Reflecting the latest practices in the field, Clinical Decision Making: Case Studies in Medical-Surgical Nursing, 2nd edition bridges the gap between classroom knowledge and clinical application. Emphasizing holistic nursing care, this resource helps nursing students sharpen their critical thinking skills and gain experience applying what they have learned. The more than 40 medical-surgical case histories and related questions, and responses are based on real-life client situations. Every case contains an introductory blueprint of variables that must be considered while evaluating a particular scenario concerning the client, nursing protocol, and setting of care. Each blueprint and case is different, just as each clinical situation is unique. As learners simulate the actual decision-making process, they gain valuable experience making informed clinical judgments that will help them become successful nurses. Categorized by complexity, the book appeals to a broad range of learning levels and styles. Learn to connect pharmacology concepts with their impact on patient care! Designed to accompany Lehne's Pharmacology for Nursing Care, 10th Edition, this robust workbook -- study guide features critical thinking study questions, case studies, and detailed patient teaching scenarios. The 10th edition includes an increased emphasis on patient safety, with added questions to help you learn to spot and remediate medication errors. Plus, an emphasis on priority nursing care with NCLEX® examination-style review questions prepares you for success on the exam. NCLEX®-style alternate format questions, including prioritization questions, bolster your readiness for the NCLEX Exam while supporting review of core pharmacology content. Reinforcement of key information equips you for success on the NCLEX Examination and for patient safety (a QSEN core competency) in clinical practice. Three-part chapter organization separates content into study questions, NCLEX review and application questions, and dosage calculation questions. Detailed rationales for all prioritization questions are included in the answer key and encompass explanations for both correct and incorrect responses. Prioritization and delegation questions highlighted by special icons equip you to succeed on the NCLEX Exam and in the fast-paced clinical environment. Focus on implications of drugs and drug classes for patient care provides practice application of pharmacology content to the clinical setting. Application -- and analysis-level questions highlighted by special icons help you integrate other nursing knowledge such as developmental considerations, laboratory values, and symptoms of adverse effects. Succinct question scenarios eliminate information that is not essential to answering the question. Answer key is now included in the back of the printed study guide. NEW! Updated content has been thoroughly revised to ensure that the information is completely up-to-date and consistent with the textbook. NEW! Increased emphasis on patient safety features questions on safe patient care that challenge you to select appropriate actions to prevent or remediate medication errors. The critical thinking and study questions in this book include review of knowledge, application of knowledge to nursing care, analysis of nursing situations that require clinical decision-making, and prioritization of nursing actions. -- Publisher description

Clinical Case Studies for the Family Nurse Practitioner is a key resource for advanced practice nurses and graduate students seeking to test their skills in assessing, diagnosing, and managing cases in family and primary care. Composed of more than 70 cases ranging from common to unique, the book compiles years of experience from experts in the field. It is organized chronologically, presenting cases from neonatal to geriatric care in a standard approach built on the SOAP format. This includes differential diagnosis and a series of critical thinking questions ideal for self-assessment or classroom use.

designed to foster a nursing student's ability to care effectively for a patient, family, or group. Each case study features a compelling scenario that engages the reader to feel and fully participate in the caring experience. The book presents a variety of situations that new and experienced nurses are likely to encounter, many of which present scenarios that require caring for a patient under difficult or complex circumstances. The book addresses the need, as defined by leading health care and nursing education organizations, for the study of nursing from a contextual, story-oriented perspective. It is based on the Barry, Gordon & King Teaching/Learning Nursing Framework, developed as a guide to uncover the art and science of nursing grounded in caring in all nursing situations. Following a description of the framework's foundational concepts, the text describes how to use nursing situations to facilitate learning. The scenarios offer detailed, practical strategies for analyzing nursing situations in ways that bring to life the simple and complex practice of nursing grounded in caring. These real-life stories also help students understand the impact of health conditions on individuals and families, thereby fostering empathy. Case studies address nursing situations across a variety of populations, health concerns, and practice settings. Using multiple ways of knowing and understanding, each scenario concludes with direct and reflective questions that help students develop nursing knowledge and skills. The book serves as a core resource for nurse educators and students at all levels seeking to study the art and science of nursing grounded in caring. Additionally, the book is a resource for in-service educators in health care systems that specifically address caring as an essential value for practice. KEY FEATURES: Delivers a new approach to nursing education focusing on the context of caring between nurse and patient Presents a collection of real-life nursing scenarios designed to foster caring knowledge and skills under all circumstances Offers detailed, practical strategies for analyzing nursing situations to aid in learning the practice of nursing grounded in caring Helps students to understand the impact of health conditions on individuals and families.

