Parents and teachers today face a swirl of conflicting theories about child rearing and educational practice. Indeed, current guides are contradictory, oversimplified, and at odds with current scientific knowledge. Now, in *Awakening Children's Minds*, Laura Berk cuts through the confusion of competing theories, offering a new way of thinking about the roles of parents and teachers and how they can make a difference in children's lives. This is the first book to bring to a general audience, in lucid prose richly laced with examples, truly state-of-the-art thinking about child rearing and early education. Berk's central message is that parents and teachers contribute profoundly to the development of competent, caring, well-adjusted children. In particular, she argues that adult-child communication in shared activities is the wellspring of psychological development. These dialogues enhance language skills, reasoning ability, problem-solving strategies, the capacity to bring action under the control of thought, and the child's cultural and moral values. Berk explains how children weave the voices of more expert cultural members into dialogues with themselves. When puzzling, difficult, or stressful circumstances arise, children call on this private speech to guide and control their thinking and behavior. In addition to providing clear roles for parents

and teachers, Berk also offers concrete suggestions for creating and evaluating quality educational environments--at home, in child care, in preschool, and in primary school--and addresses the unique challenges of helping children with special needs. Parents, Berk writes, need a consistent way of thinking about their role in children's lives, one that can guide them in making effective child-rearing decisions. *Awakening Children's Minds* gives us the basic guidance we need to raise caring, thoughtful, intelligent children.

This volume establishes how English language constructs were measured in Cambridge English examinations over the period 1913 to 2012. An addition to the Studies in Language Testing series, this volume provides an overview of English language testing over the last century, with coverage of key theoretical and practical aspects of the assessment of reading, listening, writing and speaking skills. It includes examples of the Cambridge English exams, old and new, and is the first volume to describe in a systematic way the different theoretical influences which have shaped the development of the constructs underlying Cambridge English exams in the last 100 years.

Evaluating Language Assessments offers a comprehensive overview of the theoretical bases and research methodologies for the evaluation of language assessments and demonstrates the importance of a fuller understanding of this widely used evaluative tool. The volume explores language assessment evaluation in its wider political, economic, social, legal, and ethical contexts while also illustrating quantitative and qualitative methods through discussions of key research studies. Suitable for students in applied linguistics, second language acquisition and language assessment and education, this book makes the case

for a clear and rigorous understanding of the theoretical and methodological underpinnings of language assessment evaluation in order to achieve fair assessments and just institutions.

'House' has long been synonymous with 'home': the significance of four walls and a roof lies far deeper than simply shelter from the elements. A house stands for sanctuary, family, belonging, privacy and our pasts: even when standardised as a 'Barratt Home' or modern housing estate, every house bears the stamp of the people who live in it, remaining a bastion of quirky individualism. The Great Indoors is the first cultural history of the family home in the twentieth century, comparable to Rachel Hewitt's *Map of a Nation* or Joe Moran's *Queuing for*

Beginners. As society has changed, so has the house: the hall - which had its finest hour during the middle ages, when families and their servants ate, slept and socialised there together - has now been relegated to a mere passageway, only useful for getting to other (more private) rooms. Highmore shows how houses display the currents of class, identity and social transformation that are displayed in the arrangement and use of the family home. And he also offers an engaging and stimulating peek through the curtains to explain why the fridge is used as a communication centre, how the loo (or toilet) inspired its very own literary genre and what your furniture arrangement reveals about how you function as a family.

Bestselling author Alain de Botton considers how our private homes and public edifices influence how we feel, and how we could build dwellings in which we would stand a better chance of happiness. In this witty, erudite look at how we shape, and are shaped by, our surroundings, Alain de Botton applies Stendhal's motto that "Beauty is the promise of happiness" to the spaces we inhabit daily. Why should we pay attention to what architecture has to say to us? de Botton asks provocatively. With his trademark lucidity and humour, de Botton traces how human needs and desires have been served by styles of architecture, from stately Classical to minimalist Modern, arguing that the stylistic choices of a society can represent both its cherished ideals and the qualities it desperately lacks. On an individual level, de Botton has deep sympathy for our need to see our selves reflected in our surroundings; he demonstrates with great wisdom how buildings — just like friends — can serve as guardians of our identity. Worrying about the shape of our sofa or the colour of our walls might seem self-indulgent, but de Botton considers the hopes and fears we have for our homes at a new

level of depth and insight. When shopping for furniture or remodelling the kitchen, we don't just consider functionality but also the major questions of aesthetics and the philosophy of art: What is beauty? Can beautiful surroundings make us good? Can beauty bring happiness? The buildings we find beautiful, de Botton concludes, are those that represent our ideas of a meaningful life. The *Architecture of Happiness* marks a return to what Alain does best — taking on a subject whose allure is at once tantalizing and a little forbidding and offering to readers a completely beguiling and original exploration of the subject. As he did with Proust, philosophy, and travel, now he does with architecture.

