"This is an era of extraordinary promise and support for addressing the needs of California's English learners. That's why this book, The California ELD Standards Companion, is so important. It's exactly the kind of bridge teachers need between standards and what it looks like in the classroom." —LAURIE OLSEN, Strategic Adviser, The Sobrato Early Academic Language (SEAL) Initiative California teachers: you're going to love this! Here at last is that single teaching resource for making the critical link between our ELD Standards and the CCSS ELA Standards. Standard by standard, you'll quickly discover how to integrate language development into your day-to-day content instruction, armed with an insider's understanding of how best to support our many English learners. Modeled after Jim Burke's Common Core series, this Grades 9-12 volume of The California ELD Standards Companion is every bit "that version of the standards you wish you had" because it's just so easy to digest and apply. It's all here: Horizontal and vertical views reveal how each ELD Standard changes and progresses grade by grade and proficiency level by proficiency level. What the Student Does Sections, also scannable by grade and proficiency level, unpack in student-friendly language what meeting a standard looks like in practice. CCSS ELA Standards are displayed side by side with California's ELD Standards so you can appreciate the purposeful alignment between the two as the basis for remodeling instructional practice. What the Teacher Does Sections provide specific instructional guidance by grade band, including student prompts and tips for differentiation across proficiency level. A dedicated vocabulary section offers a quick-reference glossary of key words and phrases as they are used within each ELD Standard. Each section concludes with a vignette from the California ELA/ELD Framework to illustrate exemplary

standards-based instruction. Thanks to the ELD Standards, we are now free to teach our ELs the way we knew best all along: language and content taught hand in hand across the school day. Lean on Ivannia Soto and Linda Carstens' California ELD Standards Companion as your one-stop guide for delivering that excellent education our ELs so deeply deserve.

The concept of "funds of knowledge" is based on a simple premise: people are competent and have knowledge, and their life experiences have given them that knowledge. The claim in this book is that first-hand research experiences with families allow one to document this competence and knowledge, and that such engagement provides many possibilities for positive pedagogical actions. Drawing from both Vygotskian and neo-sociocultural perspectives in designing a methodology that views the everyday practices of language and action as constructing knowledge, the funds of knowledge approach facilitates a systematic and powerful way to represent communities in terms of the resources they possess and how to harness them for classroom teaching. This book accomplishes three objectives: It gives readers the basic methodology and techniques followed in the contributors' funds of knowledge research; it extends the boundaries of what these researchers have done; and it explores the applications to classroom practice that can result from teachers knowing the communities in which they work. In a time when national educational discourses focus on system reform and wholesale replicability across school sites, this book offers a counter-perspective stating that instruction must be linked to students' lives, and that details of effective pedagogy should be linked to local histories and community contexts. This approach should not be confused with parent participation programs, although that is often a fortuitous consequence of the work described. It is also not an attempt to teach parents "how to do school" although that could certainly be an outcome if the parents so desired. Instead, the funds of knowledge approach attempts to accomplish something that may be even more challenging: to alter the perceptions of working-class or poor communities by viewing their households primarily in terms of their strengths and resources, their defining pedagogical characteristics. Funds of Knowledge: Theorizing Practices in Households, Communities, and Classrooms is a critically important volume for all teachers and teachers-to-be, and for researchers and graduate students of language, culture, and education.
