Booked for Christmas, a novella from debut author Lily Menon, is sure to get readers in the holiday spirit! Novelist Sophia Hart (real name: Sophie Bartholomew-Kaur-Hughes, but try fitting that on a book cover) absolutely hates her loudest critic—Evan Wolfe, evil mastermind behind the Lone Wolfe book review column. They've never met, but Wolfe's favorite pastime seems to be dumping on Sophie's unapologetically happy, magical romances. Sophie, not one to be left behind, gets her revenge in her own ways (never annoy a writer in search of a villain). When Sophie decides to throw a holiday party at her cabin, Wolfe is the last person on her mind. But the universe has a twisted sense of humor. Not only does Wolfe show up as someone's plus one, but a massive snowstorm blows in, stranding them both alone together in Sophie's cabin. Over the next few days, Sophie begins to realize that Wolfe isn't as odiously cynical a man as she'd originally thought. In fact, he's kind of...sweet. And impossibly hot. But still, Sophie's been hurt before and she has so much to lose. What she needs is one sure sign that she and Wolfe are meant to be together. Will Sophie and Wolfe get their Christmas miracle?

Interviews with the Disney artist who created Scrooge McDuck and many well-loved comic books Disney artist Carl Barks (1901-2000) created one of Walt Disney's most famous characters, Scrooge McDuck. Barks also produced more than 500 comic book stories. His work is ranked among the most widely circulated, best-loved, and most influential of all comic book art. Although the images he created are known virtually everywhere, Barks was an isolated storyteller, living in the desert of California and preferring to labor without public fanfare during most of his career. He created work of such exceptional quality that he was accorded the greatest autonomy of any Disney artist. He is the only comic book artist ever to receive a Disney Legends award. The influence of Barks's work on such filmmakers as George Lucas and Steven Spielberg and on such artists as Gottfried Helnwein has extended Barks's significance far beyond the boundaries of comics. After Barks's death at the age of ninety-nine, Roy Disney praised him for his "brilliant artistic vision." Carl Barks: Conversations is the only comprehensive collection of Barks's interviews. It ranges chronologically from the very first one (with Malcolm Willits, the fan who uncovered Barks's identity) to the artist's final conversations with Donald Ault in the summer of 2000. In between are interviews conducted by J. Michael Barrier, Edward Summer, Bruce Hamilton, and others. Several of these interviews are published here for the first time. Ault's friendship with Barks, ranging over a period of thirty years, provides an unusually intimate resource not only for standard q&a interviews but also for casual conversations in informal settings. Carl Barks: Conversations reveals previously unknown information about the life, times, and opinions of one of the master storytellers of the twentieth century. Donald Ault, a professor of English at the University of Florida, is the author of Narrative Unbound: Re-

Visioning William Blake's The Four Zoas and Visionary Physics: Blake's Response to Newton. His work has been published in Studies in Romanticism, The Wordsworth Circle, Modern Philology, and The Comics Journal.

Communication is an art, and anyone--whether shy or outgoing--can improve his or her conversational skills. In Confident Conversation, Mike Bechtle offers a straightforward guide to making good conversation that works for any personality type. He highlights the art of give and take, stresses the importance of listening, and gives confidence to those who hesitate to strike up a conversation. He shows readers that they don't have to have a stockpile of great stories to tell in order to make good conversation. Instead, he encourages an "explorer" mind-set and gives readers the tools they need to talk to anyone, anytime, anywhere.

This book explores the intersection between individual cognitive modeling and modeling of multi-agent interaction.

Operations research uses quantitative models to analyze and predict the behavior of systems and to provide information for decision makers. Two key concepts in operations research are optimization and uncertainty. This volume consists of a collection of peer reviewed papers from the International Workshop on Recent Advances in Stochastic Operations Research (RASOR 2005), August 25-26, 2005, Canmore, Alberta, Canada. In particular, the book focusses on models in stochastic operations research, including queueing models, inventory models, financial engineering models, reliability models, and simulations models."

Viral hepatitis B or C is the most common cause of chronic liver disease worldwide and accounts for about 80% of all hepatocellular carcinoma cases. Thus, combating viral hepatitis remains one of the most pressing public health issues today. Animal models and cell-based systems are essential tools for addressing the many still unresolved basic and clinical problems. Experimental models are needed to better understand the viral life cycles, pathogenetic aspects and natural defense mechanisms, while preclinical models are required for evaluating novel preemptive and therapeutic strategies. In 2010, esteemed researchers gathered at a workshop held at the Richardson Centre for Functional Foods and Nutraceuticals at the University of Manitoba in Winnipeg, Canada. Drawn from these proceedings, Canola and Rapeseed: Production, Processing, Food Quality, and Nutrition presents state-of-the-art information on the chemistry of the minor constituents of canola and rapeseed and their impact on human health. The book also identifies new areas of

research and opportunities for the industrial application of functional foods and nutraceuticals from canola and rapeseed. Topics include: The historical development, properties, and performance of canola Characteristics and bioactives of sinapic acid derivatives and the decarboxylation pathways leading to their formation Canola protein processing High omega-9 canola oils and their future applications Modification of Brassica oilseeds Rapid analytical methods for measuring oil content The potential of ultrasound and supercritical fluid extraction for producing value-added by-products The processing of virgin rapeseed oils in Europe Extraction and application of canola protein The frying stability of high-oleic low-linolenic acid canola oils The potential of mustard oil for biodiesel The final chapters demonstrate the health benefits of canola, including antioxidant, antimutagenic, and anticancer properties. Authored by experienced researchers in the field, the book chapters have been expanded considerably to include a number of areas not contained in the original workshop, providing comprehensive coverage of the potential of this essential crop.

Two of the most trusted and respected figures from the world's largest bodybuilding periodical, "Muscle & Fitness," have come together to write the definitive resource for building muscle from the waist up. Photos throughout. "Twenty-nine oral histories and additional excerpts, selected from 2000 interviews with former slaves conducted in the 1930s for a WPA Federal Writers Project, document the conditions of slavery that . . . lie at the root of today's racism." —Publishers Weekly In the 1930s, the Works Progress Administration commissioned an oral history of the remaining former slaves. Bullwhip Days is a remarkable compendium of selections from these extraordinary interviews, providing an unflinching portrait of the world of government-sanctioned slavery of Africans in America. Here are twenty-nine full narrations, as well as nine sections of excerpts related to particular aspects of slave life, from religion to plantation life to the Reconstruction era. Skillfully edited, these chronicles bear eloquent witness to the trials of slaves in America, reveal the wide range of conditions of human bondage, and provide sobering insight into the roots of racism in today's society. "Remarkably articulate . . . vivid, moving, and beautifully cadenced." —The New Yorker
