of research design, hypothesis testing and descriptive statistical techniques through to more advanced inferential statistical tests that health science students are likely to encounter. The strengths and weaknesses of different techniques are critically appraised throughout, and the authors emphasise how they may be used both in research and to inform best practice care in health settings. Exercises and tips throughout the book allow students to practice using SPSS. The companion website provides further practical experience of conducting statistical analyses. Features include: • multiple choice questions for both student and lecturer use • full Powerpoint slides for lecturers • practical exercises using SPSS • additional practical exercises using SAS and R This is an essential textbook for students studying beginner and intermediate level statistics across the health sciences.

'This book is a thoroughly researched and well written exploration of one of the most divisive topics in modern democratic discourse. Novak brings careful and clear thinking to a topic too often clouded in emotion and guided by moral intuition. ' —Peter Boettke, Professor of Economics and Philosophy, George Mason University, USA 'Inequality has bred a climate of hostile political discourse reminiscent of the cold war. In this lucid book, Novak explains how we can transcend that hostility by recognizing the deeply entangled character of politics and economics within modern societies.' —Richard E. Wagner, Hobart R. Harris Professor of Economics, George Mason University, USA 'Mikayla Novak has provided a bold new intellectual foundation for social policy analysis.' —Jason Potts, Professor of Economics, RMIT

University, Australia In recent years the degree of income and wealth inequality within developed countries has been raised as a central issue in economic and social policy debates. Numerous figures across diverse ideological affinities have advocated policy measures to significantly alter income and wealth distributions, while the inequality debate has become infused with other subjects such as social justice and identity politics. This book presents an account of economic inequality from a contemporary classical liberal perspective. Inequality is seen as a by-product of entangled relationships within society, bringing to the fore key ideas from complexity, evolutionary and network sciences. Novak illustrates that inequality is problematic insofar as it generates pro-rich redistribution and constrains progress by the less well off. Economic inequality has important links with issues such as fiscal and regulatory policies, discrimination and social exclusion, and institutional design. This unique book is important reading for social science academics, policy makers and people interested in exploring the dimensions and solutions to inequality, a critical issue of our time.

“...a full-throttle ride filled with SEAL Team Six and NCIS secrets. Riveting and breathlessly paced, it’s a story that begs to be read in one sitting.” —James Rollins, bestselling author of *The Devil Colony* “Unconventional and innovative, this is the future of e-publishing here and now—a thriller you not only read, but interact with. Pretty cool and completely fascinating. Attention everyone with an e-reader, don’t miss W. Craig Reed’s *THE EAGLE AND THE SNAKE*.” —Steve Berry, bestselling author of *The Columbus Affair* NCIS agent Jon Shay is a former Navy SEAL working with operators from Team Six to track down an Iraqi terrorist with a stolen bio-weapon. With the help of a Russian bio-scientist, Jon and his team uncover a plot to create a genetic weapon that could alter the course of human history. *THE EAGLE AND THE SNAKE* is the first plot-interactive ebook to feature selectable chapters, alternate endings and information links. Included is an enhanced multimedia non-fiction Afterword that explores several topics introduced in the novel, such as Navy SEAL training and tactics, Soviet and Iraqi secret bio-weapons programs and the genetic science behind “hard-wired” personalities.

In Rome one January afternoon in 1943, a young German woman is on her way to listen to a Bach concert at the Lutheran church. The war is for her little more than a daydream, until she realizes that her husband might never return. *Portrait of the Mother as a Young Woman*, winner of the prestigious Georg Büchner prize, is a mesmerizing psychological portrait of the human need to safeguard innocence and integrity at any cost—even at the risk of excluding reality. More than just the story of this single woman, it is a compelling and credible description of a typical young German woman during the Nazi era.

This volume presents sonograms of equine body structures typically assessed by ultrasonography. By comparing the book's sonograms of normal and abnormal structures with patient sonograms made with their ultrasound units, readers should detect pathologic changes.

Derived from Sam W. Wiesel’s four-volume *Operative Techniques in Orthopaedic Surgery*, this single-volume resource contains the user-friendly, step-by-step information you need to confidently perform the full range of operative techniques from the hand to the elbow. In one convenient place, you’ll find the entire Hand, Wrist, and Elbow section, as well as

relevant chapters from the Shoulder and Elbow, Pediatrics, Sports Medicine, and Oncology sections of Operative Techniques in Orthopaedic Surgery. Superb full-color illustrations and step-by-step explanations help you master surgical techniques, select the best procedure, avoid complications, and anticipate outcomes. Written by global experts from leading institutions, Operative Techniques in Hand, Wrist, and Elbow Surgery, 2nd Edition, provides authoritative, easy-to-follow guidance to both the novice trainee or experienced surgeon.

