People seeking therapy for mental health issues often also have medical problems such as diabetes, AIDS, asthma, or heart conditions. As a therapist, should you ignore the medical conditions that your clients may have, and simply stick to what you're trained in, healing the mind and not focusing on medical or bodily issues? Or, should you inquire about any medical issues during intake and give them full attention? As a non-medically trained practitioner, how much should you really be expected to know about these issues? These answers and more can be found in this book. Geared specifically to nonmedically trained mental health professionals, it gives practitioners a better understanding of exactly how physical health issues play out in the context of mental health issues, equipping clinicians with the information necessary to more effectively create and manage a comprehensive psychotherapeutic treatment regimen. "It does an excellent job of reviewing the relevant content, with good thought-provoking questions. It is followed by NCLEX style questions and rationales. The book is thorough and current... Respiratory disease is the most common reason for admission to intensive care, and advanced respiratory support is one of the most frequently used interventions in critically ill patients. A clear understanding of respiratory disease is the cornerstone of high quality intensive care. Although a plethora of literature is available, both in print and online, finding the necessary relevant information can be difficult and time consuming. This handbook provides comprehensive clinical detail in an easily readable format. It is written by practising clinicians and has both in-depth theoretical discussion and practical management advice. The book is divided into sections: Section 1 deals with the approach to the patient with respiratory failure - including

pathophysiology, investigation and diagnosis Sections 2 covers non invasive treatment modalities Sections 3 and 4 examine invasive ventilation in detail. Section 3 considers the principles of mechanical ventilation while section 4 deals with individual ventilator modes Section 5 discusses the management of the ventilated patient including sedation, monitoring, asynchrony, heart - lung interaction, hypercapnia and hypoxia, complications, weaning and extubation. It also has chapters on areas less frequently covered such as humidification, suction, tracheal tubes and principles of physiotherapy Section 6 is a comprehensive breakdown of each respiratory condition seen in ICU. This book is designed to bridge the gap between Intensive Care starter texts and all-encompassing reference textbooks. It is aimed at consultants and senior trainees in Intensive Care Medicine, senior ICU nursing staff, consultants in other specialties and allied healthcare professionals who have an interest in advanced respiratory critical care.

understanding some of the mechanisms that drive severe asthma; there have also been concomitant advances in the recognition of specific molecular phenotypes. This ERS Monograph covers all aspects of severe asthma – epidemiology, diagnosis, mechanisms, treatment and management – but has a particular focus on recent understanding of mechanistic heterogeneity based on an analytic approach using various ‘omics platforms applied to clinically well-defined asthma cohorts. How these advances have led to improved management targets is also emphasised. This book brings together the clinical and scientific expertise of those from around the world who are collaborating to solve the problem of severe asthma.

and established exercise professionals in working with clients from special populations, such as children, aging adults, and clients with temporary or permanent physical or cognitive conditions and disorders. Clients with special conditions often require modifications to general exercise recommendations, specific exercise facility design, and particular training equipment. They may also require exercise programming supervised by exercise professionals with specialized training. NSCA's Essentials of Training Special Populations will help exercise professionals design customized programs for clients with unique considerations. It is an ideal preparatory resource for those seeking to become an NSCA Certified Special Population Specialist (CSPS) as well as professionals who work in collaboration with health care professionals to assess, educate, and train special population clients of all ages regarding their health and fitness needs. Editor Patrick L. Jacobs, who has extensive experience as both a practitioner and scholar, and a team of qualified contributors provide evidence-based information and recommendations on particular training protocols for a breadth of conditions, including musculoskeletal conditions, cardiovascular conditions, immunologic disorders, and cancer. The book discusses the benefits of exercise for clients with special conditions and the exercise-related challenges they often face, as well as the importance of safe and effective health and fitness assessments for these clients. With an emphasis on published research, NSCA's Essentials of Training Special Populations reviews the pathology and pathophysiology of numerous conditions and disorders,

including the known effects of exercise on those conditions and disorders. Each chapter includes tables that provide exercise recommendations for specific conditions, complete with training modifications, precautions, and contraindications. Also included are case studies with practical examples of the application of these population-specific recommendations, as well as a summary of the commonly prescribed medications and their potential effects on exercise responses and adaptations. NSCA's Essentials of Training Special Populations includes a number of learning aids designed to assist the reader. Chapter objectives appear at the beginning of each chapter, study questions are at the end of each chapter, key points in easy-to-find boxes summarize important concepts for the reader, and key terms are identified and defined throughout the text. Recommended readings are also provided for readers wishing to learn more about a topic in general or specifically in preparation for the CSPA exam. For instructors using NSCA's Essentials of Training Special Populations in a higher education course or for a training symposium, ancillary materials are available to make class preparation easy. The materials are designed to complement the content and assist in its instruction. The ancillaries consist of an instructor's guide, test package, and presentation package plus image bank.

