Winner of the National Business Book Award From the New York Times bestselling author of *The Organized Mind* and *This Is Your Brain on Music*, a primer to the critical thinking that is more necessary now than ever We are bombarded with more information each day than our brains can process—especially in election season. It's raining bad data, half-truths, and even outright lies. New York Times bestselling author Daniel J. Levitin shows how to recognize misleading announcements, statistics, graphs, and written reports, revealing the ways lying weasels can use them. It's becoming harder to separate the wheat from the digital chaff. How do we distinguish misinformation, pseudo-facts, and distortions from reliable information? Levitin groups his field guide into two categories—statistical information and faulty arguments—ultimately showing how science is the bedrock of critical thinking. Infoliteracy means understanding that there are hierarchies of source quality and bias that variously distort our information feeds via every media channel, including social media. We may expect newspapers, bloggers, the government, and Wikipedia to be factually and logically correct, but they so often aren't. We need to think critically about the words and numbers we encounter if we want to be successful at work, at play, and in making the most of our lives. This means checking the plausibility and reasoning—not passively accepting information, repeating it, and making decisions based on it. Readers learn to avoid the extremes of passive gullibility and cynical rejection. Levitin's charming, entertaining, accessible guide can help anyone wake up to a whole lot of things that aren't so. And catch some weasels in their tracks!

According to Larry Teal, the best method of learning to play the saxophone is to study with a competent teacher. Teal's studies were mostly of instruments other than the saxophone, but as a student at a Chautauqua summer session, he came under the influence of Georges Barrère, the eminent French flutist. He played bass clarinet with the Detroit Symphony, but he continued to be absorbed by the saxophone. As a result of his acquired expertise and growing reputation, he was appointed to a full-time faculty position as a saxophone teacher by the University of Michigan -- the first ever to receive such an appointment from a major university. During his 21-year tenure, he attracted students from all over, thus exerting an ever widening influence on saxophone teaching and performing.

After decades of experimentation, musicians have begun to utilize a strikingly colorful palette of sounds on woodwind instruments. Flute, clarinet, and saxophone players, in many different musical settings, regularly use sounds that were unheard of in the middle of the twentieth century. Oboists, in comparison, have lagged somewhat behind their more adventurous colleagues. In writing *Oboe Unbound: Contemporary Techniques*, author Libby Van Cleve opens up the tradition-bound assumptions of the instrument's capabilities. Not only does she include descriptions of the instrument's standard technique from range and reeds to the use of vibrato, but she also discusses recent techniques, such as multiphonics, microtones, altered timbres, and extended range, to name a few. Van Cleve bolsters this book with numerous music examples and professionally-tested fingering charts, and concludes with basic information about the use of electronics for amplification, recording, and sound enhancement. The book's appendixes include a substantial bibliography of music and literature and a discography including jazz, non-western, and art music recordings. The revised edition incorporates new information about resources now available through the internet and marks the launch of a website that includes examples of all the contemporary sounds as well as audio and video recordings of unreleased compositions.

young jazz buff in Tokyo. A crooked British lawyer in Hong Kong. A disc jockey in Manhattan. A physicist in Ireland. An elderly woman running a tea shack in rural China. A cult-controlled terrorist in Okinawa. A musician in London. A transmigrating spirit in Mongolia. What is the common thread of coincidence or destiny that connects the lives of these nine souls in nine far-flung countries, stretching across the globe from east to west? What pattern do their linked fates form through time and space? A writer of pyrotechnic virtuosity and profound compassion, a mind to which nothing human is alien, David Mitchell spins genres, cultures, and ideas like gossamer threads around and through these nine linked stories. Many forces bind these lives, but at root all involve the same universal longing for connection and transcendence, an axis of commonality that leads in two directions—to creation and to destruction. In the end, as lives converge with a fearful symmetry, *Ghostwritten* comes full circle, to a point at which a familiar idea—that whether the planet is vast or small is merely a matter of perspective—strikes home with the force of a new revelation. It marks the debut of a writer of astonishing gifts.
