The Tutor at Your Side manual addresses the user's needs at each stage of their development. The Startup section gives Camera Setup and Care. The next sections provide continuous guidance through 3 learning phases: 1. The Orientation section describes the control and menu features with illustrated locations and concise descriptions of function, settings, operation and references to detail descriptions. 2. The Operation section gives the user a choice of 4 complete and independent starting points: There are 2 Basic subsections, Quick and Detailed, for Point and Shoot operation and Creative subsections, Quick and Detailed, for the Complete Control mode of operation. Each Detailed subsection includes the corresponding Quick subsection to eliminate looking back. Each subsection is sequenced in Photo Session order: Displays, Session Prep/Field Setup, Photo Features (Shooting Mode, Composition, Focus, Drive, Exposure and Shutter), Evaluation, Correction and Session Finish. Each subsection includes reset reminders at the individual features and at the Session Finish. Custom Function setups are given just before the first possible use and usage reminders are given thereafter (Creative Detailed section only). The Effective Use section continues the user guidance beyond the mechanics and the Reference section covers Problems, Playback and Printing. The manual has laminated covers for durability and a coil binding so it will stay open.

As a beginner or professional photographer or filmmaker, you don't need to struggle to figure out how to use the Canon EOS Rebel T8i/850D if you can take the step to purchase this book. Early February in 2020, Canon, arguably the best camera producer in the globe today and a giant creator of digital solutions, revealed the aesthetic Canon EOS Rebel T8i/850D, a beauty that speaks more pleasantly than its tag - Rebel. The camera was unveiled as a high-performing device and brandished with high-quality features. The picturing device is easily Canon's most populous Digital Single-Lens Reflex (DSLR) camera line manufactured in the last few years. Likewise, the most intriguing aspect of it is that it gives a soft landing to those who are previously most exposed to Smartphones and other picturing devices. This leverage means that neophytes do not have to bother themselves with getting abreast with the technicalities of the camera. Canon, with this design, has provided an incredible performance level, which gives users control over the device. It has also been given an affordable and supportive setup for beginners and more experienced users. Embodied in the Canon EOS Rebel T8i/850D is a 24.1-megapixel Advanced Photo System type-C (APS-C) size sensor which is similar to the kind of sensor found in one of Canon's top designs, the T7i camera. Although, the image quality between both cameras is nearly identical, with the T8i given a little nudge. However, as an advantage, Canon placed in the T8i a DIGIC eight image processor which allows for

the filming of Ultra High Definition (UHD) 4k video at 24 frames per second.