'A "Treatise on Abundance" (1638) and Early Modern Views of Poverty and Famine' is an edited English translation of Carlo Tapia's 'Trattato dell'abondanza'. First published in Naples in 1638, the treatise offered the earliest systematic attempt to develop and publicize the most effective tools available to governments to fight famine and poverty. In particular, Tapia moved the discussion of these issues away from traditional religious approaches and aimed instead to offer a theoretical understanding of the issues—based in part on his study of both classical sources and contemporary legal theories—and practical advice that could help administrators in the provinces and in the capital.

Eine App, die Taxizentralen überflüssig macht? Dunstabzug von unten, statt von oben? Oder einfach eine neue Cola? Das sind die Geschäftsideen der Startups myTaxi, Bora und fritz-kola. Sie haben es geschafft, und aus ihren Ideen florierende Unternehmen gemacht. Nur, wie? Um dieser Frage nachzugehen sind die Autoren quer Deutschland gereist und haben sich mit erfolgreichen Gründern zum Gespräch getroffen. Im Zentrum des Buches stehen persönliche Interviews mit Gründern. Gemeinsam mit den Autoren zeichnen sie die Entstehungsgeschichte der Startups nach – inklusive der Rückschläge, Wendepunkte und Erfolge. Der Leser erfährt aus erster Hand vor welchen Herausforderungen die Gründer standen, wie diese angepackt und letztlich auch gelöst wurden. Gründungsinteressierte können von diesen Best-Practices lernen: · Woran erkenne ich, ob meine Geschäftsideen erfolgsversprechend ist? · Was können meine ersten Schritte sein? · Sollte ich besser allein oder im Team gründen? · Wie überzeuge ich einen Investor von meiner Idee? · Wie plane und organisiere ich tägliche Arbeit als Gründer? · Welche Herausforderungen bringt die Personalführung mit sich? · Wie baue ich ein schlagkräftiges Team auf? · Wie lenke ich das Team? · Wie gehe ich mit Rückschlägen um? · Wie gelingt die erfolgreiche Skalierung? · Welchen Einfluss hat eine Gründung auf mein persönliches Leben und wie stelle ich mich darauf ein?

Mission: StartupGründer in Deutschland schildern ihren Weg von der Idee zum UnternehmenSpringer-Verlag

Making a Good Life takes a timely look at the ideas and values that inform how people think about reproduction and assisted reproductive technologies. In an era of heightened scrutiny about parenting and reproduction, fears about environmental degradation, and the rise of the biotechnology industry, Katharine Dow delves into the reproductive ethics of those who do not have a personal stake in assisted reproductive technologies, but who are building lives inspired and

influenced by environmentalism and concerns about the natural world's future. Moving away from experiences of infertility treatments tied to the clinic and laboratory, Dow instead explores reproduction and assisted reproductive technologies as topics of public concern and debate, and she examines how people living in a coastal village in rural Scotland make ethical decisions and judgments about these matters. In particular, Dow engages with people's ideas about nature and naturalness, and how these relate to views about parenting and building stable environments for future generations. Taking into account the ways daily responsibilities and commitments are balanced with moral values, Dow suggests there is still much to uncover about reproductive ethics. Analyzing how ideas about reproduction intersect with wider ethical struggles, *Making a Good Life* offers a new approach to researching, thinking, and writing about nature, ethics, and reproduction.

