With the growing importance of budgeting and budget analysis in today's outcome-value oriented healthcare environment, there is an ever-increasing need to provide today's healthcare students with budgeting skills they need to be successful. While most healthcare finance texts include a chapter on budgeting, this coverage is often insufficient to adequately prepare them, as future financial managers, for the demands of upper management. A great supplement to a wide range of finance, economics, and accounting courses across the health disciplines, Practical Budgeting for Health Care: A Concise Guide covers the full scope of budgeting and budget analysis—from incremental budgeting, forecasting, and flexible budgeting, to variance analysis, capital budgeting, and more—providing students with the

information and skills they'll need to budget effectively. Key Features ? Includes step-by-step instructions on constructing budgets, focusing on incremental and flexible budgeting, the two mos

This edition recognizes the current trends in management accounting and clearly presents the basic concepts and techniques. Although basic concepts in management accounting have not changed dramatically, the application of those concepts has been significantly influenced by a competitive world environment and significant changes in the cost accounting systems used by large companies and corporations. The focus of the text remains the understanding of costs and cost behavior and the use of cost information for planning and control decisions.

This book examines the conceptual development of control in the literature of both management and accounting disciplines, from 1900 to 1980. In order to portray the development of control concepts over time, the chapters are organized into sections relating to the schools of thought from which they emanated and a model of control is constructed to represent each group of concepts and their hypothesised inter-relationships. Having traced the development of control models a comparative analysis of historical development in the two streams of management and accounting literature is undertaken. This analysis reveals a pronounced lag of accounting development behind that of management literature. The reasons for this are then discussed.
