Jesus was uniquely adept in the art of "reading" people. He fit his approach to the precise needs and interests of the person with whom he was dealing, and he spoke the cultural language of that individual. In this book, Robert Perry takes what Jesus and others have done intuitively—niche marketing—and provides a framework for applying those principles in everyday practice. Convinced that congregations can learn from the wisdom of secular disciplines and apply that wisdom to congregational life without damaging the integrity of the Christian faith, Perry offers a detailed process for using sound marketing principles to identify a congregation's strengths and the needs of its community, and to develop strategies for effective ministry.

A roadmap for integrating mindfulness into every aspect of social change: how to lead transformation with compassion for the needs and perspectives of all people. Gretchen Steidle knows first-hand the personal transformation that mindfulness practice can bring. But she doesn't believe that transformation stops at personal wellbeing. In *Leading from Within*, Steidle describes the ways that personal investment in self-awareness shapes leaders who are able to inspire change in others, build stronger relationships, and design innovative and more sustainable solutions. Steidle argues that both personal and societal transformation are essential for a just society, and with this book she offers a roadmap for integrating mindfulness into every aspect of social change. Conventional methods attempt to compel people to change through incentives or punitive measures. Conscious social change calls for leading with a deeper human understanding of change and compassion for the needs and perspectives of all stakeholders. Steidle offers mindfulness practices for individuals and groups, presents the neuroscientific evidence for its benefits, and argues for its relevance to social change. She describes five capacities of conscious social change, devoting a chapter to each. She writes about her own experiences, including her work helping women to found their own grassroots social ventures in post-conflict Africa. She describes the success of a group of rural, uneducated women in Rwanda, for example, who now provide 9,000 villagers with clean water, ending the sexual exploitation of disabled women unable to collect water on their own. Steidle also draws from the work of change agents in the United States to showcase applications of conscious social change to timely issues like immigration, racism, policing, and urban violence. Through personal stories and practical guidance, Steidle delivers both the inspiration and tools of this innovative approach to social transformation. About *Global Grassroots*: In post-conflict Africa, *Global Grassroots* equips emerging women leaders, including war survivors, subsistence farmers, and the undereducated, with the tools and resources to create conscious social change. Our core program is our Academy for Conscious Change, a social entrepreneurship and mindfulness-based leadership program that helps vulnerable women design their own non-profit solutions to address priority social issues. In our first decade of operations we have trained over 650 change agents who have designed 150 civil society organizations benefiting over 150,000 people.

Two world-renowned strategists detail the seven leadership imperatives for transforming companies in the new digital era. Digital transformation is critical. But winning in today's world requires more than digitization. It requires understanding that the nature of competitive advantage has shifted—and that being digital is not enough. In *Beyond Digital*, Paul Leinwand and Matt Mani from Strategy&, PwC's global strategy consulting business, take readers inside twelve companies and how they have navigated through this monumental shift: from Philips's reinvention from a broad conglomerate to a focused health technology player, to Cleveland Clinic's engagement with its broader ecosystem to improve and expand its leading patient care to more locations around the world, to Microsoft's overhaul of its global commercial business to drive customer outcomes. Other case studies include Adobe, Citigroup, Eli Lilly, Hitachi, Honeywell, Inditex, Komatsu, STC Pay, and Titan. Building on a major new body of research, the authors identify the seven imperatives that leaders must follow as the digital age continues to evolve: Reimagine your company's place in the world Embrace and create value via ecosystems Build a system of privileged insights with your customers Make your organization outcome-oriented Invert the focus of your leadership team Reinvent the social contract with your people Disrupt your own leadership approach Together, these seven imperatives comprise a playbook for how leaders can define a bolder purpose and transform their organizations.

Theological and psychological interpretations of Shakespeare's most problematic play have been pursued as complementary to each other. In this bold reading, Walter N. King brings twentieth-century Christian existentialism and post-Freudian psychological theory to bear upon Hamlet and his famous problems. King draws on the support of Paul Tillich, John Macquarrie, and Nicolai Beryaev, who radically reinterpreted the Christian doctrine of providence, and presents an unconventional thesis. He derives illuminating psychological insights from Erik Erikson, the pioneer in the modern study of identity, and Viktor Frankl, the founder of logotherapy.

President Nixon signed the War on Cancer into Law in 1971. Some forty-five years and several billion dollars later, it looks like we have lost the battle. Or have we? What if a natural solution had been there all along, just overlooked by the pharmaceutical industry? When a new, natural, and non-toxic way to address cancer is being discovered, it is a game changer that does not go unnoticed in the scientific community. But instead of being hailed and embraced, it is fiercely opposed by prominent scientists with strong ties with the pharmaceutical industry and the might of the government is called to the rescue. As a result, we are losing the war on cancer. Mirko Beljanski, PhD, one of the first green molecular biologists, was called upon by President Mitterrand of France to treat his prostate cancer, allowing him to reach his second term in office, but upon his death, Beljanski became the subject of relentless persecution aimed at wiping out this information. In *Winning the War on Cancer*, his daughter Sylvie Beljanski outlines her journey of learning about her father's discoveries, and ensuring his legacy is available to all those struggling with the disease today.