section on the rapidly growing topic of Pharmacogenomics. If you are a pharmacist seeking to become board certified in geriatrics by passing the exam, this is a must-have study guide. We've edited our VERY popular BCPS Bullets book and created a review for the geriatric pharmacy exam based on the Board of Pharmaceutical Specialties content outline. With recent PASS rates around 40%, you have to have the right tools to pass this exam and this book will help immensely. In addition to the exam being very difficult, you are likely a busy professional with very minimal free time. I've always had a hard time staying focused while studying from large review article type study guides and have squandered hours reading while retaining very little. This book is intended to be a crash course/cheat sheet overview of the most highly testable material. I wanted to remember the really important stuff because I know it is impossible to know every minute detail. BCGP Bullets, the Condensed BCGP Study Guide will help prepare you for the exam as well as help you maximize your study time. We have covered over 100+ disease states with critical clinical pearls, like drugs of choice, drug interactions, disease state education, and geriatric-specific nuggets for certain medications. Biostatistics basics, important geriatric terminology, social, financial, and emotional considerations are also included in this book. Items like elder abuse, advanced directives, and power of attorney show up in the content outline and we have also outlined the basics of this terminology. I can assure you that there is no doubt this book will help in your preparation for becoming a BCGP certified pharmacist! The Board Certified Geriatric Pharmacist (BCGP) is a designation from the Board of Pharmacy Specialties. The contents within this study guide are not affiliated or endorsed by the Board of Pharmacy Specialties.

Updates for 2019! We've updated and added some content in the following disease states: Acid/Base Disorders, Bipolar Disorder, Breast Cancer, CHF, Chronic Kidney Disease, Clostridium Difficile, Crohn's, DVT/PE, Depression, Diabetes, Gout, Migraines, Hyperlipidemia, Hypertension, PUD, Meningitis, Osteoporosis, Parkinson's, PAD, Rheumatoid Arthritis, Sepsis, Sexual Dysfunction, Shingles, STD's, Vaccines. If you talk to anyone who's taken the BCPS exam, you'll quickly understand that the BCPS exam will likely be the most challenging exam you'll ever take. You need all the resources you can get to make sure you are prepared! In addition to the exam being very difficult, you are likely a busy professional with very minimal free time. I've always had a hard time staying focused while studying from large review article type study guides and have squandered hours reading while retaining very little. This book is intended to be a crash course/cheat sheet overview of the most highly testable material. I wanted to remember the really important stuff, because I know it is impossible to know every minute detail. BCPS Bullets, the Condensed BCPS Study Guide will help prepare you for the exam as well as help you maximize your study time. We covered over 100+ disease states straight from the BCPS content outline provided by BPS, and

included important pearls for each condition including assessments, risk factors, most commonly used drugs of choice, must know adverse effects, miscellaneous clinical pearls, notorious drug interactions, warnings and precautions, and of course, relevant labs. I wanted to cover each disease state in 1-2 pages to try to ensure you are reviewing the most relevant content. We did go over 2 pages on some disease states, but we did our best to keep the information concise and critical for you to know in your preparation to becoming a Board Certified Pharmacotherapy Specialist. The book is over 300+ pages, but it is in bullet point format and very easy to digest multiple disease states at a sitting. There is also some white around the margins to take additional notes or highlight essential information to remember. As many of you are aware from the content outline, the BCPS exam is not all clinical. In addition to the disease states on the BCPS content outline, we've also included sections on biostatistics as well as important regulatory issues. I can assure you that there is no doubt this book will help in your preparation to becoming a BCPS pharmacist! The Board Certified Pharmacotherapy Specialist (BCPS) is a designation from the Board of Pharmacy Specialties. The contents within this study guide are not affiliated or endorsed by the Board of Pharmacy Specialties.

"The Pediatric Nurse Practitioner Certification Review Guide presents information and current standards of practice for Nurse Practitioners (NP) in the pediatric primary care setting. One major change is the certification for PNPs will only be offered by PNCB instead of both PNCB and American Nurses Credentialing Center (ANCC). PNCB has changed their blueprint. The current content outline is based on our 2017-18 Job Task Analysis (JTA) research. This routine, required research ensures that exam content accurately represents current pediatric primary care nurse practitioner practice in the U.S. The revised book would focus on the current blueprint, released Sept 2018"--
