Laura is a young intern in Washington, D.C., working for handsome and likable Congressman Hal Gannon. Laura falls for the charming Gannon, but when she catches a stewardess at Gannon's apartment, she vows to destroy him. Private investigator Robert Brixton is a former cop who has also worked for the FBI. When Laura goes missing, Brixton is hired by Laura's family to gain insight into the case that the police might have missed. Brixton tracks down rumors about Gannon—a staunchly moral "family advocate" according to his political position, but a womanizer according to gossip—but the congressman vehemently denies having anything untoward to do with Laura. Then Laura is found dead in the congressional cemetery, and many more questions are raised. . .

In this harrowing history of the Hiroshima and Nagasaki bombings, Paul Ham argues against the use of nuclear weapons, drawing on extensive research and hundreds of interviews to prove that the bombings had little impact on the eventual outcome of the Pacific War. More than 100,000 people were killed instantly by the atomic bombs, mostly women, children, and the elderly. Many hundreds of thousands more succumbed to their horrific

injuries later, or slowly perished of radiation-related sickness. Yet American leaders claimed the bombs were "our least abhorrent choice"—and still today most people believe they ended the Pacific War and saved millions of American and Japanese lives. In this gripping narrative, Ham demonstrates convincingly that misunderstandings and nationalist fury on both sides led to the use of the bombs. Ham also gives powerful witness to its destruction through the eyes of eighty survivors, from twelve-year-olds forced to work in war factories to wives and children who faced the holocaust alone. Hiroshima Nagasaki presents the grisly unadorned truth about the bombings, blurred for so long by postwar propaganda, and transforms our understanding of one of the defining events of the twentieth century.

Selected by the Modern Library as one of the 100 best nonfiction books of all time From the Modern Library's new set of beautifully repackaged hardcover classics by Truman Capote—also available are *Breakfast at Tiffany's* and *Other Voices, Other Rooms* (in one volume), *Portraits and Observations*, and *The Complete Stories* Truman Capote's masterpiece, *In Cold Blood*, created a sensation when it was first published, serially, in *The New Yorker* in 1965. The intensively researched, atmospheric narrative of the lives of the Clutter family of Holcomb, Kansas, and of the two men, Richard Eugene Hickock and Perry Edward Smith, who brutally killed them on the night of November 15, 1959, is the seminal work of the "new journalism." Perry Smith is one of the great dark characters of American literature, full of contradictory emotions. "I thought he was a very nice

I thought so right up to the moment I cut his throat.” Told in chapters that alternate between the Clutter household and the approach of Smith and Hickock in their black Chevrolet, then between the investigation of the case and the killers’ flight, Capote’s account is so detailed that the reader comes to feel almost like a participant in the events.

These three political thrillers by the acclaimed author—and daughter of President Harry Truman—offer an insider’s look into the dangerous shadows of D.C.

In the stirring, highly anticipated first volume of his presidential memoirs, Barack Obama tells the story of his improbable odyssey from young man searching for his identity to leader of the free world, describing in strikingly personal detail both his political education and the landmark moments of the first term of his historic presidency—a time of dramatic transformation and turmoil. Obama takes readers on a compelling journey from his earliest political aspirations to the pivotal Iowa caucus victory that demonstrated the power of grassroots activism to the watershed night of November 4, 2008, when he was elected 44th president of the United States, becoming the first African American to hold the nation’s highest office. Reflecting on the presidency, he offers a unique and thoughtful exploration of both the awesome reach and the limits of presidential power, as well as singular insights into the dynamics of U.S. partisan politics and international diplomacy. Obama brings readers inside the Oval Office and the White House Situation Room, and to Moscow, Cairo, Beijing, and points beyond. We are privy to his thoughts as he assembles his cabinet, wrestles with a global financial crisis, takes the measure of Vladimir Putin, overcomes seemingly insurmountable odds to secure passage of the Affordable Care Act, clashes with generals about U.S. strategy in Afghanistan, tackles Wall Street reform, responds to the devastating

Deepwater Horizon blowout, and authorizes Operation Neptune's Spear, which leads to the death of Osama bin Laden. A Promised Land is extraordinarily intimate and introspective—the story of one man's bet with history, the faith of a community organizer tested on the world stage. Obama is candid about the balancing act of running for office as a Black American, bearing the expectations of a generation buoyed by messages of "hope and change," and meeting the moral challenges of high-stakes decision-making. He is frank about the forces that opposed him at home and abroad, open about how living in the White House affected his wife and daughters, and unafraid to reveal self-doubt and disappointment. Yet he never wavers from his belief that inside the great, ongoing American experiment, progress is always possible. This beautifully written and powerful book captures Barack Obama's conviction that democracy is not a gift from on high but something founded on empathy and common understanding and built together, day by day.

