Merriam Press Military Monograph 92. Second Edition (March 2012). On his twenty-sixth horrifying mission over the hostile skies of Nazi Europe a charismatic bombardier, seated at the nose of a B-17, strapped on his parachute as his disintegrating bomber dropped uncontrollably to the ground. What got him to this point, the ensuing months behind barbed wire, and his daily letters written to his family in Akron, Ohio provide the engrossing content of *A Story of One*. This is an emotionally intense memoir of a bombardier's experiences during World War II with the 817th Bomb Squadron, 483rd Bomb Group, Fifteenth Air Force. This book recreates a straightforward story of a cadet growing into a matured and experienced lieutenant that can be extrapolated to illustrate the immense impact of World War II on individual lives. Unlike the scores of historical studies of leaders, military decisions and battles and equally plentiful novels of the period, *A Story of One* offers a kind of "people's history." It is the true account of a single, unknown individual who stands in for the unsung warriors of the greatest generation by offering readers an insight into the details of one life. Although rich with military history, *A Story of One* is not entirely focused on the war. It recounts frugality and emotions on the home front, training, friendships, love affairs, family, confinement as a prisoner of war and much more. Between March 1942 and August 1945 a cadet becomes

an aerial warrior, observes his comrades fall victim to the machinery of war, learns that his brother has also been captured, and attempts to ease his family's fears through frequent letters home. Besides thousands of wartime personal correspondence, *A Story of One* draws on extensive interviews with veterans of the 483rd Bombardment Group, conversation with military wives who lived through the war on the home front, and poignant conversations with the bombardier himself.

Huberman At fourteen, Bronislaw Huberman played the Brahms Violin Concerto in Vienna— winning high praise from the composer himself, who was there. Instantly famous, Huberman began touring all over the world and received invitations to play for royalty across Europe. But after witnessing the tragedy of World War I, he committed his phenomenal talent and celebrity to aid humanity. After studying at the Sorbonne in Paris, Huberman joined the ranks of Sigmund Freud and Albert Einstein in calling for peace through the Pan European Movement. But when hope for their noble vision was destroyed by the rise of Nazism, Huberman began a crusade that would become his greatest legacy—the creation, in 1936, of the Palestine Symphony, which twelve years later became the Israel Philharmonic Orchestra. In creating this world-level orchestra, Huberman miraculously arranged for the very best Jewish musicians and their families to emigrate from Nazi-threatened territories. His tireless campaigning for the project—including a marathon fundraising concert tour across America—ultimately saved nearly a thousand Jews from the approaching Holocaust. Inviting the great Arturo Toscanini to conduct the orchestra’s first concert, Huberman’s clarion call of art over cruelty was heard around the world. His story contains extraordinary adventures, riches and royalty, politicians and broken promises, losses and triumphs. Against near impossible obstacles, Huberman refused to give up on his dream to create a unique and life-saving orchestra of exiles which was one of the great cultural achievements of the 20th century. The First World War and Health: Rethinking Resilience aims to broaden the scope of resilience by looking at it from military, medical, personal and societal perspectives. The authors ask how war influenced the health - both physically and psychologically - of those fighting and attending the wounded, as well as the general health of the community of which they were part. In this major scholarly study of the life of Joseph A. Schumpeter, one of the great intellectual figures of the twentieth century, the distinguished economist Wolfgang Stolper delves into the mind of his former teacher, exploring the development of his ideas and, especially,

their influence on politics and public policy. After reflecting briefly on Schumpeter the man, Stolper explains the evolution of Schumpeter's work, particularly his insights during the 1920s on public finance, his contributions to monetary theory and the study of business cycles, and his writings on socialism. Stolper goes on to describe and evaluate Schumpeter's public activities following World War I and his role as a finance minister, placing the development of his thought in the turbulence political context of his times. Drawing on a vast array of new and exciting sources, Stolper paints a portrait of his mentor as a decent, ambitious, and complex man whose many insights into economy and society found their way outside of the academy and into the practical world of economic policy. All readers interested in the history of economic thought and twentieth-century political and intellectual history will find this book invaluable. Wolfgang Stolper is Professor Emeritus of Economics at the University of Michigan. The most powerful force in the world economy today is the redefinition of the relationship between state and marketplace - a process that goes by the name of privatization though this term is inadequate to express its far-reaching changes. We are moving from an era in which governments sought to seize and control the 'commanding heights' of the economy to an era in which the idea of free markets is capturing the commanding heights of world economic thinking. Basic views of how society ought to be organized are undergoing rapid change, trillions of dollars are changing hands and so is fundamental political power. Great new wealth is being created - as are huge opportunities and huge risks.

