Dave Ramsey teaches you how to make the right moves with your money.

The government budget should be the financial mirror of society's choices. Yet most people view budgeting as the epitome of eye-glazing subjects, rarely explained in a way that is understandable to the non-specialist and too often presented without adequate consideration of a country's governance and institutional capacity. Government Budgeting and Expenditure Management fills a gap in the literature to redress these failings and does so in comparative international perspective. This book provides a comprehensive but pithy and easy-to-understand treatment of public financial management, taking into account a variety of special issues including budgeting in post-conflict situations, at subnational government levels, for military/security expenditures, and in countries with large extractive revenues. Distilling the lessons of budgeting reform in countries at different levels of income and administrative capacity, each chapter gradually progresses from the basic principles to the more technical aspects and then on to implementation issues, using concrete examples and illustrations from around the globe. Government Budgeting and Expenditure Management is ideally suited as the primary text for advanced undergraduate or graduate courses in government budgeting or public financial management, or as a supplementary text for courses in public finance, public economics, economic development, public administration or comparative politics. With its

attention to practical implementation aspects, the book will also be of direct interest to practitioners, policy-makers, and government employee training organizations.

Aaron Wildavsky's greatest concern, as expressed in his writings, is how people manage to live together. This concern may at first appear to have little to do with the study of budgeting, but for Wildavsky budgeting made living together possible. Indeed, as he argues here, if you cannot budget, you cannot govern. Budgeting and Governing gathers in one place a mass of material that otherwise would be lost in a wilderness of journals and edited volumes. With few exceptions, Wildavsky chose the articles in this collection. They are organized largely chronologically so that the reader can trace the progression of his thought which moved from studies of the American federal government, through comparative work, and on to placing budgeting within a broader theory of political culture. Wildavsky wrote about budgeting because in his words, "when a process involves power, authority, culture, consensus, and conflict, it captures a great deal of national political life." Wildavsky was interested in budgeting because of what it could tell us about the classic questions of politics: who gets what, how, and why? His earlier analyses focus narrowly on budgeting personnel and agency actors in answering these questions, while in his later work the contending actors become sub-cultural types. To Wildavsky politics was about finding terms for living together in spite of ideological differences. Budgetary incrementalism helped to manage this otherwise unmanageable task. He thought synoptic budgeting and all related reforms would increase disagreement and raise the stakes, and so were unwise. Analysis had to serve politics, not try to displace it. Aaron Wildavsky is considered one of the most innovative and prolific scholars in the field of political research in our time. He was the author most recently of *Culture and Social Theory* and

Federalism and Political Culture, as well as Dilemmas of Presidential Leadership (with Richard Ellis), The Beleaguered Presidency, and Craftways: On the Organization of Scholarly Work, all available from Transaction. Brendon Swedlow is a visiting professor in the political science department at the University of California, Los Angeles. Joseph White is an associate professor in the Department of Health Systems Management at Tulane University Medical Center. "...this collection of essays is to show the development of the late Wildavsky's ideas on budgeting from the beginning of his career to the end....Recommended for research libraries and graduate students in public administration."-Choice "Brendon Swedlow and Transaction Press have rendered policy scholars, budget specialists, and public managers a tremendous service by pulling together this posthumous collection of Aaron Wildavsky's writings on the vital, it often politically tense, relationship between budgeting and governing."--Journal of Policy Analysis and Management

The book offers a conceptual framework that brings into focus the contribution of successful participatory budgeting practice to ensure GRB – the examination of whether men and women fall under existing income and expenditure patterns differently. It suggests that the ideas of participatory budgeting and GRB should be evolving together to provide a concrete idea to address gender needs. The book provides a theoretical explanation that contributes to the consolidation of the practice of GRB at the local government level through participatory budgeting. Conceptualizing the process of participatory budgeting and GRB in the context of Bangladesh, the book will be of interest to researchers in the field of Development Studies, Political Science, Public Administration, and Gender, as well as Asian Studies, in particular, South Asian Studies.

Local budgeting serves important functions that include setting priorities, planning, financial control over inputs, management of operations and accountability to citizens. These objectives give rise to technical and policy issues that require open discussion and debate. The format of

the budget document can facilitate this debate. This book provides a comprehensive treatment of all aspects of local budgeting needed to develop sound fiscal administration at the local level. Topics covered include fiscal administration, forecasting, fiscal discipline, fiscal transparency, integrity of revenue administration, budget formats, and processes including performance budgeting, and capital budgeting.
