It's the perfect, inexpensive gift idea for birthdays, holidays or just because.

In Wisconsin, as her adoptive parents open their lake cabins for summer visitors, twelve-year-old Annalise, abandoned as an infant and able to communicate with the lake, discovers a growing toxic algae bloom and teams up with her friends to save the beloved body of water.

Eleven-year-old Calli, the third child in a family of busy high-achievers, likes to take her time and observe rather than rush around, and when she meets an awkward, insecure second-grader named Noah and is paired with him in the Peer Helper Program, she finds satisfaction and strength in working with him.

"Yolanda: Maid of Burgundy" by Charles Major. Published by Good Press. Good Press publishes a wide range of titles that encompasses every genre. From well-known classics & literary fiction and non-fiction to forgotten?or yet undiscovered gems?of world literature, we issue the books that need to be read. Each Good Press edition has been meticulously edited and formatted to boost readability for all e-readers and devices. Our goal is to produce eBooks that are user-friendly and accessible to everyone in a high-quality digital format.

It's summertime, and thirteen-year-old Nina Ross is feeling kind of lost. Her beloved grandma died last year; her parents work all the time; her brother's busy; and her best friend is into clothes, makeup, and boys. While Nina doesn't know what "her thing" is yet, it's definitely not shopping and makeup. And it's not boys, either. Though . . . has Eli, the boy next door,

always been so cute? This summer, Nina decides to change things. She hatches a plan. There are sixty-five days of summer. Every day, she'll anonymously do one small but remarkable good thing for someone in her neighborhood, and find out: does doing good actually make a difference? Along the way, she discovers that her neighborhood, and her family, are full of surprises and secrets. In this bighearted, sweetly romantic novel, things may not turn out exactly as Nina expects. They might be better. Praise: Finalist for the Golden Sower Award (Nebraska) Nominated for the Pennsylvania Young Reader's Choice Awards Nominated for the Sunshine State Young Readers Award (Florida) If horses could fly...then Calli Torcher might ride again. But a devastating accident left her in such pain she thought the chimes and chanting in her ears were a hallucination...until she found herself transported to another world, and met the Lladranans who had summoned her. Lladrana was a parallel, magical earth filled with exotic creatures, noble humans and enchantments—all threatened by an encroaching evil. And when the mighty volarans stopped obeying the Chevaliers, the flying horses' unexpected rebellion had thrown Lladrana into an uproar. In desperation, the sorcerers had sought help from afar—and gotten Calli. If she could fulfill this mission, perhaps she would also finally find all she had longed for—a mate, a home, a family. But against this great darkness, she had no battle experience, no strategy plans. She had only a bond with horses....

Mementos from her mother's students help a young girl to grieve in a middle-grade novel by award-winning author Amy Hest. (Ages 8-12) Eight-year-old Annie lives in a sunny apartment in Manhattan with her father, Professor Rossi. Life would be pretty good if only Annie didn't so achingly miss her mother. When Mrs. Rossi died suddenly, she left not only Annie but also a class full of students -- who pour out their hearts in a scrapbook Annie will treasure forever. With tenderness and humor, Amy Hest reveals the struggles of a father and daughter as they forge a new life together.

Staring Into the Fire: A Celtic Story By: Loretta Santoro In the old days, before the ice, people talked to the spirits directly. In time, people narrowed their focus and forgot how to do that. There were few left who could do it—the truthsayers mostly, but even they had forgotten how to read the stones. So when it came to predicting the future, they couldn't see very far. They did confirm that the rumors about an imminent invasion by the southern empire were true. How the people dealt with this news was up to each of them. Most would fight, of course, and those who wouldn't or couldn't hoped the invaders would treat them fairly. Meelah would fight. As any warrior would. But she is also a widowed mother and the daughter of a truthsayer, conflicting duties with conflicting purposes. With a clash of cultures looming over her, she begins to question her ways and decide for herself what parts are worth saving. As she searches for the ultimate truth, she concludes that the best she can do is to find her own truth because, in the end, her own truth is all that she can take with her.

American-born Skye is a good student and a star soccer player who never really gives any thought to the fact that her father is Japanese. Her cousin, Hiroshi, lives in Japan, and never really gives a thought to his uncle's family living in the United States.

Skye and Hiroshi's lives are thrown together when Hiroshi's family, with his grandfather (who is also his best friend), suddenly moves to the U.S. Now Skye doesn't know who she is anymore: at school she's suddenly too Japanese, but at home she's not Japanese enough. Hiroshi has a hard time adjusting to life in a new culture, and resents Skye's intrusions on his time with Grandfather. Through all of this is woven Hiroshi's expertise, and Skye's growing interest in, kite making and competitive rokkaku kite flying.

