Dependency-based methods for syntactic parsing have become increasingly popular in natural language processing in recent years. This book gives a thorough introduction to the methods that are most widely used today. After an introduction to dependency grammar and dependency parsing, followed by a formal characterization of the dependency parsing problem, the book surveys the three major classes of parsing models that are in current use: transition-based, graph-based, and grammar-based models. It continues with a chapter on evaluation and one on the comparison of different methods, and it closes with a few words on current trends and future prospects of dependency parsing. The book presupposes a knowledge of basic concepts in linguistics and computer science, as well as some knowledge of parsing methods for constituency-based representations. Table of Contents: Introduction / Dependency Parsing / Transition-Based Parsing / Graph-Based Parsing / Grammar-Based Parsing / Evaluation / Comparison / Final Thoughts

Based on a Navy SEAL's inspiring graduation speech, this #1 New York Times bestseller of powerful life lessons "should be read by every leader in America" (Wall Street Journal). If you want to change the world, start off by making your bed. On May 17, 2014, Admiral William H. McRaven addressed the graduating class of the University of Texas at Austin on their Commencement day. Taking inspiration from the university's slogan, "What starts here changes the world," he shared the ten principles he learned during Navy Seal training that helped him overcome challenges not only in his training and long Naval career, but also throughout his life; and he explained how anyone can use these basic lessons to change themselves-and the world-for the better. Admiral McRaven's original speech went viral with over 10 million views. Building on the core tenets laid out in his speech, McRaven now recounts tales from his own life and from those of people he encountered during his military service who dealt with hardship and made tough decisions with determination, compassion, honor, and courage. Told with great humility and optimism, this timeless book provides simple wisdom, practical advice, and words of encouragement that will inspire readers to achieve more, even in life's darkest moments. This book is dedicated to Anna Wierzbicka, one of the most influential and innovative linguists of her generation. Her work spans a number of disciplines, including anthropology, cultural psychology, cognitive science, philosophy and religious studies, as well as her home base of linguistics. She is best known for the Natural Semantic Metalanguage (NSM) approach to meaning—a versatile tool for exploring 'big questions' concerning the diversity and universals of people's experience in the world. In this volume, Anna Wierzbicka's former students, old and current colleagues, 'kindred spirits' and 'sparring partners' engage with her ideas and diverse body of work. These authors cover topics from the grammar of action verbs to cross-cultural pragmatics, and over 30 languages from around the world are represented. The

chapters in Part 1 focus on the NSM approach and cover four themes: lexico-grammatical semantics, cultural keywords, semantics of nouns, and emotion. In Part 2, the contributors connect with a meaning-based approach from their own intellectual perspectives, including syntax, anthropology, cognitive linguistics and sociolinguistics. The deep humanistic perspective, wide-ranging themes and interdisciplinary nature of Wierzbicka's research are reflected in the contributions. The common thread running through all chapters is the primacy of meaning to the understanding of language and culture.

During World War II a community called Manzanar was hastily created in the high mountain desert country of California, east of the Sierras. Its purpose was to house thousands of Japanese American internees. One of the first families to arrive was the Wakatsukis, who were ordered to leave their fishing business in Long Beach and take with them only the belongings they could carry. For Jeanne Wakatsuki, a seven-year-old child, Manzanar became a way of life in which she struggled and adapted, observed and grew. For her father it was essentially the end of his life. At age thirty-seven, Jeanne Wakatsuki Houston recalls life at Manzanar through the eyes of the child she was. She tells of her fear, confusion, and bewilderment as well as the dignity and great resourcefulness of people in oppressive and demeaning circumstances. Written with her husband, Jeanne delivers a powerful first-person account that reveals her search for the meaning of Manzanar. Farewell to Manzanar has become a staple of curriculum in schools and on campuses across the country. Last year the San Francisco Chronicle named it one of the twentieth century's 100 best nonfiction books from west of the Rockies. First published in 1973, this new edition of the classic memoir of a devastating Japanese American experience includes an inspiring afterword by the authors.

This monograph is a translation of two seminal works on corpus-based studies of Mandarin Chinese words and parts of speech. The original books were published as two pioneering technical reports by Chinese Knowledge and Information Processing group (CKIP) at Academia Sinica in 1993 and 1996, respectively. Since then, the standard and PoS tagset proposed in the CKIP report have become the de facto standard in Chinese corpora and computational linguistics, in particular in the context of traditional Chinese texts. This new translation represents and develops the principles and theories originating from these pioneering works. The results can be applied to numerous fields; Chinese syntax and semantics, lexicography, machine translation and other language engineering bound applications. Suitable for graduate and scholars in the fields of linguistics and Chinese, Mandarin Chinese Words and Parts of Speech provides a comprehensive survey of the issues around wordhood and PoS.

Their Eyes Were Watching God is a 1937 novel by African-American writer Zora Neale Hurston. It is considered a classic of the Harlem Renaissance of the 1920s, and it is likely Hurston's best known work.

The Internet has been romanticized as a zone of freedom. The alluring combination of sophisticated technology with low barriers to entry and instantaneous outreach to millions of users has mesmerized libertarians and communitarians alike. Lawmakers have joined the celebration, passing the Communications Decency Act, which enables Internet Service Providers to allow unregulated discourse without danger of liability, all in the name of enhancing freedom of speech. But an unregulated Internet is a breeding ground for offensive conduct. At last we have a book that begins to focus on abuses made possible by anonymity, freedom from liability, and lack of oversight. The distinguished scholars assembled in this volume, drawn from law and philosophy, connect the absence of legal oversight with harassment and discrimination. Questioning the simplistic notion that abusive speech and mobocracy are the inevitable outcomes of new technology, they argue that current misuse is the outgrowth of social, technological, and legal choices. Seeing this clearly will help us to be better informed about our options. In a field still dominated by a frontier perspective, this book has the potential to be a real game changer. Armed with example after example of harassment in Internet chat rooms and forums, the authors detail some of the vile and hateful speech that the current combination of law and technology has bred. The facts are then treated to analysis and policy prescriptions. Read this book and you will never again see the Internet through rose-colored glasses.

The uneasy balance between these worlds is shattered when Starr witnesses the fatal shooting of her childhood best friend Khalil at the hands of a police officer. Khalil was unarmed. Soon afterward, his death is a national headline. Some are calling him a thug, maybe even a drug dealer and a gangbanger. Protesters are taking to the streets in Khalil's name. Some cops and the local drug lord try to intimidate Starr and her family. What everyone wants to know is: what really went down that night? And the only person alive who can answer that is Starr. In the sixteenth century, the Franciscan friar Bernardino de Sahagún and a team of indigenous grammarians, scribes, and painters completed decades of work on an extraordinary encyclopedic project titled General History of the Things of New Spain, known as the Florentine Codex (1575–1577). Now housed in the Biblioteca Medicea Laurenziana in Florence and bound in three lavishly illustrated volumes, the codex is a remarkable product of cultural exchange in the early Americas. In this edited volume, experts from multiple disciplines analyze the manuscript's bilingual texts and more than 2,000 painted images and offer fascinating, new insights on its twelve books. The contributors examine the "three texts" of the codex—the original Nahuatl, its translation into Spanish, and its painted images. Together, these constitute complementary, as well as conflicting, voices of an extended dialogue that occurred in and around Mexico City. The volume chapters address a range of subjects, from Nahua sacred beliefs, moral discourse, and natural history to the Florentine artists' models and the manuscript's reception in Europe. The Florentine Codex ultimately yields new perspectives on the Nahua world several decades after the fall of the Aztec empire.