FEELINGS BURIED ALIVE NEVER DIE combines a supportive, common-sense, results-oriented approach to a problem that is widespread and that can stop people from living fully. This new "Reader's Edition" of Harry Truman's memoirs removes the overload of detail and reproduced historical documents, reduces the bloated cast of characters, clarifies the often confusing balance between chronological and thematic presentation, and corrects some important problems of presentation that made the two volumes of Truman's memoirs, published in 1955 and 1956, difficult to read and enjoy. This new edition, reduced to half the length of the original text, offers a new generation of readers the thrill of hearing the unique and authentic voice of Harry S. Truman, probably the most important president of the last seventy-five years, telling the story of his life, his presidency, and some of the most important years in American history. characters—Roosevelt, Churchill, Stalin, Eleanor Roosevelt, Bess Wallace Truman, George Marshall, Joe McCarthy, and Dean Acheson—and dramatic events. In this riveting biography, acclaimed historian David McCullough not only captures the man—a more complex, informed, and determined man than ever before imagined—but also the turbulent times in which he rose, boldly, to meet unprecedented challenges. The last president to serve as a living link between the nineteenth and the twentieth centuries, Truman's story spans the raw world of the Missouri frontier, World War I, the powerful Pendergast machine of Kansas City, the legendary Whistle-Stop Campaign of 1948, and the decisions to drop the atomic bomb, confront Stalin at Potsdam, send troops to Korea, and fire General MacArthur. Drawing on newly discovered archival material and extensive interviews with Truman's own family, friends, and Washington colleagues, McCullough tells the deeply moving story of the seemingly ordinary "man from Missouri" who was perhaps the most courageous president in our history. This book is a provocative and thoroughly documented reassessment of President Truman's profound influence on U.S. foreign policy and the Cold War. The author contends that Truman remained a parochial nationalist who lacked the vision and leadership to move the United States away from conflict and toward detente. Instead, he

A 2019 NPR Staff Pick How the blinding of Sergeant Isaac Woodard changed the course of America's civil rights history On February 12, 1946, Sergeant Isaac Woodard, a returning, decorated African American veteran, was removed from a Greyhound bus in Batesburg, South Carolina, after he challenged the bus driver's disrespectful treatment of him. Woodard, in uniform, was arrested by the local police chief, Lynwood Shull, and beaten and blinded while in custody. President Harry Truman was outraged by the incident. He established the first presidential commission on civil rights and his Justice Department filed criminal charges against Shull. In July 1948, following his commission's recommendation, Truman ordered an end to segregation in the U.S. armed forces. An all-white South Carolina jury acquitted Shull, but the presiding

Waring described the trial as his “baptism of fire,” and began issuing major civil rights decisions from his Charleston courtroom, including his 1951 dissent in *Briggs v. Elliott* declaring public school segregation per se unconstitutional. Three years later, the Supreme Court adopted Waring’s language and reasoning in *Brown v. Board of Education*. Richard Gergel’s *Unexampled Courage* details the impact of the blinding of Sergeant Woodard on the racial awakening of President Truman and Judge Waring, and traces their influential roles in changing the course of America’s civil rights history.

With startling revelations, Tsuyoshi Hasegawa rewrites the standard history of the end of World War II in the Pacific. By fully integrating the three key actors in the story--the United States, the Soviet Union, and Japan--Hasegawa for the first time puts the last months of the war into international perspective. From April 1945, when Stalin broke the Soviet-Japanese Neutrality Pact and Harry Truman

assumed the presidency, to the final Soviet military actions against Japan, Hasegawa brings to light the real reasons Japan surrendered. From Washington to Moscow to Tokyo and back again, he shows us a high-stakes diplomatic game as Truman and Stalin sought to outmaneuver each other in forcing Japan's surrender; as Stalin dangled mediation offers to Japan while secretly preparing to fight in the Pacific; as Tokyo peace advocates desperately tried to stave off a war party determined to mount a last-ditch defense; and as the Americans struggled to balance their competing interests of ending the war with Japan and preventing the Soviets from expanding into the Pacific. Authoritative and engrossing, *Racing the Enemy* puts the final days of World War II into a whole new light.

vision at odds with their history and self-conceptions. In the process, they would drive the creation of NATO, the European Union, and a Western identity that continue to shape world events. Benn Steil's "thoroughly researched and well-written account" (USA TODAY) tells the story behind the birth of the Cold War, told with verve, insight, and resonance for today. Focusing on the critical years 1947 to 1949, Benn Steil's gripping narrative takes us through the seminal episodes marking the collapse of postwar US-Soviet relations—the Prague coup, the Berlin blockade, and the division of Germany. In each case, Stalin's determination to crush the Marshall Plan and undermine American power in Europe is vividly portrayed. Bringing to bear fascinating new material from American, Russian, German, and other European archives, Steil's account will forever change how we see the Marshall Plan. "Trenchant and timely...an ambitious, deeply researched narrative that...provides a fresh perspective on the coming Cold War" (The New York Times Book Review), The Marshall Plan is a polished and masterly work of historical narrative. An instant classic of Cold War literature, it "is a gripping, complex, and critically important story that is told with clarity and precision" (The Christian Science Monitor).