It was the boxer, Mike Tyson who coined the phrase: "Everyone has a plan until they get punched in the mouth." Whilst that may be true of the pugilists amongst us, what about the average bloke on the street? What's his game-plan? Football's a funny old sport, isn't it? The game may still be described as a thing of beauty but sometimes shouldn't some of that beauty shine from within? "Shine Through The Gloom" offers an indelible strength proving what can be achieved when men are challenged to think and believe way beyond their remit of ability. This novel introduces you to everyday characters who jump off the page and challenge you to aspire to the greatness within your own life. Characters like Mark Dellany Smith - otherwise known as "the running man;" an ex-prison chaplain that's been around the block more times than he cares to remember. Or the man mountain that is - Clay Jackson, who's so big he doesn't keep goal for Handley Park Rangers - he fills it! So why not take the time and allow the story to unfold about a group of men that chose to not go fast by going alone but instead chose to go far by going together. You can visit the author's website here: www.shinethroughthegloom.co.uk

Sometimes called the Ibiza of Portugal, Comporta, with its relaxed pace and artistic community, is the ideal destination for those looking to wander off course. A favorite of personalities like Christian Louboutin, Jacques Grange, and Anselm Kiefer, the fishing village's swaths of beaches and patchworks of rice paddies are serene backdrops for the striking homes found there: rustic cabanas and thatched-roof huts reflecting the carefree lifestyle that has become Comporta's hallmark. This distinctive setting challenges the minds of architects and designers, yielding unique spaces that delightfully blur the line between interior and exterior. Discover the beauty of simplicity with Comporta Bliss.

In programming courses, using the different syntax of multiple languages, such as C++, Java, PHP, and Python, for the same abstraction often confuses students new to computer science. *Introduction to Programming Languages* separates programming language concepts from the restraints of multiple language syntax by discussing the concepts at an abstract level. Designed for a one-semester undergraduate course, this classroom-tested book teaches the principles of programming language design and implementation. It presents: Common features of programming languages at an abstract level rather than a comparative level The

implementation model and behavior of programming paradigms at abstract levels so that students understand the power and limitations of programming paradigms Language constructs at a paradigm level A holistic view of programming language design and behavior To make the book self-contained, the author introduces the necessary concepts of data structures and discrete structures from the perspective of programming language theory. The text covers classical topics, such as syntax and semantics, imperative programming, program structures, information exchange between subprograms, object-oriented programming, logic programming, and functional programming. It also explores newer topics, including dependency analysis, communicating sequential processes, concurrent programming constructs, web and multimedia programming, event-based programming, agent-based programming, synchronous languages, high-productivity programming on massive parallel computers, models for mobile computing, and much more. Along with problems and further reading in each chapter, the book includes in-depth examples and case studies using various languages that help students understand syntax in practical contexts.

A new collection of delightfully macabre tales from a master of horror manga. An old wooden mansion that turns on its inhabitants. A dissection class with a most unusual subject. A funeral where the dead are definitely not laid to rest. Ranging from the terrifying to the comedic, from the erotic to the loathsome, these stories showcase Junji Ito's long-awaited return to the world of horror. -- VIZ Media

“Red November delivers the real life feel and fears of submariners who risked their lives to keep the peace.” —Steve Berry, author of *The Paris Vendetta* W. Craig Reed, a former navy diver and fast-attack submariner, provides a riveting portrayal of the secret underwater struggle between the US and the USSR in Red November. A spellbinding true-life adventure in the bestselling tradition of *Blind Man's Bluff*, it reveals previously undisclosed details about the most dangerous, daring, and decorated missions of the Cold War, earning raves from New York Times bestselling authors David Morrell, who calls it, “palpably gripping,” and James Rollins, who says, “If Tom Clancy had turned *The Hunt for Red October* into a nonfiction thriller, Red November might be the result.”

This overview of the state of the art of research in an exciting field mainly emphasizes the development of a semiclassical formalism that allows one to incorporate the effect of dissipation and decoherence in a precise, yet tractable way into the quantum mechanics of classically chaotic systems.

A colorful study of a masterpiece of residential architecture by one of America's leading modern architects offers a visual tour of the stylish Grotta House in Harding Township, New Jersey, a home that exemplifies the best in modernist design and showcases the owners' exceptional furniture and crafts collection. 12,500 first printing.

This comprehensive volume analyses Chinese birth policies and population developments from the founding of the People's Republic to the 2000 census. The main emphasis is on China's 'Hardship Number One Under Heaven': the highly controversial one-child campaign, and the violent clash between family strategies and government policies it entails. *Birth Control in China 1949-2000* documents an agonizing search for a way out of predicament and a protracted inner Party struggle, a massive effort for

social engineering and grinding problems of implementation. It reveals how birth control in China is shaped by political, economic and social interests, bureaucratic structures and financial concerns. Based on own interviews and a wealth of new statistics, surveys and documents, Thomas Scharping also analyses how the demographics of China have changed due to birth control policies, and what the future is likely to hold. This book will be of interest to students and scholars of Modern China, Asian studies and the social sciences.