Taking a worldwide perspective, including Britain, where the process began with Mrs Thatcher, Europe and the former USSR, China, Latin America and the US, **THE COMMANDING HEIGHTS** shows how a revolution in ideas is transforming the world economy - why it is happening, how it can go wrong and what it will mean for the global economy going into the twenty-first century. Stephen Crane's immortal masterpiece about the nightmare of war was first published in 1895 and brought its young author immediate international fame. Set during the Civil War, it tells of the brutal disillusionment of a young recruit who had dreamed of the thrill and glory of war, only to find himself fleeing the horror of a battlefield. Shame over his cowardice drives him to seek to redeem himself by

At the beginning of World War II, professor Lauren Post, San Diego State College, asked his students entering military service to write to him. Thousands of letters arrived from places like Pearl Harbor, North Africa, and Normandy, beginning with the salutation, “Dear Doc.” They described vivid accounts of training, combat, and camaraderie. Pilots wrote about seeing planes shot down. Men in POW camps sent word about the location of other prisoners and Dr. Post passed information on to frantic families. Mothers, hoping for news about missing sons, clutched at the details. These intimate, first-person accounts capture honest, in-the-moment reactions to war that resound with heartache and gratitude. Each month, Dr. Post excerpted the letters and mailed the *Aztec News Letter* around the world. Fraternities,

typing classes, and families donated time and money for printing and postage. When the latest issue arrived, servicemen and women read it cover-to-cover, and then passed it to another Aztec in service. Dr. Post produced and mailed a newsletter each month for four years. He sent pilots Aztec stickers to put on their planes. Soldiers sent him Nazi flags and sand from Iwo Jima. He tallied up the medals they earned and took time to call their mothers. He couldn't rest until he knew that every student who had been taken prisoner was released. For years afterward, men and women dropped by his small campus office to thank him for helping them make it through the war. This is the story of the devotion of a remarkable college professor who held his students, their campus, and an entire community together during World War II. These students fought for democracy and to preserve a cherished way of life that included football, Coca-Cola, and Sadie Hawkins dances. Their correspondences to one beloved professor describe an American perspective of war that shines with idealism, determination, raw grief, and the power of friendship.

Acclaimed New York Times journalist and author Chris Hedges offers a critical -- and fascinating -- lesson in the dangerous realities of our age: a stark look at the effects of war on combatants. Utterly lacking in rhetoric or dogma, this manual relies instead on bare fact, frank description, and a spare question-and-answer format. Hedges allows U.S. military documentation of the brutalizing physical and psychological consequences of combat to speak for itself. Hedges poses dozens of questions that young soldiers might ask about combat, and then answers them by quoting from medical and psychological studies.

- What are my chances of being wounded or killed if we go to war?
- What does it feel like to get shot?
- What do artillery shells do to you?
- What is the most painful way to get wounded?
- Will I be afraid?
- What could happen to me in a nuclear attack?
- What does it feel like to kill someone?
- Can I withstand torture?
- What are the long-term consequences of combat stress?
- What will happen to my body after I die?

This profound and devastating portrayal of the horrors to which we subject our armed forces stands as a ringing indictment of the glorification of war and the

By the time the First World War ended in 1918, eight million people had died in what had been perhaps the most apocalyptic episode the world had known.

This Very Short Introduction provides a concise and insightful history of the 'Great War', focusing on why it happened, how it was fought, and why it had the consequences it did. It examines the state of Europe in 1914 and the outbreak of war; the onset of attrition and crisis; the role of the US; the collapse of Russia; and the weakening and eventual surrender of the

Central Powers. Looking at the historical controversies surrounding the causes and conduct of war, Michael Howard also describes how peace was ultimately made, and the potent legacy of resentment left to Germany. ABOUT THE SERIES:

During the Nazis' brutal siege of Leningrad, Lev Beniov is arrested for looting and thrown into the same cell as a handsome deserter named Kolya. Instead of being executed, Lev and Kolya are given a shot at saving their own lives by complying with an outrageous directive: secure a dozen eggs for a powerful Soviet colonel to use in his daughter's wedding cake. In a city cut off from all supplies and suffering unbelievable deprivation, Lev and Kolya embark on a hunt through the dire lawlessness of Leningrad and behind enemy lines to find the impossible. By turns insightful and funny, thrilling and terrifying, the New York Times bestseller *City of Thieves* is a gripping, cinematic World War II adventure and an intimate coming-of-age story with an utterly contemporary feel for how boys become men.

popular votes, but by a mere 23 electoral votes. S. D. Lovell analyzes the candidates, the times, and the issues during one of the most issue-oriented campaigns in history. America was facing the war in Europe, sparring with Mexico, and undergoing a painful adjustment from an agrarian to an industrial society. Other issues included women's suffrage, labor vs. business, prohibition, and the economy. Wilson defeated Hughes in California (which he had to do to win the election) by only 4,000 votes. Slightly more than 2,000 votes cast the other way would have given the electoral majority and the presidency to Hughes, even though Wilson still would have won the popular majority. The candidates were similar in politics and temperament. But a small modification by either of them on any issue might have altered world history.

If historical culture is the specific and particular ways that a society engages with its past, this book aims to situate the professional practice of public history, now emerging across the world, within that framework. It links the increasingly varied practices of memory and history-making such as genealogy, podcasting, re-enactment, family histories, memoir writing, film-making and facebook histories with the work that professional historians do, both in and out of the academy. Making Histories asks questions about the role of the expert and notions of authority within a landscape that is increasingly concerned

Performance, Transmission, Reception 4. Family, Private, Self The four sections outline major themes emerging in public history across the world in the 21st century which are all underpinned by the impact of new media on historical practice and our central argument for the volume which advocates a more capacious definition of what constitutes 'public history'.