"Energetically written and lucid, it makes an ideal introduction to the subject." —The New York Times  
The “dean of Cold War historians” (The New York Times) now presents the definitive account of the global confrontation that dominated the last half of the twentieth century. Drawing on newly opened archives and the reminiscences of the major players, John Lewis Gaddis explains not just what happened but why—from the months in 1945 when the U.S. and the U.S.S.R. went from alliance to antagonism to the barely averted holocaust of the Cuban Missile Crisis to the maneuvers of Nixon and Mao, Reagan and Gorbachev. Brilliant, accessible, almost Shakespearean in its drama, *The Cold War* stands as a triumphant summation of the era that, more than any other, shaped our own. Gaddis is also the author of *On Grand Strategy*.

In *Killing Hope*, William Blum, author of the bestselling *Rogue State: A Guide to the World's Only Superpower*, provides a devastating and comprehensive account of America's covert and overt military actions in the world, all the way from China in the 1940s to the invasion of Iraq in 2003 and - in this updated edition - beyond. Is the United States, as it likes to claim, a global force for democracy? *Killing Hope* shows the answer to this question to be a resounding 'no'.

the Pacific, America is stunned by news of President Franklin D. Roosevelt's death. In an instant, Vice President Harry Truman, who has been kept out of war planning and knows nothing of the top-secret Manhattan Project to develop the world's first atomic bomb, must assume command of a nation at war on multiple continents—and confront one of the most consequential decisions in history. Countdown 1945 tells the gripping true story of the turbulent days, weeks, and months to follow, leading up to August 6, 1945, when Truman gives the order to drop the bomb on Hiroshima. In Countdown 1945, Chris Wallace, the veteran journalist and anchor of Fox News Sunday, takes readers inside the minds of the iconic and elusive figures who join the quest for the bomb, each for different reasons: the legendary Albert Einstein, who eventually calls his vocal support for the atomic bomb “the one great mistake in my life”; lead researcher J. Robert “Oppie” Oppenheimer and the Soviet spies who secretly infiltrate his team; the fiercely competitive pilots of the plane selected to drop the bomb; and many more. Perhaps most of all, Countdown 1945 is the story of an untested new president confronting a decision that he knows will change the world forever. But more than a book about the atomic bomb, Countdown 1945 is also an unforgettable account of the lives of ordinary American and Japanese civilians in wartime—from “Calutron Girls” like Ruth Sisson in Oak Ridge, Tennessee, to ten-year-old Hiroshima resident Hideko Tamura, who survives the blast at ground zero but loses her mother and later immigrates to the United States, where she lives to this day—as well as American soldiers fighting in the Pacific, waiting in fear for the order to launch a possible invasion of Japan. Told with vigor, intelligence, and humanity, Countdown 1945 is the definitive account of one of the most significant moments in history.

In this new edition of his classic 1970 memoir about the notorious U-2 incident, pilot Francis Gary Powers reveals the full story of what actually happened in the most sensational espionage case in Cold War history. After surviving the shoot-down of his reconnaissance plane and his capture on May 1, 1960, Powers endured sixty-one days of rigorous interrogation by the KGB, a public trial, a conviction for espionage, and the start of a ten-year sentence. After nearly two years, the U.S. government obtained his release from prison in a dramatic exchange for convicted Soviet spy Rudolph Abel. The narrative is a tremendously exciting suspense story about a man who was labeled a traitor by many of his countrymen but who emerged a Cold War hero. A hypnotically fast-paced, masterful reporting of Harry Truman's first 120 days as president, when he took on Germany, Japan, Stalin, and a secret weapon of unimaginable power—marking the most dramatic rise to greatness in American history. Chosen as FDR's fourth-term vice president for his well-praised work ethic, good judgment, and lack of enemies, Harry S. Truman was the prototypical ordinary man. That is, until he was shockingly thrust in over his head after FDR's sudden death. The first four months of Truman's administration saw the founding of the United Nations, the fall of Berlin, victory at Okinawa, firebombings in Tokyo, the first atomic explosion, the Nazi surrender, the liberation of concentration camps, the mass starvation in Europe, the Potsdam Conference, the controversial decision to bomb Hiroshima and Nagasaki, the surrender of imperial Japan, and finally, the end of World War II and the rise of the Cold War. He also charts their relationships with the public, which has consigned them to fame or infamy, and with Congress, which has continually struggled to define and redefine the president's wartime powers. This influential report described science as "a largely unexplored hinterland" that would provide the "essential key" to the economic prosperity of the post World War II years.

