AWS (The American Welding Society) is the worldwide leader in certification programs for the welding industry. Since the CWI (Certified Welding Inspectors) program inception in 1976, AWS has certified more than 100,000 welding inspectors alone, plus thousands more working professionals across other certification categories. AWS conducts exams in locations around the world, including 550 U.S. sites and 40 countries each year. Many candidates mistakenly assume their field experience is enough to obtain certification, only to end up frustrated when they fail to pass their exam.

Certification exams are intentionally comprehensive to ensure the welding industry the high-quality personnel needed to handle these complex roles. The process requires almost everyone to prepare to some extent - even those with years of experience: How much preparation? It depends upon your current skills and knowledge. Are the rewards worth it? The rewards are often worth the time you invest: certification can boost your earnings significantly and expand your career opportunities.
