This manual contains overviews on language acquisition and distinguishes between first- and second-language acquisition. It also deals with Romance languages as foreign languages in the world and with language acquisition in some countries of the Romance-speaking world. This reference work will be helpful for researchers, students, and teachers interested in language acquisition in general and in Romance languages in particular.

The Cartographic Turn contains contributions on maps and cartography from multiple authors from various disciplines: geography, demography, cartography, art theory, architecture and philosophy. While such diversity could imply that this book is a collection of independent contributions gathered only by their topic, this impression would be misleading. Rather, this book develops four simple propositions that actually can be streamlined into a single concept expressed through four different perspectives. Above all, maps convey rational, aesthetic, ethical and personal messages, at times separately but more often in unison, and this mix offers ample fields for studying social complexity. Beyond that, maps are, by their very existence, both representations of pre-existing spaces and creations of new spaces. Consequently, the historical or anthropological analysis of maps as semantic objects should be connected to the production of new maps, namely those that take advantage of the powerful tools provided by digital technology. Finally, the issues of contemporary mapping should be read in light of recent innovations within social sciences on space. Before this cartographic turn, technicians, historians, users and exegetes were distinct and decidedly turned away from each other. The era of the singular engineer-designed map is past. Maps have gained many new actors, and these actors are critical thinkers. This book would modestly like to contribute to a durable association between mapping and reflexivity.

Cartographers, historians of cartography, geographers, visual scientists and artists, social scientists as well as advanced students in these disciplines will appreciate and benefit from reading *The Cartographic Turn*.

Technology has long been an essential consideration in public discussions of the environment, with the focus overwhelmingly on creating new tools and techniques. In more recent years, however, activists, researchers, and policymakers have increasingly turned to mobilizing older technologies in their pursuit of sustainability. In fascinating case studies ranging from the Early Modern secondhand trade to utopian visions of human-powered vehicles, the contributions gathered here explore the historical fortunes of two such technologies—bicycling and waste recycling—tracing their development over time and providing valuable context for the policy successes and failures of today.

A historical look at the American fascination with Italian fascism during the interwar period In the interwar years, the United States grappled with economic volatility, and Americans expressed anxieties about a decline in moral values, the erosion of families and communities, and the decay of democracy. These issues prompted a profound ambivalence toward modernity, leading some individuals to turn to Italian fascism as a possible solution for the problems facing the country. *The Machine Has a Soul* delves into why Americans of all stripes sympathized with Italian fascism, and shows that fascism's appeal rested in the image of Mussolini's

regime as “the machine which will run and has a soul”—a seemingly efficient and technologically advanced system that upheld tradition, religion, and family. Katy Hull focuses on four prominent American sympathizers: Richard Washburn Child, a conservative diplomat and Republican operative; Anne O’Hare McCormick, a distinguished New York Times journalist; Generoso Pope, an Italian-American publisher and Democratic political broker; and Herbert Wallace Schneider, a Columbia University professor of moral philosophy. In fascism’s violent squads they saw youthful glamour and impeccable manners, in the megalomaniacal Mussolini they perceived someone both current and old-fashioned, and in the corporate state they witnessed a politics that could revive addled minds. They argued that with the right course of action, the United States could use fascism to take the best from modernity while withstanding its harmful effects. Investigating the motivations of American fascist sympathizers, *The Machine Has a Soul* offers provocative lessons about authoritarianism’s appeal during times of intense cultural, social, and economic strain.

Learn Italian - Level 7: Intermediate Volume 1: Lessons 1-25 Innovative Language Learning Diana rivista venatoria quindicinale QMariner Books

This volume includes a number of papers written in English and published in the last fifteen years in which the Italian labour market faced many changes. The book not only provides the international readership with a frame of reference – in both conceptual and legal terms – that helps to appreciate the Italian Labour Law currently in force, but also represents a contribution to moving beyond the self-referential nature of the Italian debate on the reform of labour laws. As such, the book supplies the reform process of the Italian labour market with an international and comparative dimension which – in accordance with the programmatic approach of Marco Biagi – will also feed the debate at the national level.