I've often heard it said that everybody has a story to tell, and I know this is true, but I have found also that we all have a yearning to tell our story. Also, we have numerous ways to do it: through voice, writing instruments and machines, through photographic and digital images that we make or assemble, and also through the pattern of our living, and in the things that we create. Truman Fields is a many-faceted person, and he has left plenty of evidence of his interesting story to supplement what he tells us in this book. He has been a persistent student, teacher and craftsman, a successful businessman, and an award-winning tennis player, a superb craftsman, and a public servant. He was born in the center of the Appalachian coal fields, where he attended local schools until his father, perceived that Truman had a desire to learn more than might be possible locally, sent his reluctant son to Berea Foundation High School at the age of sixteen. There, in

addition to the usual academic subjects, he began probing the complexities of electronics, metal-and-wood, and of course basketball and tennis. Without money, he was a half-day student, meaning he took classes for half the day and worked in the rest of the day for his room and board. Thus it would have taken him five years to complete high school, so ever restless and inquisitive, he decided at the age of twenty, to join the Navy for four years. The Navy sent him to electronic school before assigning him to a destroyer tender. On this ship, he saw a great deal of the world. At age 24, he re-entered the Foundation School for a semester to finish high school, and then enrolled at Berea College. There he majored in Industrial Arts and played tennis so well that he was a finalist in several tournaments. In college, he met Joyce Barnes from Tennessee, and they were married. After graduation Truman taught in Louisville and then moved to Cleveland, Ohio, where he and Joyce taught for 30 years. There, Truman also worked successfully part-time as a real estate broker and he coached tennis at Baldwin Wallace College. Joyce and Truman reared two daughters in Cleveland, and their grandchildren, who know little of life in the Appalachian Mountains, became the main inspiration for this book. When Joyce and Truman retired from teaching, their love of Berea College and the Berea community drew them back to Kentucky. Here they have managed several rental properties and developed home-building sights. Truman was elected for several terms to Berea City Council, taught students, faculty, and community people to make furniture in the Colleges woodworking shop, and coached the college

tennis team. He also continued to follow the tennis circuits, winning many gold metals in his age class. Joyce has also been much involved in the arts and crafts scene for which Berea is famous. She and Truman are active members of Union Church, the mother church of Berea College. They are also generous supporters of Berea College in the knowledge that the lives of other young people from the mountains will be enriched there, as theirs have been. In this book, Joyce and Trumans grandchildren, and others, will learn much about the life Truman lived as a boy, about the one-room school he attended, his classmates, the games they played, the spelling bees, the sporting contests, the victories and disappointments in his budding life, his teachers and pastors vigorous efforts to teach right from wrong, and his own family history. Along the way, from Big Creek to Berea, to Louisville, and Cleveland and back to Berea, we learn Trumans story and the events that shaped him from the lad on the cover in Happy Jack overalls looking with sharp and expectant eyes, to the disciplined tireless, teacher, public servant, athlete, auctioneer, craftsman, and student of all Kentucky things today. Hes been a little modest, however, like most mountain people, in telling his story. So keep in mind all that he has done, all his interests and involvements, as he remembers and tells you about his life in the heart of Appalachia. Loyal Jones Berea, Kentucky

In the aftermath of World War II, American policymakers turned to the task of rebuilding Europe while keeping communism at bay. In Germany, formally divided since 1949, the United States prioritized the political, economic, and, eventually, military integration of the fledgling Federal Republic with the West. The extraordinary success story of forging this alliance has dominated our historical understanding of the American-German relationship. Largely left out of the grand narrative of U.S.–German relations were most East Germans who found themselves caught under Soviet and then communist control by the post-1945 geo-political fallout of the war that Nazi Germany had launched. They were the ones who most dearly paid the price for the country's division. This book writes the East Germans—both leadership and general populace—back into that history as objects of American policy and as historical agents in their own right. Based on recently declassified documents from American, Russian, and German archives, this book demonstrates that U.S. efforts from 1945 to 1953 went beyond building a prosperous democracy in western Germany and “containing” Soviet-Communist power to the east. Under the Truman and then the

Eisenhower administrations, American policy also included efforts to undermine and "roll back" Soviet and German communist control in the eastern part of the country. This story sheds light on a dark-er side to the American Cold War in Germany: propaganda, covert operations, economic pressure, and psychological warfare. Christian F. Ostermann takes an international history approach, capturing Soviet and East German responses and actions, and drawing a rich and complex picture of the early East–West confrontation in the heart of Europe.

The essays in this volume provide a wide-ranging overview of the intentions, achievements, and failures of the Truman administration.
