I now have a new hobby and passion for taking pictures of nature and animals." --- (Tina A. - Orlando, FL) "I was thinking about buying a DSLR camera but was hesitant because I was sort of intimidated by all the terminology and lingo. You Are About To Learn How To Stop Taking Bland, Uncreative, Amateurish Photos On Your Expensive Camera! If you are like most beginner photographers, the reason you acquired your top of the range camera is because of the hope that you could take out of this world, professional looking photographs with your digital camera for posterity. Unfortunately, what they show on camera ads is nothing close to what the average untrained beginner takes. While the typical ad shows users capturing magic moments on the fly while taking advantage of all the cool features in a standard digital camera to optimize photo composition, the typical beginner user takes boring photos that are either too exposed, blurred, boring and uncreative. Why is that so, you may ask? The reason is simple; for the average untrained beginner, the typical DSLR camera is too advanced such that they can't use any other function other than the automatic mode. Obviously, you didn't buy a fancy DSLR to point and shoot all the time. Sometimes you want to compose your photos professionally by leveraging the full power of your digital camera. You want to take photos exactly as you see them in your mind. How then do you do that? Let me show you how in this book! I will lay out everything for you to consume in easy lingo-free language!