From a journalist on the frontlines of the Students for Fair Admission (SFFA) v. Harvard case comes a probing examination of affirmative action, the false narrative of American meritocracy, and the attack on Asian American excellence with its far-reaching implications—from seedy test-prep centers to gleaming gifted-and-talented magnet schools, to top colleges and elite business, media, and political positions across America. Even in the midst of a nationwide surge of bias and incidents against them, Asians from coast to coast have quietly assumed mastery of the nation's technical and intellectual machinery and become essential American workers. Yet, they've been forced to do so in the face of policy proposals?written in the name of diversity?excluding them from the upper ranks of the elite. In *An Inconvenient Minority*, journalist Kenny Xu traces elite America's longstanding unease about a minority potentially upending them. Leftist agendas, such as eliminating standardized testing, doling out racial advantages to "preferred" minorities, and lumping Asians into "privileged" categories despite their deprived historical experiences have spurred Asian Americans to act. Going beyond the Students for Fair Admission (SFFA) v. Harvard case, Xu unearths the skewed logic rippling countrywide, from Mayor Bill de Blasio's attempted makeover of New York City's Specialized School programs to the battle over "diversity" quotas in Google's and Facebook's progressive epicenters, to the rise of Asian American activism in response to unfair perceptions and admission practices. Asian Americans' time is now, as they increase their direct action and amplify their voices in the face of mounting anti-Asian attacks. *An Inconvenient Minority* chronicles the political and economic repression and renaissance of a long ignored racial identity group?and how they are central to reversing America's cultural decline and preserving the dynamism of the free world.

Scholars and students alike will benefit from access to new German scholarship now available to English-language audiences.--Gregory E. Sterling, Reverend Henry L. Slack Dean and Lillian Claus Professor of New Testament, Yale Divinity School

This second edition of *Historical Dictionary of Native American Movements* contains a chronology, an introduction, appendixes, and an extensive bibliography. The dictionary section has over 200 cross-referenced entries on important personalities, language, religion, politics, and the environment.

This book aims to present a viable alternative to the Hopfield Neural Network (HNN) model for analog computation. It is well known the standard HNN suffers from problems of convergence to local minima, and requirement of a large number of neurons and synaptic weights. Therefore, improved solutions are needed. The non-linear synapse neural network (NoSyNN) is one such possibility and is discussed in detail in this book. This book also discusses the applications in computationally intensive tasks like

graph coloring, ranking, and linear as well as quadratic programming. The material in the book is useful to students, researchers and academician working in the area of analog computation.

This book is a biographical study of the geographer/explorer and banker Francis Rodd, the second Lord Rennell of Rodd (1895-1978). Rodd's life is interesting for the way it connected the worlds of geography, international finance, politics, espionage, and wartime military administration. He was famous in the 1920s for his journeys to the Sahara and his study of the Tuareg, People of the Veil (1926). A career in banking included a stint at the Bank of England, before he became a Partner in the merchant bank Morgan Grenfell--where remained for most of his working life (1933-1961). During the war he worked for the Ministry of Economic Warfare (1939=40), before getting closely involved in the sphere of military government (civil affairs). In 1942, he was War Office's Chief Political Officer in East Africa. He was then appointed head of the first Allied Military Government in occupied Europe (Chief Civil Affairs Officer of AMGOT). In civil affairs, he was drawn to the principles of indirect rule. A generalist in an age of growing specialisation, he was also a mixture of traditionalist and moderniser. A product of Eton and Balliol College, Oxford, and elevated to the peerage in 1941, he was well-connected socially, and his life is a window onto British society at a time of great change.

An explosive action-adventure novel created by will.i.am and renowned futurist Brian David Johnson. Wizards are real, robots from the future are here, and the fate of our world rests in the hands of one unsuspecting teenager. When a young man breaks into her home claiming her life is in danger, Ada Luring's world changes forever. Geller is a wizard, on the run from his father's hidden clan who want to kill Ada and her mother. Sara Luring is the scientist who will create the first robot, the wizards' age-old foes. But a robot has travelled back in time to find Ada, and will lay everything on the line to protect her, as she may just be the key to preventing the earth's destruction in the future. Ada, Geller and the robots must learn to work together to change the past and secure the future. But they don't have much time before a mysterious enemy launches its attack on Earth...