Modern technology has given rise to electronic medical records, remote monitoring systems, and satellite-enabled real-time examinations in which patient and physician might be separated by thousands of miles. Yet, when it comes to diagnosing difficult cases, the clinician's strongest asset might just be one of the oldest tools of the medical profession—careful listening. *True Medical Detective Stories* is a fascinating compendium of nineteen true-life medical cases, each solved by clinical deduction and facilitated by careful listening. These accounts present puzzling low-tech cases—most of them serious, some humorous—that were solved either at the bedside or by epidemiological studies. Dr. Clifton Meador's book is a wonderful contribution to the genre of medical detective stories mastered by the legendary Berton Roueché. As a staff writer at *The New Yorker* from 1944 until his death fifty years later, Roueché popularized this form, which has provided source material for feature films and most recently supplied scenarios featured in medical television dramas, such as *House*. While Hollywood frequently oversimplifies and elides the real clinical situations, *True Medical Detective Stories* sets the record straight with a voice of authority and an engaging style rooted in the fact that most of the cases presented involve Dr. Meador's actual patients. Dr. Meador discovered Berton Roueché's writing as a teenager, when he first read *Eleven Blue Men*. In an astonishing twist of fate, Roueché, in later years, traveled to Nashville to meet with Dr. Meador and discuss one of his cases, with Roueché's account published posthumously under the title, *The Man*

Who Grew Two Breasts. In a fitting tribute to Roueché, this perplexing case is revisited by Dr. Meador in the opening chapter of this highly enjoyable book. True Medical Detective Stories is a captivating read that will keep you marveling over the idiosyncrasies of the human body and the ingenuity of the human mind.

The key aim of this volume is to demonstrate ways in which an understanding of history can be used to inform present-day transport and mobility policies. This is not to say that history repeats itself, or that every contemporary transport dilemma has an historical counterpart: rather, the contributors to this book argue that in many contexts of transport planning a better understanding of the context and consequences of past decisions and processes could lead to more effective policy decisions. Collectively the authors explore the ways in which the methods and approaches of historical research may be applied to contemporary transport and policy issues across a wide range of transport modes and contexts. By linking two bodies of academic research that for the most part remain separate this volume helps to inform current transport and mobility policies and to stimulate innovative new research that links studies of both past and present mobilities.

Anthropology has two main tasks: to understand what it is to be human and to examine how humanity is manifested differently in the diversity of culture. These tasks have gained new impetus from the extraordinary rise of the digital. This book brings together several key anthropologists working with digital culture to demonstrate just how productive an anthropological approach to the digital has already become. Through a range of case studies from Facebook to Second Life to Google Earth, Digital Anthropology explores how human and digital can be defined in relation to one another, from avatars and disability; cultural differences in how we use social networking sites or practise religion; the practical consequences of the digital for politics, museums, design, space and development to new online world and gaming communities. The book also explores the moral universe of the digital, from new anxieties to open-source ideals. Digital Anthropology reveals how only the intense scrutiny of ethnography can overturn assumptions about the impact of digital culture and reveal its profound consequences for everyday life. Combining the clarity of a textbook with an engaging style which conveys a passion for these new frontiers of enquiry, this book is essential reading for students and scholars of anthropology, media studies, communication studies, cultural studies and sociology.

"Knowledge Of the Higher Worlds And Its Attainment" was originally published in 1938. This inspiring book by Rudolf Steiner offers a wealth of knowledge on the path of esoteric initiation. Included is much information on the higher body, higher planes of existence, and the spiritual encounter with the 'Guardians of the Threshold, as well as basic information on the mystical belief system. This book would be an excellent addition to the bookshelf of anyone with an interest in the subject. Contents Include : How is Knowledge of the Higher World Attained?; The Stages of Initiation; Some Practical Aspects; The Conditions of Esoteric Training; Some Results of Initiation; The Transformation of Dream Life; The Continuity of Consciousness; The Partition of Human Personality During Spiritual Training; The Guardian of the Threshold; The Great or Second Guardian of the Threshold. Many vintage books such as this are increasingly scarce and expensive. It is with this in mind that we are republishing this volume now in an affordable, modern, high-quality edition complete with a specially-commissioned new biography of the author.