"On the eve of a top-secret space mission, Captain Calli Chase--a NASA pilot, quantum physicist, and cybercrime investigator--detects a problem in the tunnels below a NASA research center. She discovers dried blood, a missing security badge, a suspicious suicide. This series of disturbing clues point to Calli's twin sister Carme, who's been missing for days. Desperate to avoid disaster and clear her sister's name, Captain Chase races to find answers to her twin's erratic conduct. But time is running out, and she realizes that failure means catastrophe--for both the space program but for the safety of the entire nation"--Back cover.

When newly uncovered documents prove that the priest who first reported the Seven Cities of Cibola in 1539 had not been a fraud, but rather had fallen victim to others' greed and deception, archaeologist Kevin Scott is determined to retrace Coronado's expedition. Reprint.

Fifth in the hard-hitting military science-fiction series. On the distant world of Zoe, an expedition finds DNA-based life. When alien invaders are also discovered, Glenn Hamilton calls on the U.S.S. Merrimack for help. But the Ninth Circle and the Palatine Empire have also found Zoe. Soon everyone will be on a collision course to determine the fate of this planet.

Calli Be Gold Yearling Books

In this volume, the authors identify and assess all young adult novels that include autism content—either suggested or stated overtly—beginning with a novel published in 1968.

Immunogold silver staining is one of the most sensitive techniques available for visualizing the location of antibodies and nucleotide probes that have been bounded to specific antigens or to nucleotide sequences. As gold and silver staining continues to advance research in molecular morphology, this book presents the information you need to know about the various staining methods, their useful applications, and the advantages and drawbacks of each process. *Gold and Silver Staining: Techniques in Molecular Morphology* provides a timely description of approaches, methods, protocols, and applications. The contributors cover the latest developments and a wide range of applications from highly sensitive detection of antigens to single copy detection of DNA and RNA. Some of the authors are "living legends" in the field and bring their expertise and experience to this fine collaboration. Written in one consistent style, each chapter includes a concise, but comprehensive introduction, step-by-step protocols with technical hints, and a discussion of results and critical steps. What differentiates this book from all others like it, is the status of the editors, who have worked on this technique from its inception and have produced innumerable publications on the topic. The other distinguishing feature is that all of the contributors are amongst the absolute foremost leaders from the United States and Europe. *Gold and Silver Staining: Techniques in Molecular Morphology* presents a complete overview and detailed descriptions of this technique that allows the visualization of molecules that have never been localized before and with hitherto unknown sensitivity. Not only

does this book provide an excellent review of this field, but it also serves as a lab manual for those who want to carry out this technique in their laboratory and clinical work. Armed with this information, advances in this powerful field of research will ensue.

In this anthology with contributions about architecture, media, and infrastructure technology, the authors investigate in what multifaceted way architecture and information is in tune with contemporary technology, and in what way we live with them. The book is divided into following parts: BREEDING (medialising matter), BREATHING (transcending language), and INHABITING (making things inhabitable). The compilation of various text contributions creates a lexicon of 'naturing affairs' and is written for readers who look for an inspiring overview of our medialised environments.

"A thoughtful next step for readers of Andrew Clements." —BCCB Multiple points of view lead to multiple theories about what really happened after one kid turns a punishment into a protest in this hilarious novel from Michele Weber Hurwitz. Perennial good kid Ethan Marcus has just done the unthinkable: refuse to stay seated during class. He's not causing a riot; he's not wandering around; he's just sick of sitting. But the rules aren't designed for Ethan, and so he is sent to the principal's office. When Ethan's sentence results in a Reflection Day—McNutt Middle School's answer to detention—his faculty advisor suggests that Ethan channel the energy that caused his "transgression" by entering the school's Invention Day Competition. Ethan is not exactly Mark Zuckerberg, so he doubts his ability to make anything competition-worthy. That's the department of his slightly older sister Erin. But as Ethan and his buddy Brian get into the assignment, they realize they might actually have something. Enter Romanov, the resident tech whiz, who refuses to give them tips. But Erin is furious at her formally slacker—now traitor—brother. Meanwhile, Erin's friend Zoe is steering clear of Erin's drama after realizing that she may be crushing on Ethan. Then there's Brian who has bigger things to worry about, and finally loner kid Wesley, who may know more than others realize... Told in the perspectives of multiple students, discover what really happened on the day that one kid decided to take a stand against sitting down. Thalia Spencer is missing. Is she in trouble or simply avoiding her family? When his daughter disappears, conservative businessman John Spencer hires Toronto private eye Calli Barnow to find her. At first it seems like just another runaway case, but when Calli finds out that Thalia's lover, Zoe, hasn't seen her either, she starts to wonder if there's something sinister going on. Then Thalia's ex-boyfriend turns up dead. Is Calli hunting a killer or another victim? This fast-moving thriller follows Calli Barnow through the twists and turns of Toronto's neighbourhoods, from run-down but friendly Kensington Market to the Church Street gaybourhood, through the ravines of Rosedale and Mount Pleasant's mausoleums. Calli is an engaging companion, flawed but determined, pursued by her own demons as she tries to find a missing girl before more trouble finds her.