Discover the God-inspired difference only you can make in the world . . . using the key you never knew you had. Tim Tebow credits his mom with being the key to his success--but Pam never expected that she would be known on a national stage. For most of her life, she was serving quietly and faithfully as a wife and a mom--choosing life for her child in the face of medical risks, answering the Lord's call to mission work in the Philippines, and homeschooling before anyone knew what the word meant. But all along the way, her experiences--and her consistent, everyday choices to follow the Lord and to serve wherever He placed her--were creating unexpected ripples of influence throughout her family, her community, and her world. And they would end up extending far beyond anything she ever imagined. Pam believes that every one of us can be influential--and that deep within a woman's heart is the desire to use her influence for good. In *Ripple Effects*, Pam uncovers and explores the miraculous motivating power of influence we can have on this generation and the next, no matter where we are planted in life. Whether we are in the midst of endless diaper changes, climbing up the corporate ladder, or simply doing our best to live, love, and serve well each day, Pam will encourage us to maximize our God-given opportunities for influence--and watch how far the ripples will spread.

Groundbreaking advice from one of the nation's foremost executive coaches to help you overcome obstacles in your life, find your unique purpose, and achieve more. We find ourselves asking, Why am I working so hard but don't seem to be getting anywhere? Why do I keep fighting the same battles? When did I lose passion for what I do? Everyone has those questions, and in this book, Robb Hiller unveils the coaching that he has given Fortune 500 executives to answer these same questions. Robb is passionate about teaching these principles because they helped him face the biggest challenge of his life: a devastating cancer diagnosis. Provides a unique comprehensive review of axiomatic consensus theory in biomathematics as it has developed over the past 30 years. Based in sociologist Zygmunt Bauman's theory of liquid modernity, this volume describes and critiques key aspects and practices of liquid education--education as market-driven consumption, short life span of useful knowledge, overabundance of information--through a systematic comparison with ancient Greek paideia and medieval university education, producing a sweeping analysis of the history and philosophy of education for the purpose of understanding current higher education, positing a more holistic alternative model in which students are embedded in a learning community that is itself embedded in a larger society. If liquid modernity has left a vacuum where, according to Bauman, the pilot's cabin is empty, this volume argues that no structure is better positioned to fill this vacuum than the university and outlines a renewed vision of social transformation through higher education.

Jonathan Safran Foer emerged as one of the most original writers of his generation with his best-selling debut novel, *Everything Is Illuminated*. Now, with humor, tenderness, and awe, he confronts the traumas of our recent history. What he discovers is solace in that most human quality, imagination. Meet Oskar Schell, an inventor, Francophile, tambourine player, Shakespearean actor, jeweler, pacifist, correspondent with Stephen Hawking and Ringo Starr. He is nine years old. And he is on an urgent, secret search through the five boroughs of New York. His mission is to find the lock that fits a mysterious key belonging to his father, who died in the World Trade Center on 9/11. An inspired innocent, Oskar is alternately endearing, exasperating, and hilarious as he careens from Central Park to Coney Island to Harlem on his search. Along the way he is always dreaming up inventions to keep those he loves safe from harm. What about a birdseed shirt to let you fly away? What if you could actually hear everyone's heartbeat? His goal is hopeful, but the past speaks a loud warning in stories of those

who've lost loved ones before. As Oskar roams New York, he encounters a motley assortment of humanity who are all survivors in their own way. He befriends a 103-year-old war reporter, a tour guide who never leaves the Empire State Building, and lovers enraptured or scorned. Ultimately, Oskar ends his journey where it began, at his father's grave. But now he is accompanied by the silent stranger who has been renting the spare room of his grandmother's apartment. They are there to dig up his father's empty coffin.

Since the attacks of September 11th 2001 and up to and beyond Osama bin Ladin's death, al-Qaeda has come to embody the new enigmatic face of terrorism, dominating discussions of national and international security. Yet in spite of the attention it receives, conflicting assumptions about the group abound. Is al-Qaeda a rigidly structured organization, a global network of semi-independent cells, a franchise, or simply an idea whose time has come? What is meant by talk of the 'global Salafi jihad' that is confronting the West? What are the implications of bin Ladin's death? Christina Hellmich offers a critical examination of the widely-held notions regarding the origins and manifestations of al-Qaeda and the sources on which they rely, mapping the organisation's alleged transition from what began as a regional struggle against the Soviets in Afghanistan to the increasingly leaderless jihad of the post-9/11 world. Rather than just providing yet another biography of al-Qaeda, Hellmich forensically examines discrepancies between the most common explanations and to the limits of what can realistically be known. Drawing on a wide variety of sources, 'al-Qaeda: From Global Network to Local Franchise' offers a penetrating insight into an organization which, for all its notoriety, is one of the least-understood of our time.