The Wild Swans at Coole by William Butler Yeats, first published in 1919, is a rare manuscript, the original residing in one of the great libraries of the world. This book is a reproduction of that original, which has been scanned and cleaned by state-of-the-art publishing tools for better readability and enhanced appreciation. Restoration Editors' mission is to bring long out of print manuscripts back to life. Some smudges, annotations or unclear text may still exist, due to permanent damage to the original work. We believe the literary significance of the text justifies offering this reproduction, allowing a new generation to appreciate it. Go Southwest, Old Man, a sort of personal remake of 'Go West, Young Man', the founding episteme of the American nineteenth century, conciliates these two souls (well, not to be pretentious, let's simply say two sides) that have actually always lived in harmony. This is a book generated by a quarter of a century spent wandering around the canyons and deserts of Arizona, Colorado, Utah and, above all New Mexico, with a view to penetrating the by now universal legend of the West, approaching the cultures (English, Hispanic and native American), and mastering the literature. The slant is composite: melding the scholarly with the informative and the travel journal, and the writing is composite too, because the book speaks English and Italian. It talks about cinema (lots of John Ford) and about detective stories, the most popular genre here, about visual arts and Latino folklore, about the legend of the West, the so-called 'Soul of the Southwest', and the kitsch style of Santa Fe. And it talks about (and with) some of the greatest writers that the Southwest has spawned: Rudolfo Anaya, Stanley Crawford, John Nichols and Hillerman. So what we have is a first-hand experience of the Southwest; where the ego is not entrenched within a precise disciplinary role but opens up - and exposes itself - to the thrilling risk of the discovery that can renew it.

Since the growth of social media, human communication has become much more visual. This book presents a scholarly analysis of the images people post on a regular basis to Facebook. By including hundreds of examples, readers can see for themselves the differences between postings from a village north of London, and those from a small town in Trinidad. Why do women respond so differently to becoming a mother in England from the way they do in Trinidad? How are values such as carnival and suburbia expressed visually? Based on an examination of over 20,000 images, the authors argue that phenomena such as selfies and memes must be analysed in their local context. The book aims to highlight the importance of visual images today in patrolling and controlling the moral values of populations, and explores the changing role of photography from that of recording and representation, to that of communication, where an image not only documents an experience but also enhances it, making the moment itself more exciting.

This Student Edition of Brecht's classic dramatisation of the conflict between free enquiry and official ideology features an extensive introduction and commentary that includes a plot summary, discussion of the context, themes, characters, style and language as well as questions for further study and notes on words and phrases in the text. It is the perfect edition for students of theatre and literature. Along with Mother Courage, the character of Galileo is one of Brecht's greatest creations, immensely live, human and complex. Unable to resist his appetite for scientific investigation, Galileo's heretical discoveries about the solar system bring him to the attention of the Inquisition. He is scared into publicly abjuring his theories but, despite his self-contempt, goes on

working in private, eventually helping to smuggle his writings out of the country. As an examination of the problems that face not only the scientist but also the whole spirit of free inquiry when brought into conflict with the requirements of government or official ideology, *Life of Galileo* has few equals. Written in exile in 1937-9 and first performed in Zurich in 1943, *Galileo* was first staged in English in 1947 by Joseph Losey in a version jointly prepared by Brecht and Charles Laughton, who played the title role. Printed here is the complete translation by John Willett.

An overlooked classic of Italian literature, this epic and unforgettable novel recounts one man's long and turbulent life in revolutionary Italy. At the age of eighty-three and nearing death, Carlo Altoviti has decided to write down the confessions of his long life. He remembers everything: his unhappy childhood in the kitchens of the Castle of Fratta; romantic entanglements during the siege of Genoa; revolutionary fighting in Naples; and so much more. Throughout, Carlo lives only for his twin passions in life: his dream of a unified, free Italy and his undying love for the magnificent but inconstant Pisana. Peopled by a host of unforgettable characters - including drunken smugglers, saintly nuns, scheming priests, Napoleon and Lord Byron - this is an epic historical novel that tells the remarkable and inseparable stories of one man's life and the history of Italy's unification. Ippolito Nievo was born in 1831 in Padua. *Confessions of an Italian*, written in 1858 and published posthumously in 1867, is his best known work. A patriot and a republican, he took part with Garibaldi and his *Thousand* in the momentous 1860 landing in Sicily to free the south from Bourbon rule. Nievo died before he reached the age of thirty, when his ship, en route from Palermo to Naples, went down in the Tyrrhenian Sea in early 1861. He was, Italo Calvino once said, the sole Italian novelist of the nineteenth century in the 'daredevil, swashbuckler, rambler' mould so dear to other European literatures. Frederika Randall has worked as a cultural journalist for many years. Her previous translations include Luigi Meneghello's *Deliver Us* and Ottavio Cappellani's *Sicilian Tragedee* and Sergio Luzzatto's *Padre Pio: Miracles and Politics in a Secular Age*. Lucy Riall is Professor of Comparative History at the European University Institute. Her many books include *Garibaldi. Invention of a Hero*. 'Of all the furore that came out of the Risorgimento, only Manzoni and Nievo really matter today' - Umberto Eco 'The one 19th century Italian novel which has [for an Italian reader] that charm and fascination so abundant in foreign literatures' - Italo Calvino 'Perhaps the greatest Italian novel of the nineteenth century' - Roberto Carnero 'A spirited appeal for liberté, égalité and fraternité, the novel is also an astute, scathing and amusing human comedy, a tale of love, sex and betrayal, of great wealth and grinding poverty, of absolute power and scheming submission, of idealism and cynicism, courage and villainy' - *The Literary Encyclopedia*

