Unceremoniously dismissed from his lectureship in New Testament, Dr. Edward J. Sutherland uses his forced retirement to struggle through a thicket of end-times issues in a conservative church. Interaction with a defense lawyer induces him to reconsider his inherited eschatology by engaging honestly with the biblical text. He faces conflict within himself, with a crusading dispensationalist, church elders, a newly appointed American pastor, and a militant atheist. Set in the Sunshine Coast of subtropical Australia, the book goes beyond entertaining through romance, touches of humor, and conflict resolution. Readers are exposed to vigorous discussions: at a surf club, a backyard barbecue, a second-coming conference, in a neighbor's lounge room, or via email. They are forced to examine their presuppositions on topics including the rapture, the antichrist, the tribulation, the purpose of Christ's second coming, and the kingdom of God. Whether they alter their views on such topics is less important than that they cultivate sound principles of biblical interpretation, uphold the integrity of Jesus and the biblical authors, and respect fellow Christians with whom they disagree.

"A free-wheeling vehicle . . . an unforgettable ride!"—The *New York Times* *Cat's Cradle* is Kurt Vonnegut's satirical commentary on modern man and his madness. An apocalyptic tale of this planet's ultimate fate, it features a midget as the protagonist, a complete, original theology created by a calypso singer, and a vision of the future that is at once blackly fatalistic and hilariously funny. A book that left an indelible mark on an entire generation of readers, *Cat's Cradle* is one of the twentieth century's most important works—and Vonnegut at his very best.

“[Vonnegut is] an unimitative and inimitable social satirist.”—Harper’s Magazine “Our finest black-humorist . . . We laugh in self-defense.”—Atlantic Monthly

Dan Brown's 'The Lost Symbol' was the most anticipated novel of 2009, and was the literary event of the year. Alex Carmine examines all the themes in depth, and provides a chapter-by-chapter analysis of 'The Lost Symbol'. From Alex's

assessment of the novel, it is very much apparent that Dan Brown has not only been adhering to his own formula, but that he has also been following Joseph Campbell's concept of the hero's journey. We know that Dan Brown likes to play with the names of his characters, so Alex explores these in great detail. In this way, Alex reveals the name of the real American family upon whom the Solomons are based. Alex also shows that, following its development within 'The Da Vinci Code', Dan Brown's still very much in tune with his 'sacred feminine' side, with his stunning representation of womb envy. Dan Brown's fascinating depiction of masculinity within this novel is studied too. In addition to this, Alex explores the literary devices that Dan Brown employs, and the magical sleights of hand that he uses to make the reader look the wrong way. Indeed, one of the main arguments in this book is that Dan Brown has hidden much of the true meaning of 'The Lost Symbol' behind various veils of allegory, much as the Masons do with regards to their secrets, and like the Symbologist Robert Langdon, Alex reveals these meanings to you. However, Dan Brown is an author who also likes to reward his readers, so Alex examines the clues about the novel that he disseminated prior to publication via Facebook and Twitter. Furthermore, Alex considers the various Masonic practices depicted within the novel, and bring to the fore the conspiracy theories that surround this mysterious fraternity. Alex Carmine's very close reading of the novel literally leaves no stone uncovered, and will transform your own interpretation of the text.

History teachers aren't expected to teach science, math teachers aren't expected to teach social studies; so why are all teachers responsible for teaching reading? The answer is simple. An emphasis on reading and literacy skills in the content areas has an exponential effect on learning in every discipline. This completely revised third edition of the best-selling *Teaching Reading in the Content Areas* seeks to help educators understand how to teach reading in their respective disciplines, choose the best reading strategies from the vast array available, and positively impact student learning. Throughout, it draws from new research on the impact of new technologies, the population boom of English language learners, and the influence of the Common Core State Standards. Given the complexities of the reading process, teachers deserve--and this book provides--clear, research-based answers to overarching questions about teaching reading in the content areas: * What specific skills do students need to read effectively in each content area? * Which reading strategies are most appropriate to help students become more effective readers and independent learners? * What type of learning environment promotes effective reading and learning? By focusing on the differences in how content-area experts read and reason, teachers can be better prepared to help their students understand that the ways they read in biology are different from the ways they read in English, history, or mathematics. To read successfully in different content areas, students must develop discipline-specific skills and strategies along with knowledge of that discipline. With that in mind, this book also includes 40 strategies designed to help students in every grade level and across the content areas develop their vocabularies, comprehend informational and narrative texts, and engage in meaningful discussions of what they read.

Critical care medicine is a dynamic and exciting arena where complex pathophysiologic states require extensive knowledge and up-to-date clinical information. An extensive knowledge of basic pathophysiology, as well as awareness of the appropriate diagnostic tests and treatments that are used to optimize care in the critically ill is essential. Since our first edition 7 years ago, new information crucial to the care and understanding of the critically ill patient has rapidly accumulated. Because this knowledge base crosses many different disciplines, a comprehensive multidisciplinary approach presenting the information is essential, similar to the multidisciplinary approach that is used to care for the critically ill patient. We have strived to provide this content in an easily digestible format that uses a variety of teaching tools to facilitate understanding of the presented concepts and to enhance information retention. To meet the demand to provide comprehensive and diverse education in order to understand the pathogenesis and optimum care of a variety of critical illnesses, we have substantially revised the prior topics in the first edition with updated information. We have also markedly expanded the number of topics covered to include acute lung injury and the acute respiratory distress syndrome, an expanded discussion of the physiology and operation of mechanical ventilation, obstetrical care in the ICU,

neurosurgical emergencies, acute co- nary syndromes, cardiac arrhythmias, role of whole body rehabilitation in the ICU, ethical conduct of human research in the ICU, and nursing care of the ICU patient.
