The Pulitzer Prize-winning epic of the Great Depression, a book that galvanized—and sometimes outraged—millions of readers. First published in 1939, Steinbeck's Pulitzer Prize-winning epic of the Great Depression chronicles the Dust Bowl migration of the 1930s and tells the story of one Oklahoma farm family, the Joads—driven from their homestead and forced to travel west to the promised land of California. Out of their trials and their repeated collisions against the hard realities of an America divided into Haves and Have-Nots evolves a drama that is intensely human yet majestic in its scale and moral vision, elemental yet plainspoken, tragic but ultimately stirring in its human dignity. A portrait of the conflict between the powerful and the powerless, of one man's fierce reaction to injustice, and of one woman's stoical strength, the novel captures the horrors of the Great Depression and probes into the very nature of equality and justice in America. At once a naturalistic epic, captivity narrative, road novel, and transcendental gospel, Steinbeck's powerful landmark novel is perhaps the most American of American Classics. This Centennial edition, specially designed to commemorate one hundred years of Steinbeck, features french flaps and deckle-edged pages. Social finance and social investment are not challenging concepts to grasp. They use commercial-style investment tools to create a social as well as a financial return. The application, however, is not always as straightforward. This book begins in the wider field of social finance but focuses primarily on social investment as a tool. The reader is helped to understand this from different angles: introducing social investment, discussing social investment and taking a "deep-dive" into it to bring it to life. This unique book takes the reader on a journey from first principles to detailed practical application. This book examines the policy context and asks why social investment has only recently become so popular, when in reality this is a very old concept. This is linked to the agenda of making charities more "business-like", set against the changing face of investment, as charities can no longer rely on donations and grants as guaranteed income. The work they do is more important than ever and social investment, used with care, offers a new opportunity that is further explored in this text. Mark Salway, Paul Palmer, Peter Grant and Jim Clifford will help readers understand how a small amount of borrowing, or a different business model focused away from grants and donations, could be transformational for the non-profit sector.

Presents the original report on poverty in America that led President Kennedy to initiate the federal poverty program

The historic first edition of 1962, in a slightly corrected edition. The classic founding statement of the Students For A Democratic Society (SDS).

This book is the longest standing and most widely adopted text in the field of social work research and evaluation. As stated in the book's preface, it is intended for advanced undergraduate and beginning graduate social work students in a one-semester research methods course. Since the first edition in 1981, this edition is designed to provide social work students with the basic methodological foundation they need in order to successfully complete more advanced research courses that focus on single-system designs or program evaluations. With its customarily straightforward user-friendly writing style by renowned educators, this edition will continue to maintain its notoriety as the premier social work research methods text. Thoroughly revised and updated, the chapters offer a wealth of new research examples and references, accessible diagrams of essential concepts and processes, and extended coverage of core social work research methods and recent developments. For example, with the inclusion of four new chapters on the evidence-based approach to social work practice, the book emphasizes how important this approach has become, and provides a rock-solid foundation for understanding how to evaluate and interpret research findings that have been derived from research studies—the minimal skills needed for evidence-based social work practitioners.

The third edition of *Social Anxiety: Clinical, Developmental, and Social Perspectives* integrates examinations of social anxiety, shyness, and embarrassment with the research on social anxiety disorder subtypes, biological theories and cognitive-behavioral or pharmacological treatment outcome studies. Clinicians, social and developmental psychologists and behavioral geneticists have all conducted research over the past ten years which is essential to furthering our understanding and treatment of social anxiety disorders. This book weaves together research findings gathered by renowned minds across these various disciplines, and deals with both theory and research. It explores what constitutes social anxiety, assesses the condition and its relationship to other psychological disorders, exploring the biological basis and treatment approaches as well. Coverage includes key issues not discussed fully by other books, including related disorders in adults and children, relationship to social competence and assertiveness, perfectionism, social skills deficit hypothesis, comparison between pharmacological and psychosocial treatments, and potential mediators of change in the treatment of social anxiety disorder. From the Author: Although social anxiety disorder (social phobia) is widely researched topic in psychiatry, other disciplines, such as social and developmental psychology, have independently been studying the same phenomena for many years. Yet, there has been very little cross-discipline communication and integration. The main objective of the book is to integrate the findings on social anxiety from various disciplines, including clinical psychology, psychiatry, social psychology, neuroscience, and developmental psychology. The most comprehensive source of up-to-date data, with review articles covering a thorough delineation of social anxiety, theoretical perspectives, and treatment approaches Consolidates broadly distributed literature into single source Each chapter is written by an expert in the topic area, providing more fully vetted expert knowledge than any existing work Integrates findings from various disciplines — clinical, social and developmental psychology, psychiatry, neuroscience — rather than focusing on only one conceptual perspective Provides a complete understanding of a complex phenomenon, giving researchers and clinicians alike a better set of tools for furthering what we know

Taken from "The Talented Tenth" written by W. E. B. Du Bois: The Negro race, like all races, is going to be saved by its exceptional men. The problem of education, then, among Negroes must first of all deal with the Talented Tenth; it is the problem of developing the Best of this race that they may guide the Mass away from the contamination and death of the Worst, in their own and other races. Now the training of men is a difficult and intricate task. Its technique is a matter for educational experts, but its object is for the vision of seers. If we make money the object of man-training, we shall develop money-makers but not necessarily men; if we make technical skill the object of education, we may possess artisans but not, in nature, men. Men we shall have only as we make manhood the object of the work of the schools—intelligence, broad sympathy, knowledge of the world that was and is, and of the relation of men to it—this is the curriculum of that Higher Education which must underlie true life. On this foundation we may build bread winning, skill of hand and quickness of brain, with never a fear lest the child and man mistake the means of living for the object of life.