Spanning a period of thirty years, a collection of eighteen short stories includes "Silence of the Llano," "In search of Epifano," and "Children of the Desert."

'An astonishing portrait of an innocent on the verge of discovering the cruelties of love... there are whispers here of the future work of Elena Ferrante' Elizabeth Strout, from the introduction 'Life was a perpetual holiday in those days...' It's the height of summer in 1930s Italy and sixteen-year-old Ginia is desperate for adventure. So begins a fateful friendship with Amelia, a stylish and sophisticated artist's model who envelops her in a dazzling new world of bohemian artists and intoxicating freedom. Under the

spell of her new friends, Ginia soon falls in love with Guido, an enigmatic young painter. It's the start of a desperate love affair, charged with false hope and overwhelming passion - destined to last no longer than the course of a summer. The Beautiful Summer is a gorgeous coming-of-age tale of lost innocence and first love, by one of Italy's greatest writers. 'Pavese, to me, is a constant source of inspiration' Jhumpa Lahiri 'One of the few essential novelists of the mid-twentieth century' Susan Sontag '[Pavese writes books of] extraordinary depth where one never stops finding new levels, new meaning' Italo Calvino 'For my trip to Los Angeles, I'm packing The Beautiful Summer, a slender account of love in 1930s Italy' Jessie Burton, bestselling author of The Miniaturist and The Muse

How regional Italian cuisine became the main ingredient in the nation's political and cultural development.

This first book in Castells' groundbreaking trilogy, with a substantial new preface, highlights the economic and social dynamics of the information age and shows how the network society has now fully risen on a global scale. Groundbreaking volume on the impact of the age of information on all aspects of society Includes coverage of the influence of the internet and the net-economy Describes the accelerating pace of innovation and social transformation Based on research in the USA, Asia, Latin America, and Europe

Offers the first overarching history of the humanities from Antiquity to the present.

For more than 120 years (1714–1837) Great Britain was linked to the German Electorate, later Kingdom, of Hanover through Personal Union. This made Britain a continental European state in many respects, and diluted her sense of insular apartness. The geopolitical focus of Britain was now as much on Germany, on the Elbe and the Weser as it was on the Channel or overseas. At the same time, the Hanoverian connection was a major and highly controversial factor in British high politics and popular political debate. This volume was the first systematically to explore the subject by a team of experts drawn from the UK, US and Germany. They integrate the burgeoning specialist literature on aspects of the Personal Union into the broader history of eighteenth- and early nineteenth-century Britain. Never before had the impact of the Hanoverian connection on British politics, monarchy and the public sphere, been so thoroughly investigated.

The New Deal: A Global History provides a radically new interpretation of a pivotal period in US history. The first comprehensive study of the New Deal in a global context, the book compares American responses to the international crisis of capitalism and democracy during the 1930s to responses by other countries around the globe—not just in Europe but also in Latin America, Asia, and other parts of the world. Work creation, agricultural intervention, state planning, immigration policy, the role of mass media, forms of political leadership, and new ways of ruling America's colonies—all had parallels elsewhere and unfolded against a backdrop of intense global debates. By avoiding the distortions of American exceptionalism, Kiran Klaus Patel shows how America's reaction to the Great Depression connected it to the wider world. Among much else, the book explains why the New Deal had enormous repercussions on China; why Franklin D. Roosevelt studied the welfare schemes of Nazi Germany; and why the New Dealers were fascinated by cooperatives in Sweden—but ignored similar schemes in Japan. Ultimately, Patel argues, the

New Deal provided the institutional scaffolding for the construction of American global hegemony in the postwar era, making this history essential for understanding both the New Deal and America's rise to global leadership.