These five practice tests closely replicate the Cambridge Certificate in Advanced English in both content and presentation, therefore providing realistic exam practice at the level of the CAE. This new edition incorporates all the changes made to the CAE examination (1999 and 2000), offering practice in the new exam formats. In addition to these changes, numerous revisions have been made to ensure that these tests accurately reflect the current exam. (The authors are closely involved with the CAE and as such have in-depth knowledge of all the papers. (Each of the texts in Papers 1 and 3 comes from a different source, giving students experience in dealing with a wide variety of reading material. (Photocopiable answer sheets enable students to practise transferring their answers from the test paper, reducing the risk of making mistakes under pressure in the actual exam. (Genuine examination conditions are simulated for Paper 4 Listening through the inclusion of instructions, pauses and repeats on

In addition, it provides a comprehensive guide to each paper and an insight into marking procedures and grading, illustrated by authentic sample answers.

This volume examines the nature of second language listening proficiency and how it can be assessed. The book highlights the need for test developers to provide a clear explication of the ability constructs which underpin the tests they offer in the public domain. This is increasingly necessary if claims about the validity of test score interpretation and use are to be supported both logically and with empirical evidence. It operationalises a comprehensive test validation framework which adopts a socio-cognitive perspective. The framework embraces six core components, examining and then analysing Cambridge ESOL listening tasks from the following perspectives: Test Taker; Cognitive Validity; Context Validity; Scoring Validity; Criterion-related Validity; and Consequential Validity.

It includes Specimen Paper (Solved), 10 Solved Model Test Papers and 5 Unsolved Model

The syllabus for the Cambridge English: First (FCE) exam has changed, and this product is no longer suitable preparation material. New Cambridge English

products are available to suit the requirements of the new syllabus. Based on the analysis of a specially compiled corpus of internationally recognized English as a foreign language (EFL) reading tests at different levels of proficiency, this volume explores the relation between the complexity of written texts and the difficulty of reading comprehension tests. It brings together linguistic investigations into the text-inherent complexity of the tests and a study of the data derived from their administration to groups of Italian university students. The study of text complexity draws on corpus linguistics, text linguistics and systemic functional linguistics. Both quantitative and qualitative analyses are carried out on the language used in the reading texts and in the related tasks that make up the corpus of tests. The assessment of test difficulty, on the other hand, is informed by research on language testing, and, in particular, by findings and methodologies of Classical Test Theory and Item Response Theory. Relevant aspects of these theories are used to analyze and interpret both the data obtained from the administration of the tests and the data collected by means of feedback questionnaires completed by test takers. The application of such diverse methodologies and the subsequent comparison of the results of the analyses has brought out interesting correlations between text-inherent complexity, perceived test difficulty and actual test difficulty.

This book investigates the issue of cloze-validity as a measure of second language reading comprehension. It starts off by making a distinction between general reading ability and the more specific reading comprehension followed by a thorough review of the related research on L2 reading comprehension and sorting out the confusion in the literature in this categorization. A comprehensive account of cloze procedure is presented discussing its origin, different versions, its use for teaching and testing purposes, as well the latest research on cloze as measures of readability, language proficiency and second language reading. The book includes studies conducted at several stages on validating cloze as a measure of reading and interview and questionnaire techniques are applied to investigate the validity of eight cloze tests, criterion reading tests, and other cloze

and reading tests in general. Two new cloze tests, i.e. reader-centered cloze test and phrase cloze test, are also introduced and researched as measures of reading ability. The book concludes with suggestions for developing tests that can better measure reading comprehension in light of recent research insights on the complex and dynamic nature of reading. This book will appeal to researchers, lecturers and graduate and post-graduate students taking a course in Second Language Acquisition, Applied Linguistics, TESOL, Language Assessment, and Educational Measurement.

Test developers need to provide a clear explication of the language ability constructs that underpin the tests they offer in the public domain; such an explication is essential for supporting claims about the validity --- or usefulness --- of tests and test scores. This edited volume develops a theoretical framework for validating tests of second language speaking ability. The framework is then applied through an examination of the tasks in Cambridge ESOL speaking tests from a number of different validity perspectives that reflect the socio-cognitive nature of any assessment event. The chapter authors show how an understanding and analysis of the framework and its components can assist test developers to operationalise their tests more effectively, especially in relation to the key criteria that differentiate one proficiency level from another. The volume is a rich source of information on all aspects of examining speaking ability. As such, it will be of considerable interest to examination boards who wish to validate their own speaking tests in a systematic and coherent manner, as well as to academic researchers and

graduate students in the field of language assessment more generally. This is a companion volume to the previously published titles Examining Writing and Examining Reading.
