Intercultural Language Activities offers practical teaching ideas which encourage learners to reflect on their own language and culture, as well as that of others. Topics covered in the fourteen chapters include childhood, food, sport, icons, politics and body language. The book also helps learners mediate in situations of cultural misunderstanding and start web-based intercultural exchanges. It examines interview techniques, how people present themselves, and ways to interpret cultural symbols and characteristics, such as those found in postcards, advertisements and online newspapers. In engaging with these topics, learners become intercultural explorers and raise their level of communicative competence. This is an invaluable resource for any teacher who wishes to combine language learning with cultural exploration. In addition, the accompanying CD-ROM provides print-friendly photocopyable worksheets and reading texts which can be put to immediate use.

The design and evaluation of questionnaires—and of other written and oral materials—is a challenging endeavor, fraught with potential pitfalls. Cognitive Interviewing: A Tool for Improving Questionnaire Design describes a means of systematically developing survey questions through investigations that intensively probe the thought processes of individuals who are presented with those inquiries. The work provides general guidance about questionnaire design, development, and pre-testing sequence, with an emphasis on the cognitive interview. In particular, the book gives detailed instructions about the use of verbal probing techniques, and how one can elicit additional information from

subjects about their thinking and about the manner in which they react to tested questions. These tools help researchers discover how well their questions are working, where they are failing, and determine what they can do to rectify the wide variety of problems that may surface while working with questionnaires.

"This unique text provides a comprehensive framework for creating, managing, and interpreting qualitative research studies that yield valid and useful information. Examples of studies from a wide range of disciplines illustrate the strengths, limitations, and applications of the primary qualitative methods: in-depth interviews, focus group discussions, ethnography, content analysis, and case study and narrative research. Following a consistent format, chapters show students and researchers how to implement each method within a paradigm-neutral and flexible Total Quality Framework (TQF) comprising four interrelated components: Credibility, Analyzability, Transparency, and Usefulness. Unlike other texts that relegate quality issues to one or two chapters, detailed discussions of such crucial topics as construct validity, inter-researcher reliability, researcher bias, and verification strategies are featured throughout. The book also addresses applications of the TQF to the writing, review, and evaluation of qualitative research proposals and manuscripts. KEY WORDS/SUBJECT AREAS: case study, content analysis, ethnographic, ethnography, focus groups, interviews, narrative, proposal writing, qualitative research, reliability, research designs, research methods, standards, studies, the literacy, total quality framework, transparency AUDIENCE: Graduate students and instructors in education, sociology, psychology, social work, management, communications, and nursing; researchers and evaluators seeking guidance for their qualitative research work. "--