Therapeutic psychology suggests that we are essentially self-creating and able to heal ourselves emotionally. This view reflects the wishful thinking necessary for the success of consumer capitalism, but it does not reflect the way things are. Smail examines how our experience of ourselves and our conduct can be explained in terms of the social operation of power and interest.

With Europe convulsed in wars over religion, a young theology student finds himself siding with heretics and the disenfranchised while confronting an agent of the Vatican who is determined to hunt down and destroy enemies of the faith, in a meticulously rendered historical thriller set against the backdrop of the Reformation. Reprint.

Mussolini, in the thousand guises he projected and the press picked up, fascinated Americans in the 1920s and the early '30s. John Diggins' analysis of America's reaction to an ideological phenomenon abroad reveals, he proposes, the darker side of American political values and assumptions. Originally published in 1972. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Marking an important moment in the Art Institute of Chicago's 136-year history, this book documents an exceptional gift to the museum: the Edlis/Neeson Collection, consisting of 44 stellar works of contemporary art. Among the highlights are major paintings by some of the 20th century's best-known artists, including Jasper Johns, Roy Lichtenstein, Robert Rauschenberg, Gerhard Richter, Cy Twombly, and Andy Warhol. Also included in the gift are paintings, photographs, and sculptures by icons of contemporary art such as Damien Hirst, Jeff Koons, and Cindy Sherman. This catalogue places the Edlis/Neeson Collection in direct dialogue with works already in the Art Institute's holdings. An essay by James Rondeau situates the gift in the context of the museum's history and uses it to illustrate the growth and development of Pop Art. Most importantly, this book celebrates a transformative gift that allows the Art Institute to claim the most important collection of modern and contemporary art in any encyclopedic institution in the world.

This is the first history of the bicycle to trace not only the technical background to its invention, but also to contrast its social and cultural impact in different parts of the world, and assess its future as a continuing global phenomenon.

The American bombing of terrorist bases in Afghanistan under the protection of the Islamic fundamentalist Taliban movement has brought the Taliban into sharp focus as the most radical and extreme Islamic movement in the world today. Little is known about the Taliban because of the deep secrecy that surrounds their political movement, their leaders and their aims. The geo-strategic implications of the Taliban are already creating severe instability in Russia, Iran and the five Central Asian republics where the Taliban have become a major player in the new Great Game, as Western countries and companies compete to build oil and gas

pipelines from Central Asia to Western and Asian markets. The Taliban's implementation of their extreme interpretation of Islam poses new challenges to the Muslim world and the West's understanding of radical Islam in the post-Cold War era. 'Taliban: Islam, Oil and the New Great Game' was runner-up in the prestigious annual British-Kuwait Friendship Society Prize, administered by the British Society for Middle Eastern Studies.

Witness the French anthropologist as we have never seen him before. Marc Augé coined the term “non-place” to describe the ubiquitous airports, hotels, and motorways filled with anonymous individuals. In this new book, he casts his anthropologist’s eye on a subject close to his heart: cycling. With *In Praise of the Bicycle*, Augé takes us on a two-wheeled ride around our cities and on a personal journey into ourselves. We all remember the thrill of riding a bike for the first time and the joys of cycling. Here he reminds us that these memories are not just personal, but rooted in a time and a place, in a history that is shared with millions of others. Part memoir, part manifesto, Augé’s book celebrates cycling as a way of reconnecting with the places in which we live, and, ultimately, as a necessary alternative to our disconnected world.

1001 Bikes to Dream of Riding Before You Die celebrates the designs and individual stories behind the world's most influential, ground-breaking and high-profile bicycles.

Income inequality, displaced and imprisoned populations, destruction of land and water: today's dislocations cannot be understood in the usual terms of poverty and injustice, Saskia Sassen argues. They are more accurately understood as expulsions--from professional livelihood, from living space, from the very biosphere that makes life possible.
