This highly practical textbook uses a multitude of worked and real life examples, supportive learning features, crystal clear explanations, and extensive online resources (all fully integrated with the book) to guide students towards a confident understanding of the fundamentals of management accounting. The student resources include: - Interactive Multiple Choice Questions for revising key topics; - Numerical exercises for practising the calculation of accounting information from given sets of data; - 'Go back over this again' features containing a mix of further examples, written exercises, true or false questions, and annotated accounting information to help consolidate learning and revise or revisit concepts; - 'Show me how to do it' videos that provide practical demonstrations of dealing with more complex accounting tasks; - Web links for primary source material and articles through which readers can learn more about the companies and organizations discussed in the book. Lecturer resources include PowerPoint slides, examples and solutions, and hundreds of ready-to-use multiple-choice questions, all arranged by chapter. Lecturers can choose to make the online materials available to their students via Dashboard, a learning and assessment tool which provides sophisticated analytics for student achievement and engagement with the resources, also facilitating discussions and course updates.

Summary The TOGAF 9 certification program is a knowledge-based certification program. It has two levels, leading to certification for TOGAF 9 Foundation and TOGAF 9 Certified, respectively. The purpose of certification to TOGAF 9 Certified is to provide validation that, in addition to the knowledge and comprehension of TOGAF 9 Foundation level, the Candidate is able to analyze and apply this knowledge. The learning objectives at this level therefore focus on application and analysis in addition to knowledge and comprehension. This Study Guide supports students in preparation for the TOGAF 9 Part 2 Examination, leading to TOGAF 9 Certified. This third edition contains minor updates to remove references to the TOGAF 8-9 Advanced Bridge Examination<sup>1</sup> and also adds four bonus practice examination questions to Appendix B. It gives an overview of every learning objective for the TOGAF 9 Certified Syllabus beyond the Foundation level.

Reflecting the dramatic changes shaped by rapidly developing technologies over the past six years, this new fourth edition of "Reference and Information Services" takes the introduction to reference sources and services significantly beyond the content of the first three editions. In Part I, Concepts and Processes, chapters have been revised and updated to reflect new ideas and

methods in the provision of reference service in an era when many users have access to the Web. In Part II, "Information Sources and Their Use," discussion of each source type has been updated to encompass key resources in print and on the Web, where an increasing number of freely available sources join those purchased or licensed by libraries. A number of new authors are contributors to this new edition, bringing to their chapters their experience as teachers of reference and as practitioners in different types of libraries. Discussions of services in Part I integrate digital reference as appropriate to each topic, such as how to conduct a reference interview online using instant messaging. Boxes interspersed in the text are used to present scenarios for discussion, to highlight key concepts, or to present excerpts from important documents. Discussions of sources in Part II place more emphasis on designing effective search strategies using both print and digital resources. The chapter on selection and evaluation of sources addresses the changing nature of reference collections and how to evaluate new types of sources. Each chapter concludes with an updated list of additional readings to guide further study. A new companion website will provide links to Web-accessible readings and resources as well as additional scenarios for discussion and example search strategies to supplement those presented in the text.

A modern-day classic and New York Times bestseller from Newbery Medalist Jerry Spinelli. Stargirl. Stargirl is suddenly shunned for everything that makes her different, and Leo, panicked and desperate with love, urges her to become the very thing that can destroy her: normal. A Wrinkle in Time is the winner of the 1963 Newbery Medal. It was a dark and stormy night—Meg Murry, her small brother Charles Wallace, and her mother had come down to the kitchen for a midnight snack when they were upset by the arrival of a most disturbing stranger. "Wild nights are my glory," the unearthly stranger told them. "I just got caught in a downdraft and blown off course. Let me sit down for a moment, and then I'll be on my way. Speaking of ways, by the way, there is such a thing as a tesseract." A tesseract (in case the reader doesn't know) is a wrinkle in time. To tell more would rob the reader of the enjoyment of Miss L'Engle's unusual book. A Wrinkle in Time, winner of the Newbery Medal in 1963, is the story of the adventures in space and time of Meg, Charles Wallace, and Calvin O'Keefe (athlete, student, and one of the most popular boys in high school). They are in search of Meg's father, a scientist who disappeared while engaged in secret work for the government on the tesseract problem.