Hone your ability to make sound clinical nursing judgment via a conceptual approach to teaching and learning with Harding & Snyder's Clinical Reasoning Cases in Nursing. 7th Edition. Praise for the first edition: "This is an excellent teaching guide and resource manual for instructors, gerontological nursing students, and practicing nurses and social workers who wish to learn more about geriatric concerns and care. It will be kept by nursing students long after they graduate as a guide to resources that will be valuable throughout their nursing careers. As a home care nurse working mainly with the geriatric community, I found the resources helpful in my practice. As an instructor, I found the book to be a very useful guide for teaching geriatrics." — Score: 90, 4 Stars —Doody's Medical Reviews [This] is a unique volume that effectively addresses the lack of gerontology case studies for use with undergraduate nursing students. Case studies are a pedagogically powerful approach to active learning that offer opportunities to apply content to clinical practice. —The Gerontologist "The case narrative approach of this book promotes active learning that is more meaningful to students (and practicing nurses) and more likely to increase the transfer of evidence into practice. An excellent resource for faculty (staff educators) to facilitate critical thinking skills." —Liz Capezzuti, PhD, RN, FAAN Dr. John W. Rowe Professor in Successful Aging Co-Director, Hartford Institute for Geriatric Nursing New York University College of Nursing Vivid case examples help guide nurses in developing appropriate interventions that include complementary and alternative health therapies and provide a basis for evaluating outcomes. Exercises interspersed throughout each case study include numerous open-ended and multiple-choice questions to facilitate learning and critical thinking. The text is unique in that some of the presented cases focus on psychosocial issues such as gambling addiction, hoarding behavior, emergency preparedness, and long-distance caregiving. Cases also depict geriatric clients who are living healthy, productive lives to counter myths and negative attitudes about older adults. Scenarios demonstrating ethical dilemmas prepare students to appropriately respond to "gray area" situations. The text is geared for AACN and NLN accreditation and is organized according to the needs of actual clinical settings. With cases that take place in the home and community or within primary, acute, and long-term care facilities, this book will be useful for courses specific to gerontology nursing or across any nursing curriculum.

New to the Second Edition: A completely new section of Aging Issues in the Family New cases addressing health care disparities, aging in place, and prevention of catheter-associated urinary tract infection Additional contemporary case studies The addition of Quality for Safety in Nursing Education (QSEN) initiatives A greater focus on prioritization and delegation of client’s needs infused throughout exercises “Nurses play a vital role in improving the safety and quality of patient care – not only in the hospital or ambulatory treatment facility, but also of community-based care and the care performed by family members. Nurses need know what proven techniques and interventions they can use to enhance patient outcomes. To address this need, the Agency for Healthcare Research and Quality (AHRQ), with additional funding from the Robert Wood Johnson Foundation, has prepared this comprehensive, 1,400-page, handbook for nurses on patient safety and quality – Patient Safety and Quality: An Evidence-Based Handbook for Nurses. This concise essentials text, written by the authors of the popular Leadership Roles and Management Functions in Nursing, equips new nurses with invaluable leadership and management tools they need on the job. Developed for Associate Degree and LVN/LPN level nursing students, all case studies are aimed no higher than the charge nurse management level. An easy read with clear displays and tables, which emphasize core knowledge, this is an invaluable tool for the new nurse. Common stumbling blocks, such as effective time management, are addressed clearly and simply, and students will benefit from the practiced authors' own experience and skill. Reflective Questions in each chapter encourage the nurse to examine her own values, beliefs, and actions in developing common nursing management skills.

The free accompanying ancillary package for students and instructors includes NCLEX-style chapter review questions, a test generator, an ebook, and a PowerPoint presentation, along with suggestions for responding to each of the case studies and reflective questions.

Features evidence-based, practical and effective strategies for creating and maintaining optimal quality of life in older adults. This globally focused resource integrates sound research evidence, real-life case scenarios, and effective, practical strategies to address a key health care initiative of the 21st century—optimal quality of life for older adults. Distinguished by its broad and global outlook, the book includes contributions from an international cadre of widely published scholars and is designed for easy integration into traditional nursing education curricula.

The book explores the experiences of older adults at home, and in acute and primary care, assisted living, nursing home and hospice environments and examines their needs for dealing with multiple, differentiated health, spiritual, and emotional considerations. The book addresses all four domains of quality of life as set forth by the World Health Organization. A detailed and multidimensional case study opens each chapter, followed by subjective and objective data focusing on the quality of life domain addressed. Articulation and definition of each quality of life issue is presented along with the incidence and prevalence of the problem. Several cases addressing issues older adults encounter in preventing and managing acute and chronic disease serve as a clinical resource guide, with their emphasis on clinical reasoning. Another outstanding feature of the book is its comprehensive, synthesized literature reviews with approximately 20 references for each issue. These reviews deliver the best evidence in the field and offer effective strategies. Generalist and advanced practice (AP) nursing roles in promoting quality of life as well as cultural considerations are also covered. Each chapter concludes with a bulleted summary of tips for promoting quality of life accomplished by clinical reasoning questions. Content is organized compatibly with the Adult/Gero Nurse Practitioner Certification Test Plan. Key Features: Addresses key quality of life education and practice initiatives advanced by leading gerontology organizations worldwide Includes detailed, multi-faceted case studies reflecting extensive, current evidence-based literature Describes practical, cost-effective strategies aimed at maintaining health Disseminates the universally applicable perspectives of international scholars of global aging Provides content compatible with the Adult/Gero Nurse Practitioner Certification Test Plan

This comprehensive workbook contains a compilation of unfolding cases across the discipline of nursing, and includes unique aspects of nursing regarding spirituality, family issues, community as client, and gerontology concerns. It integrates concepts of age, setting, role development, and ethical/legal issues. Users gain a simulated experience in prioritizing nursing problems, identifying appropriate teaching strategies, documenting nursing care, and critically analyzing the totality of common situations encountered in professional nursing practice.

Unfolding case models deal with obstetrics, pediatrics, mental health, medical surgery, and assorted cases regarding such issues as: falls in the elderly, urinary incontinence, aging, sleep-rest changes, managing staff conflict, public health nursing, vital signs, confidentiality, and spirituality. For educating student and staff nurses in various nursing programs.

The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.