This important reference is the first comprehensive resource worldwide that reflects research achievements in neglected and underutilized crop biotechnology, documenting research events during the last three decades, current status, and future outlook. This book has 16 chapters divided into 4 sections. Section 1 has three chapters dealing with *Chenopodium* as a potential food source, thin cell layer technology in micropropagation of *Jatropha*, and *Panax vietnamensis*. Section 2 deals with molecular biology and physiology of *Haberlea rhodopensis*, cell trait prediction in vitro and in vivo of legumes, and application of TILLING in orphan crops. Section 3 has five chapters on biotechnology of neglected oil crops, *Quinoa*, *Erucia sativa*, *Stylosanthes*, and *Miscanthus*. And Section 4 contains five chapters mainly on genetic transformation of *Safflower*, *Jatropha*, *Bael*, and *Taro*. This section also includes a chapter on genetic engineering of Mangroves.

Astronomy-loving Calliope June has Tourette syndrome, so she sometimes makes faces or noises that she doesn't mean to make. When she and her mother move yet again, she tries to hide her TS. But it isn't long before the kids at her new school realize she's different. Only

Calliope's neighbor, who is also the popular student body president, sees her as she truly is--an interesting person and a good friend. But is he brave enough to take their friendship public? As Calliope navigates school, she must also face her mother's new relationship and the fact that they might be moving--again--just as she starts to make friends and finally accept her differences. Ellie Terry's affecting debut will speak to a wide audience about being true to oneself.

A vampire's job is never done. Stryke's a demon who's harbored a massive crush on Zoey. Will he get a happily ever after with the vampire? Melody's an innocent human with a massive crush on Creed. But when she absorbs demon energy, can she gain control of herself and her new power to keep from being enemy number one? Bastian's a butler who teams up with Ophelia, but are they enough to keep his charge safe? The second New Vampire Disorder box set contains books 4-6.

Eleven-year-old Calli Gold is the quiet third child in a family of loud overachievers. In fact, the family motto is Be Gold. Calli's sister is on an ice-skating team, and her brother's a basketball star. Her parents are sure she has a hidden gift for something. They just have to figure out what it is! But Calli has flopped at everything she's tried. She sure doesn't feel like a Gold. Until a new person enters her life. Second grader Noah Zullo might seem strange to some people, but Calli can't help liking him, and they become partners in their school's Peer Helper Program. When they create a booth for the Friendship Fair, they fill it with secrets and surprises. And as Calli and Noah work and learn together, they even surprise themselves. Michele Weber Hurwitz's debut is an endearing and gently humorous story about the true meaning of achievement and the important things an "ordinary" kid has to offer. Nominated for: Maud Hart Lovelace Award (Minnesota) Bluestem Readers' Choice Award (Illinois)

A Scott O'Dell Award-winning graphic artist visualizes the story of young Henry, who in 1908 Muskegon, Michigan, bonds with a young Buster Keaton over games of baseball while the latter summers locally with a troupe of vaudeville performers.

“A thoughtful next step for readers of Andrew Clements.” —BCCB (about Ethan Marcus Stands Up) Ethan and Erin go to Tech Camp and try to win a chance to “make” a difference in classrooms everywhere in this hilarious follow-up to Ethan Marcus Stands Up. Ethan and Erin Marcus may only be eleven months apart age-wise, but they are a million miles apart in every other respect. Ethan's laid back and takes things in stride. Erin's a little more...intense and doesn't really like to go with the flow. So when these two polar opposites are both invited to attend a prestigious invention/maker camp during winter break it seems almost impossible. Even though Erin and Ethan have reached a kind of truce, Erin thinks that his invitation to the camp was a mistake. And for that reason, Ethan decides to go. He has something to prove to everyone—but mostly to himself—and he's convinced that his desk-evator idea has great potential...if he can do it right. But

the Marcus siblings are going to have to find new partners. This is especially important to Erin whose rival, Romanov, is also attending the camp. Erin's never forgiven him for his comment about "girls" having no place in science. She's determined to beat him. But then she overhears someone talking about Romanov's project, and decides that she'll never be able to compete with his game-changing invention. So, what now? What if the Marcus siblings combine their ideas, their brains, and their teams, and make something spectacular? With only one day left, can Erin and Ethan actually create a workable model of their idea, and is it enough to win?

