Interpersonal phenomena such as attachment, conflict, person perception, learning, and influence have traditionally been studied by examining individuals in isolation, which falls short of capturing their truly interpersonal nature. This book offers state-of-the-art solutions to this age-old problem by presenting methodological and data-analytic approaches useful in investigating processes that take place among dyads: couples, coworkers, parent and child, teacher and student, or doctor and patient, to name just a few. Rich examples from psychology and across the behavioral and social sciences help build the researcher's ability to conceptualize relationship processes; model and test for actor effects, partner effects, and relationship effects; and model and control for the statistical interdependence that can exist between partners. The companion website provides clarifications, elaborations, corrections, and data and files for each chapter.

The success of the first ten editions of Global Business Today (and its longer, more in-depth textbook option and companion, International Business, now in the 12th edition) was based in part on the incorporation of leading-edge research into the text, the use of the up-to-date examples and statistics to illustrate global trends and enterprise strategy, and the discussion of current events within the context of the appropriate theory. Building on these strengths, our goals for the 11th edition have focused on the following: 1. Incorporate new insights from scholarly research. 2. Make sure the content covers all appropriate issues. 3. Make sure the text is up-to-date with current events, statistics, and examples. 4. Add new and insightful opening and closing cases in most chapters. 5. Incorporate value-added global EDGE™ features in every chapter. 6. Connect every chapter to a focus on managerial implications. As part of the overall revision process, changes have been made to every chapter in the book. All statistics have been updated to incorporate the most recently available data. Currency is maintained through the integration of Connect and global EDGE™ feature in every chapter.

Almost every text/course is organized around the four functions of management: planning, leading, organizing, and controlling (PLOC). What makes the texts different are their approach to the subject (principles vs. OB focused) and their strengths of coverage (high/strategic vs. low level/applied/skills). The aim of this text is to show how the four functions interact.