This is the true story of the journey of John Hawkins and his dog, Mouse, from way up north to way down south. Mouse has been John and his brother Tom's dog for life. They got her as a puppy when they were just little themselves, and they very quickly discovered that they could understand everything Mouse said and she could do the same. She was just a person like everyone else--though maybe a bit cleverer than most. You've maybe heard that John "ran away with his pet dog." But the truth about this story is that John and Mouse made the journey to save Tom. It's hard to pinpoint when Tom became truly ill, but when the doctors said they had to send Mouse away for fear of infection, the boys knew they had to do something. Without Mouse, Tom would never recover. The journey began to find a temporary home for Mouse, but once they'd set off, nothing turned out the way they'd planned.

An improved understanding of the interactions between nanoparticles and plant retorts, including their uptake, localization, and activity, could revolutionize crop production through increased disease resistance, nutrient utilization, and crop yield. This may further impact other agricultural and industrial processes that are based on plant crops. This two-volume book analyses the key processes involved in the nanoparticle delivery to plants and details the interactions between plants and nanomaterials. Potential plant nanotechnology applications for enhanced nutrient uptake, increased crop productivity and plant disease management are evaluated with careful consideration regarding safe use, social acceptance and ecological impact of these technologies. *Plant Nanobionics: Volume 1, Advances in the Understanding of Nanomaterials Research and Applications* begins the discussion of nanotechnology applications in plants with the characterization and nanosynthesis of various microbes and covers the mechanisms and etiology of nanostructure function in microbial cells. It focuses on the potential alteration of plant production systems through the controlled release of agrochemicals and targeted delivery of biomolecules. Industrial and medical applications are included. *Volume 2* continues this discussion with a focus on biosynthesis and toxicity.

Things are not as bad as they seem. They are worse. Being the personal assistant to a narcissistic actress who just happens to own the key to my family's undoing isn't exactly fun, and things don't get any better when her moody playboy vampire co-star starts sniffing at my neck. Just another day in Hollyweird. Things get worse when I discover that the

vamp thinks I'm his Fated Mate. But when a Pixie Army descends on L.A., I'm glad to have the fanged actor to watch my back. He might be able to keep me safe from those pointy-eared troublemakers, but can I keep myself safe from falling for him? Hollyweird Fae Series Inception of Gold – Book 1 Disruption of Magic – Book 2 Guardian of Twilight – Book 3

Spring 2013 Kids' Indie Next List For Ruby Pepperdine, the “center of everything” is on the rooftop of Pepperdine Motors in her donut-obsessed town of Bunning, New Hampshire, stargazing from the circle of her grandmother Gigi’s hug. That’s how everything is supposed to be—until Ruby messes up and things spin out of control. But she has one last hope. It all depends on what happens on Bunning Day, when the entire town will hear Ruby read her winning essay. And it depends on her twelfth birthday wish—unless she messes that up too. Can Ruby’s wish set everything straight in her topsy-turvy world?

From the bestselling Calligraphuck line! Classy as Fuck Cocktails is a cocktail book that celebrates the fine arts of drinking and swearing. Feeling classy as fuck? Have a Bellini. Life kicking your ass? Try a Corpse Reviver. Expecting company? Batch that shit! • Includes more than 60 recipes ranging from the fucking classics to fancy-ass twists • Features dozens of variations including low and non-alcohol options • Covers the basics on glassware, hardware, spirits, and methods This cocktail collection is a fucking must for beginners and experienced mixologists alike. • Makes a great pick for cocktail enthusiasts of all skill levels—from beginners to experienced mixologists—who don't shy away from cursing • Pair it with a cocktail shaker, shot glasses, coasters, or other barware for an extra-special holiday or birthday present. • You'll love this book if you love books like The Little Black Book Of Cocktails: The Essential Guide to New & Old Classics by Virginia Reynolds, Tequila Mockingbird: Cocktails with a Literary Twist by Tim Federle, and Big Bad-Ass Book of Cocktails: 1,500 Recipes to Mix It Up! by Running Press.

As the Empire of Rome declares war against the United States-led Earth and attacks it, the crew of the Merrimack launches a retaliatory strike, unaware that the alien Hive is preparing its own attack on Earth.
